IT'S A GREAT TIRE

Rugged — fine appearing — generously over-sized! That's the new Goodyear, and it wears as well as it looks.

Every bit of material used in those big, sturdy tires is carefully selected and thoroughly tested. The rubber is blended to obtain the standard uniform toughness of Goodyear treads and sidewalls. All materials must meet Goodyear's rigid standards. Goodyear experts measure for fine quality every bale of cotton used in Goodyear mills. Again when the cotton leaves the mill as Goodyear Supertwist Cord, it is tested. All through its building each tire is tested—inspected—watched—to assure high quality.

No wonder Goodyear Tires are GOOD.

We'd like you to see these tires. You'll appreciate their value. You'll appreciate their low cost.
