

LET US GIN FOR YOU

The farmer expects a fine turnout and sample when he gins his cotton. It takes a modern and up-to-date ginnery to do high grade ginning. To meet this situation we have installed the most modern ginnery to be found in this section of South Carolina. Your business will be appreciated.

We will always pay the top price for cottonseed.

Welding

... the best way to make a perfect union of two pieces of metal is by welding them together.

... and the best way to get a more pleasing flavor and a better taste in a cigarette is by welding together the different types of tobacco ...

That is just what we do in making CHESTERFIELD Cigarettes—the three types of mild ripe home-grown tobaccos, that is tobaccos grown in this country, are welded together. Then they are welded with aromatic Turkish.

When these tobaccos are welded together you get a combined flavor which is entirely different from any one type of tobacco.

It is this welding of the right amounts of the right kind of tobaccos that makes CHESTERFIELD a milder and better-tasting cigarette.

Chesterfield ... the cigarette that's MILDER
Chesterfield ... the cigarette that TASTES BETTER
