SHOWER FOR BRIDE-ELECT

On Saturday evening Mrs. Thomas P. Owens and Miss Mary Lizzie Owens surprised Miss Lena Copeland, after taking her for a ride and returning to find a number of guests awaiting to greet her. Miss Copeland was ushered into the living room which was beautifully decorated in white Madonna lilies, to find Albert Dewey Owens waiting to announce that someone wished to see the "bride-to-be." Little Misses Helen Stewart, Jeanne Copeland and Virginia Weir, dressed as colored washerwomen, entered carrying large baskets filled with miscellaneous gifts. The guests were later invited into the dining room, which was decorated in pink and white, and were served block cream, which carried out the color scheme. The guests were the Epworth Leaguers of Broad Street Methodist church and a few close friends of the honor guest.

Hints for the Home

by Nancy Hart

Are you afflicted with a dead-white bathroom in these days when everyone else is having gay, colorful tiled baths with smart touches of black in the fixtures?

Grieve not—for you can easily transform your dull room by using colored linens and accessories and a clever treatment for the walls.

Fancy a cloud-blue papered wall spattered with silver stars, woodwork in the same blue, with thin voile curtains of palest pink and a bath mat in French blue and coral.

Or picture on the wall above the bath picture a decorative panel of paper—perhaps a sea-gull or gold-fish motif—on a ground of pale sea-green paper; accessories showing a subtle touch of black.

You can waterproof almost any paper, you know, by hanging it as usual and when dry, applying two coats of ordinary glue size. When thoroughly dry, paint with two coats of white waterproof varnish, and you'll have a glazed surface that may be washed with soap and water.

Vocational Class Visits Clemson

By Robert Steer, Clinton Hi Student

A trip was planned to go to Clemson college, Friday, April 26. The agriculture classes of Laurens, Hickory Tavern and Gray Court went with our agriculture class. Three cars were used to take our class. Arriving at Clemson about 11 o'clock, we went out to the poultry farm where Mr. Rogers, who was in charge of the poultry, showed us through one of the laying houses and explained to us how the hens were trapped and how they kept the records. We were then showed through the brooder house and Mr. Rogers showed us the kind of incubators used and all about them. We also saw the brooder houses where the chickens were raised. Three breeds of chickens were kept, white leghorns, Rhode Island reds, and barred Plymouth rocks.

From the poultry farm we went to the dairy building where Mr. Goodale showed us through the laboratories and showed us how milk and cream was tested, cooled and pasteurized. He also showed us their equipment used in making and storing ice cream.

After leaving the dairy building, we went to the dairy barn where Mr. LeMaster showed us their stock and dairy equipment. We also saw the calves and young heifers. Three breeds of cattle were kept, Jerseys, Holsteins, and Guernseys.

From the dairy barn we went to get our dinner. Shortly after dinner, a generous supply of ice cream and cakes was served us by the college. After looking around the buildings and Y. M. C. A. building, we went to the hog barn where we saw the hogs. They kept Berkshires and Poland China hogs. They had some good show stock which had taken many prizes at both national and state shows.

After visiting the hog barn, we went to see the sheep. We were shown the points to consider in judging sheep, the characteristics of the breed and type of animals. Hampshires and Southdown sheep were kept.

After leaving the sheep barn, we saw a baseball game between Clemson and Erskine which Clemson won by a score of 3 to 0.

When the game was over, we returned home, having enjoyed an interesting day.

P. C. Students Give To Fund

A campaign among the students of Presbyterian college is now being waged with gratifying results. Several thousand dollars have already been subscribed and the campaign is yet incomplete. The amount contributed by the students will be applied to the college's debt liquidating fund.

SOUTH CAROLINA POTATOS LEAD

State Assumes Dominant Position In Shipments. Peak Movement Expected From May 22 to 25.

Charleston, May 20.—South Carolina has now assumed the dominant position in shipments of new potatoes, the crop being estimated at 3,400 to 4,000 cars, of which 422 had been shipped through May 15, United States department of agriculture statistics reveal.

The peak movement is expected from May 22 to May 25, with heavy shipments until June 1, and a straggling movement as late as June 15. During the week of May 16 to 22, it is estimated that South Carolina will ship approximately 70 per cent of the country's total supply of new potatoes. Alabama will ship approximately 15 per cent of the movement and the balance of the crop will originate mostly in Louisiana, Texas and Georgia. North Carolina will begin shipping new potatoes by May 27, with a general movement beginning June 5th.

The peak movement of new potatoes in the southern portion of Louisiana is already past, with about 100 cars still to be shipped from that section, of which possibly 75 will move from May 16 to May 22. In the central portion of the state there are about 200 cars remaining, of which 75 may move from May 16 to May 22. In the northern portion of state it is estimated that the crop will total about 100 cars, shipments beginning in about a week. Heavy rains during the past few days have been holding up shipments of new potatoes from the Eagle Lake, Wharton, Sugar Land and San An-

tonio districts of Texas. Movement from that state is not expected to be very heavy during the next week. Alabama reached its first peak movement on May 8, with its second peak on May 16, and a fairly even volume of shipments is expected for the next week.
