

### WINNERS GIVEN IN COUNTY MEET

#### Laurens County Field Day Exercises Attract Large Crowd. Clinton Schools Win With Ease.

Field day exercises staged annually under the auspices of the Laurens county schools, were held last Friday on the athletic fields of Presbyterian college with a large gathering of school children present from every section of the county. The track meet was in charge of the college athletic association, all of the officials for the day coming from the student body.

In the track meet, first honor was easily captured by Thornwell orphanage, their score standing at 85 against their closest competitor of 30 1-2. In the girls' meet, Clinton high won first place by a good margin over Laurens, ranking second.

The high school speaking contests were held in the orphanage chapel in the evening. Bothwell Graham of Clinton high, won first place, and James McDuffie of Thornwell, and Franklin Sullivan of Laurens, tied for second honor. In the girls' meet, Margaret Hunter of Gray Court-Owings won first place, and Belle Hamilton of Laurens, came second.

In the elementary meet for girls, first place was captured by little Florence Carter of Clinton, daughter of Mr. and Mrs. J. P. Carter. Nellie Watkins of Cross Hill, came second, and Floride Sullivan of Laurens, third.

In the boys' contest, Billie Curry of Gray Court-Owings won first place, Roy Madden of Mountville, second, and Paul Whitlock of Clinton, third.

The results of the elementary and high school contests follow:

### Porter Finds Bomb For Gov. Roosevelt

New York, April 7.—A dynamite bomb in a package addressed to Governor Franklin D. Roosevelt of New York, was found today in the general postoffice at Thirty-third street and Eighth avenue.

Discovery was made by a porter who was cleaning the parcel post room. He accidentally stepped on a package and there was a small report, followed by the odor of something burning.

The porter, Thomas Calley of Hoboken, N. J., thereupon stepped on the package with his full weight and in so doing broke a fuse that led to the bomb.

Examination disclosed that the bomb was made of a four-inch piece of iron pipe, one inch in diameter and capped on both ends. Police said it contained three-quarters of a stick of dynamite.

The bomb was inside a tin candy box wrapped in brown paper and addressed to "The Hon. F. D. Roosevelt, Mansion House, Albany, N. Y." In the upper lefthand corner was the address "H. Bup, 459 Twenty-ninth Street." No one of that name could be found at that number in either East or West Twenty-ninth street.

Police who examined the box found that it contained, in addition to the iron pipe, a quantity of wax and a piece of sandpaper, against which were several matches in such a way that if the box were opened, the matches would ignite against the sandpaper, burn the wax and light the fuse.

The bomb was thrown into a bucket of water immediately after the porter discovered it. He explained that the package had fallen from a table as he was sweeping the floor with a broom. He said he had heard no sound from the box when it fell to the floor.

### Chevrolet To Have 16 Manufacturing Plants

Detroit, Mich., April 1.—The manufacturing facilities of Chevrolet Motor company, numbering 16 manufacturing plants in this country, are rapidly approaching the volume of output necessary to meet this year's revised annual quota, which calls for the manufacture of 1,350,000 passenger car and truck units.

This was signified last week when W. S. Knudsen, president of the company announced that March production would reach 140,000 units, an amazing output when it is considered that active production on the new six cylinder cars has been underway less than three months. Although no definite figures were issued it can readily be assumed that April's schedule will call for an even larger production, and that mid-summer will witness a quantity output in all of Chevrolet's assembly plants never before equalled by a manufacturer of six cylinder automobiles.

Mr. Knudsen related that February production amounted to 121,249 units. With only 22 working days in the month, daily production for the period averaged better than 5,500 a day.

These figures lend further emphasis to the astonishing achievement of the company last fall in changing over from production of fours to sixes with only a six weeks interim to effect necessary alterations.

Upon his return to Detroit a few days ago from a six weeks trip which took him across the northern part of the country into the far west, R. H. Grant, Chevrolet vice-president in charge of sales, spoke with marked optimism of the prevalent demand for the new six cylinder cars. Nearly everywhere, he declared, dealers indicated to him that they had found an increased market for the new product. The cars, he said, are being delivered to owners as fast as they can be distributed.

### Newspaper Copy Put New Store On Map

(By R. K. Doran) There is one Buffalo, N. Y., business house that is singing real praises for newspaper advertising.

Art Smith Himself, Inc., a large hardware, automobile accessory, electrical supply and sporting goods store opened its doors on April 1, 1928. Years of experience in retailing this type of merchandise had taught Art Smith, president of this new Buffalo

concern, something of the value of newspaper space.

While planning his new store he also laid plans to "put his store on the map" before the year 1928 was over. It is twelve months now since Art Smith commenced to sell his store to Buffalo and its trading area in newspaper space at the rate of \$1,000 a month for the first nine months.

The result is that the Art Smith sporting goods business grew to such proportions that at the present moment the store is planning to rent the store next door to house nothing but sporting goods. Plans are under way to make this the most complete athletic headquarters in the Buffalo and Rochester territory.

Second, hardware, house furnishings and electrical goods took steady strides from the first. Automobile accessories and radio supplies have sold beyond the total anticipated.

"We have established ourselves in twelve months, and by far the great bulk of this 'establishing' is due to

our newspaper advertising," Mr. Smith stated recently.

"We could easily have taken things in slower fashion and spent less money. But we wanted to get ourselves quickly entrenched in our potential trading area. It is for this sole reason that we spent three to four times what a firm would normally spend in opening a new store.

"It is my experience that there is

no advertising like that to be had by the use of a good newspaper. People read newspapers where they won't read direct mail and other literature. If a merchant really has something to offer the public, he would do well to use the newspapers consistently.
