ROAD MEETING HERE TUESDAY

Continued from page one) way associations along the Calhoun highway, State Route 7, Savannah river to Chester, and State Route 9, Chester to the North Carolina line above Chesterfield, and to Dillon in the direction of Wilmington, to unitedly press the importance of this great northeastern by southwestern route upon the attention of the State Highway department, and

Be it resolved that we call the attention of the State Highway department to the strategic value of this route as serving intensively a very large portion of the state of South Carolina, and as constituting the most important through route from Washington to Atlanta and the southwest; as also from Wilmington to Atlanta and the southwest; and

Be it resolved that we request the State Highway department to pave this route from the North Carolina line to the Georgia line, to meet paving contemplated by the State Highway department of Georgia and by citizens along the Calhoun highway between the Savannah river and Atlanta; and to meet paving already provided in North Carolina north of Dillon to Wilmington, and north of Chesterfield to Raleigh and Washington; and that we ask the State Highway department to secure recognition of this route by the federal government as a United State route; and

Be it resolved that we call the attention of the State Highway department to the fact that many very expensive bridges have been built on this route, particularly over the Savannah, Saluda, Tyger, Broad, Catawba and Lynches rivers, as well as over many minor streams; and that we urgently recommend that first class bridges be erected along this route at all streams not now provided with double track, re-inforced concrete and heavy steel bridges; and

Be it resolved that this convention apply to the State Highway department for a hearing on this general subject at some early date convenient to the department, and that the towns and cities and counties along the route be invited to send representatives to appear before the State Highway department to present in detail the importance of this route being developed as a through inter-state route, so designated by federal authorities, and not only hard-surfaced, but completely bridged with first-class bridges at all streams; and that this convention solicit a hearing at the regular meeting of the South Carolina Highway department for the month of December, 1929.
