### The Cheraw Chronicle

Will be glad to publish any articles concerning the betterment of our town or surrounding country. Also news matter of any kind gladly received.

In 1884 the most powerful twelve-inch gun was a muzzle loader, twelve calibres in length weighing about 23.5 tons. Its charge of powder weighed eighty-five pounds, the muzzle velocity of the 614-pound projectile was 1,800 feet per second, and it could perforate sixteen inches of wrought iron armor at the muzzle, or 8 inches at the maximum range of 6,000 yards. The 12-inch gun of the present is a breech-loader, 50 calibres long. Its projectile weighs 850 pounds, the muzzle velocity is 3,000 feet per sec.; its perforative power is fifty-two inches of wrought iron at the muzzle, thirty-seven at 6,000 yds., and 17.5 at 24,000 yards.

The "safety match" bill introduced in the senate, has been killed.

## 3 Bales of Cotton Per Acre

Mr. John B. Broadwell averaged three bales of cotton per acre on his entire crop by using fertilizers at the rate of 1,000 pounds per acre. You should be able to do as well as Mr. Broadwell

## By Using Virginia-Carolina Fertilizers

### Some Questions Asked, Who Will Answer?

What do the parents of Chesterfield know about the educational life and progress of their children? How many of the parents visit the graded schools and to see how the work is carried on and to encourage the teachers? How often do the trustees go there? Is there a visiting committee?

Any well-regulated school is glad to see visitors, provided the visitors do not come "on a lark" or out of idle curiosity. Any teacher who is doing faithful and efficient work will be helped in that work by the visit of an intelligent and well-meaning man or woman.

There is no surer way to find out what the schools are doing than to see them at work—and at play; for the way the children behave on the playground and on the streets to and from school is also a good indication of the kind of training they are getting. Parents get reports from teachers monthly. These reports mean something, of course; and it ought to be a source of pride to a parent when the child brings home marks of 90 and a hundred. But, after all, marks are only relative. The important thing is the school's standard and whether it is living up to its standard. Cheraw is spending a great deal of money on its public schools. Is she getting the worth of it?

A negro in Greenville county will spend five years in the penitentiary or on the chain-gang for a cup of buttermilk. He broke into the house of Mr. Ashmore, of that county, but got nothing but the milk; and then the circuit gave him five years for house-breaking and larceny. But Garlington, who fleeced citizens of South Carolina out of about \$55,000, gets only three years, and Young, his "handy man," gets only one year. Such is life! Poor negro!

The post office department has issued instructions to R. F. D. carriers to the effect that they will not be required to deliver mail boxes. Patrons should, therefore, enclose coins in an envelope, or wrap them securely in a piece of paper, so that they can be easily and quickly taken from the box.

### Profitable Change.

A well known conjurer one day visited a Scotch village. After performing many astonishing tricks he asked for a halfpenny, which a collier lent him. The conjurer then said he would turn it into a sovereign. He did so, as the people thought, and handed it around for them to see. When it reached the collier he coolly pocketed it and said to the astonished conjurer, "Will ye change me another?"—London Mail.
