It has long been thought by ordinary folks that one of the principal missions of our State Department is to keep us on friendly terms with other nations of the world, thus making for peace and friendly commercial intercourse of a profitable sort. Representative Yates of Illinois, son of the famous war governor, Lincoln's friend has vigorous opinions on the success of the administration along these lines. Remember that Yates is a Republican. The President is reported to be getting ready to remove Commission Blair, of the Bureau of Internal Revenue. Blair is trying to run the Bureau properly, and he can hardly do this if he removes the hundreds of experts trained under the last administration, during which period the work of the Bureau increased with tremendous strides, but the President feels that he has to yield to the thousands of importunities for jobs for the smaller political leaders by putting into Blair's place a man who will use the ax on the experts and put in the inexperienced fellows who voted on the Harding side in 1920. Of course the work of the Bureau and the interests Si the people will suffer, but The New Store is opening a branch looking forward to its sessions with these are secondary considerations; thepolitical machine has to be kept up.
