

SARGON IS NOW  
ON SALE HERE

Sadler-Owens Pharmacy Secures Exclusive 5-Year Franchise for New and Celebrated Scientific Formula.

Local citizens who have heard of the amazing results which have been accomplished by Sargon will be interested in the important announcement that this new and scientific formula can now be obtained in this city.

Manufacturers of this revolutionary medicine have followed out the policy of selecting outstanding firms as exclusive agents in every city where it has been introduced. Leading druggists everywhere have acclaimed it as a triumph in the field of modern chemistry and have been eager to be among the first to supply it to their trade.

"Never before in the history of the world has the progress of Medical Science been so rapid. One important discovery after another has been made which will have a far-reaching effect upon the health and well-being of mankind. Some of these discoveries are startling in the extreme and absolutely disprove many of the beliefs, practices and theories we have known for a life-time.

As scientific investigators learn more and more about the human anatomy, the practice of medicine changes—the old is discarded for the new.

As a result of this world-wide medical research, Science has learned that good health is largely governed and maintained by three vital organs and fluids of the body.

What is more important, we have learned that these organs and fluids can often be aided and strengthened by certain basic elements.

Having knowledge of these important discoveries, one of America's leading bio-chemists succeeded, after two and one-half years of laboratory research, in combining many of these basic elements in one formula—which may well be considered one of the greatest health-sustaining remedies of the age.

It is called Sargon. This formula and the formula for Sargon Soft Mass Pills, which are an essential and integral part of the treatment, are the property of the Sargon Laboratories and can be obtained by no other firm or individual in the world.

This new scientific treatment, which represents much of our latest knowledge on modern therapy, has been acclaimed by druggists throughout America as a triumph in the field of pharmaceutical chemistry.

With the needs of their customers uppermost in their minds, leading druggists everywhere have been eager to be among the first to supply it to their trade.

The exclusive agency for Sargon and Sargon Soft Mass Pills for this city and section has been awarded to the Sadler-Owens Pharmacy.—Adv.

Hints  
for the  
Home  
by Nancy Hart

Who has not had the disappointment of tuning-in, anticipating a long evening at the radio, only to find "tube trouble" had mysteriously introduced itself?

One regrettable feature of the old-style tubes has always been their fragility. If you have ever examined them carefully you have doubtless found the almost invisible wires arranged much like those in an electric light bulb—a construction so delicate that a very slight jar could cause damage to the tiny elements attached to the two-pillar center brace.

Now the screen grid tube made by one company has met this difficulty by using a four-pillar tube with the tiny supporting wires anchored at the top by a stiff mica plate. This holds the elements rigidly in place, so that they cannot be distorted by the jolts and jars of shipment or by necessary handling.

Another nice improvement is what might be called "two-unit construction"—whereby the power plant is mounted on a separate stage from the remaining tubes so that in case of trouble the one unit can be demounted and serviced independently of the others.

**For Sunday Dinner**  
Cream of salsify soup  
Roast stuffed shoulder of pork  
Candied sweet potatoes and apples  
Spanish corn Endive salad  
Coffee sponge with cream

**Creamed Corned Beef**  
In two tablespoons of butter soften a tablespoon of minced onion; add two cups white sauce; season with celery, salt and paprika, and a teaspoon of minced parsley. When perfectly blended, add 1 1-2 cups diced cooked corned beef; heat thoroughly and serve with baked potato.

**Hungarian Soup**  
Boil a large chicken in 3 quarts of water; season with salt, sage and pepper; add 1 onion chopped and cooked until tender. Remove chicken, chop it fine, then add to soup with the yolks of 3 well-beaten eggs. When very hot, sprinkle with chopped parsley. Serve at once.

**Longer Life for Brooms**  
Whisks and brooms will last twice as long if first "tempered" by immersion in soapsuds to toughen the fibre. Dip in suds, rinse well, shake and hang up to dry. Repeat every week or ten days.

CENSUS TAKERS  
MUST KEEP MUM

Hundred Thousand Enumerators in May Will be Sworn to Secrecy.

Washington.—The entire army of 100,000 census enumerators who will start taking the 1930 census next May 1 will be sworn to secrecy.

William M. Stewart, census bureau director, let it be known the oath of office for enumerators will contain a provision that each must preserve the secrecy of information secured. A heavy penalty is provided for violating this provision.

"Do not be afraid or have the slightest hesitation in answering enumerator's questions frankly, without bashfulness or mental reservation," Stewart said. "All information obtained will be held confidential."

100,000 to Take Census.

"The taking of the census next May promises now to proceed smoothly. Fortunately, it will not be accompanied by such scenes as were witnessed in Turkey, when Turks imprisoned the entire population in their houses on the day of the census."

The census bureau has tentatively established enumeration districts for the taking of the census and is now making plans to employ 100,000 enumerators to work in the districts, taking a census of population, farms, mines, irrigation, and drainage projects, and unemployment.

One month, starting May 1, 1930, is allotted Stewart to complete this tremendous task. The first population census took 13 months to count a little less than 4,000,000, while the 1930 census will enumerate about 120,000,000.

"The population of the United States is increasing at the rate of about 1,400,000 persons a year, or approximately one person every 28 seconds," Stewart said. "The total increase is made up of the annual excess of births over deaths, which amounts to about 1,150,000, and the excess of immigration over emigration, which totals about 240,000 annually."

Counters Must Work Quickly.

"History records no other instance in which the population has increased so rapidly. By 1930 the population will be more than 30 times as great as it was in 1790 and nearly twice what it was in 1890, only 40 years ago."

Stewart said each enumerator will have about 1,800 persons to tabulate. The counters must work quickly and accurately. They will receive about \$75 to \$100 each for their work.

For the first time in history the country will have an accurate count of the unemployed. At present those out of work are estimated between 1,000,000 and 4,000,000.

Officials estimated the census next year would tabulate a population of about 120,000,000 people, about 6,250,000 farms, 14,000 mines and quarries and more than 100,000 irrigation and draining projects.

Conduct Trial of Deaf Mute With Pen, Paper

Monticello, N. Y. — The judge couldn't talk with his fingers and the prisoner, a deaf mute, could talk no other way. So it was decided to conduct the trial of Joseph Botrich, charged with theft here recently, in writing.

Botrich read the charges and scribbled: "I know. I did it."  
"Why?" wrote the judge.  
"Needed money," the mute answered. When the penalty was made known to him, the prisoner hastily indicated: "I'll give everything back."  
"Don't do this kind of thing again," was the magistrate's next inscription. "Never," Botrich spelled out.  
"Sentence suspended," wrote the judge, closing the case.

Drydock Traps Salmon

Bremerton, Wash. — The government's giant drydock at the Puget Sound navy yard here proved an efficient fish seine recently. When the gates were closed, after admitting the cableship Dellwood, and the water receded, the basin was left full of salmon which had entered it while seeking the mouth of a spawning stream.

New Woe for Flappers

Dodge City, Kan. — A new type of grasshopper plague has reached Kansas. Young women return from motor trips with holes in their stockings which they attribute to the big hoppers that fly into the cars.

Green Cement Lawn Ends His Troubles

Vancouver, Wash. — The lawn cutting problem has been solved here by Edgar M. Swan, who has abolished the mower, eliminated sprinkling, fears no weeds, and spends his time as he chooses without fear of the grass looking shaggy.

For two years Swan labored in vain to raise a crop of grass upon his gravelly front yard soil, into which he poured water copiously and uselessly. Then he hired a cement mixer, poured a smooth slab over his entire front yard and painted it green.

Home Demonstration Notes

Miss Mary Shaw Gilliam, Agent

Conservation of the Motto In Laurens County

Conserve your surplus from the summer garden and orchard for the scarcity of the winter months. This is the way the farm women in Laurens county are meeting the problem of well-balanced meals the year round. A recent report made by the home demonstration agent shows that 86 club members in this county canned this year 7,520 quarts of fruits and vegetables, 1,361 quarts of jelly and preserves, and 1,126 quarts of pickle. This may seem a very large amount for some of us but it is not enough to meet the demands of a well-balanced diet of two fruits and three vegetables every day unless each of these families has a good year-round garden.

Other interesting reports from these members includes 375 quarts of meat canned and 14,376 pounds of meat cured. Next year it is hoped that even these number will be greatly increased.

Mrs. Harriet F. Johnson Visits the County

During the past week, five of the seven 4-H clubs recently organized in the county had the privilege of hearing Mrs. Harriet Johnson, state girl's club leader from Winthrop college. This was Mrs. Johnson's first visit to Laurens county and she was delighted to know of seven new clubs with a total enrollment of 162 girls joining the ranks of the 4-H club organization, the largest for farm boys and girls in the United States.

On Monday Mrs. Johnson met with the clubs at Hickory Tavern and New Prospect. At these meetings she discussed the meaning of 4-H club work, the membership of the organization and the great advantage it offers to the farm boys and girls of today. A part of her time was given to the project in room improvement which has been selected by all the clubs as their major work for the coming year.

On Tuesday Mrs. Johnson met with the clubs at Lanford, Barksdale-Nannie and Mountville. She discussed the same topics with these girls as with the others. The entire attendance for the two days at the five meetings was 129, giving an average of 26 members to each club.

New Home Demonstration Club Organized

Miss Gilliam, home demonstration agent, was called to the Wadsworth community Thursday afternoon to assist in the organization of a home

COPELAND-STONE LOCALS

New shipment of Friendly Five and Portage Oxfords, in tan, blue and black leathers—in latest Collegiate Styles.

Special for Saturday—one lot of Men's Neckties at 35c each, or three for \$1.00.
