WEDNESDAY. OCTOBER 25, 1922

Anyone owning land in Union county, particularly rolling land, land disfigured by gullies, could utilize almost every acre by sowing clover. It is the easiest thing in the world to grow. It requires almost no effort to get it going. Mr. J. F. McLure has done on his Hillcrest farm what many others should do-develop a fine clover pasture. He says all you have to do is to scatter the seed. He does not prepare the land. There is no plowing, no harrowing, nothing save the scattering of the seed. He uses a mower to cut the weeds when they threaten to choke the clover, but that is all. This county could be made a leading county in dairy cattle farming if the growing of clover should become general. There is an almost limitless outlet in this direction. We have been too busy raising cotton and wearing rags that we just will not see even the most pronounced signs pointing to a better way. Now that the price of cotton is better, our farmers are already planning to niont the earth in cotton. Of course only a half crop, if that, will be gathered next year. The crop this year will not exceed a half of the normal crop, or so most observers think. Next year the outlook is even worse. This should lead our farmers to plant a small acreage to cotton and to seek other ways out of the wilderness. They are in the wilderness, in up to their eyes. If they do not change their methods they will never get out. If there is anything easier than going out in the fields and scattering clover seed we cannot think of it My

ronowing the unverling within C. The work casy. If you need seed you can get al! you want . farmer who desires further informa- we must do if possible." tion. It will pay the farmer who does not already know about these matters to talk with him. He will, we feel sure, take pleasure in showing you the actual results of his efforts. This year he is taking in many additional acres. It helps sometimes for a man to see with his own eyes. has certainly gotten results, as may be seen in the splendid dairy prod vets that come from his farm. And, by the way, few people realize that he has one of the best equipped, best managed dairy farms in the state.

General Wood Backs Athletics

Manila, P. I., Oct. 23.-Expressing his approval of athletic sports in general and wrestling and boxing in particular, Governor General Leonard Wood has announced he hoped every city and town in the Philippine Is lands would be combed in search of a

strong team to compete in the Far

Eastern games at Osaka, Japan, next

"I believe in clean sport and ath letic training," said Governor General Wood. "Sound athletic training makes better men physically, cultivates the spirit of fairplay and the idea of give and take. It increases a man's selfconfidence, and builds up a physical ondition in order to attain which there must be an observance of selfrestraint, good habits and sound moral principles. All-around athletic training ssould be built up in the Philippines in every possible way, especially in the schools. I wish very boy in the islands knew how to box, and to wrestle, and to do both well. They would be better citizens. rale, the self-confidence of a manthat is engendered by boxing, wrest-

of incalculable value in any crisis of "With reference to the Far Eastern games to be held in Osaka next year, we ought to search every city, every municipality and every barrio in the Philippines for good material. There is no reason why there should not be and there is every reason where there should be a trial in all the schools, beginning with the university and high schools to pick out boys who have special qualifications and who promise to make good material to be worked on and developed with a view

> Civil Authority Given To Church Officials

Vladivostok, Siberia, Oct. 24 .- The object of the government in ordering all persons in the Primoria to register in the church communities to which they belong or leave the country was Mr. McLure sows mixed clover. He to establish a government of priests parish communities. All kivil auhority will be handed over to the hurch community of each district, which will appoint its own executive council. Members of the church community who do not attend the meetings of their church are liable to fines amounting to 25 rubles gold and to expulsion. The decision of the executive council of the church is subect to the approval of the governor of the district.

This project has aroused the derision of the public and the priest is hailed as the "civil governor." Up to the present the one means of self expression left to th epeasant and the villagers is through their Zemst. os. These institutions were semiofficial in the reign of the Czar and although some of the members of the remstvos were elected by the vote of the peasants the organization in it-

self was an official one. After the revolution the Zemstvos oards became a purely political mahine consisting largely of social rev olutionists. They were a formidable enemy during the dictatorship of Ad miral Koychak. In order to do away with this evil the present dictator has evolved this plan of local self-government. It is the first time in the his ory of the district that the peasant eally has had the righ of self-ex-

Irish Premices Assistants Are Young Men

Dhlin, Oct. 29.—The provision der the Free State constitution that ministers directing important departments shall not be members of parliament has a strated opportunity of appointment of the process o pointing to such posts men of ability irrespective of their political popular-

Notable among the members of the provisional government today are Kevin O'Higgins, Minister for Home Affairs, who was rather a storm center in the late Dail. Today he is con-ciliatory in temped and very 'ucid and persuasive in explanation. He is a young man well under 30, a grand-son of T. D. Sellivan, a veteran in the old Paraell movement, and a rephew of T. M. Healy, one of the foremost Irish members in the West-minster Parliament.

Mr. O'Higgins was trained for the Tanlas is sold by Union Ding Store. law. He was a solicitor's apprentice, serving his time in the office of Maurice Healy, former member of parliament of Cork, but his intervention in the Sinn Poin movement and con-Control Locusts sequent arrest by the police prevented his actual entrance into the legal pro-fession. He is now at the head of all unobtrusive labor of two Philadelphia scientists during recent years in the the law, judge and police, in Ireland and his competence for his job is fully realm of locusts, grasshopers, and ence for his job is fully A NICE four room cottage on Sardis katydids may save the United States millions of dollars, in the future. It recognized.

Next in importance is Ernest Blythe, now Minister for local governs demonstrated each year in the Near ment and in charge of all the publi ordes, large enough to darken the administrative bodies in Ireland, bo'n municipal and rural. He also was in sky for hours, to rise out of nowhere jail, and during the Sinn Fein regime and eat to the ground thousands of miles of harvest. This has happened was minister of trade. He is very young; comes from the six county area, and apeaks English with a strong Ulster accent. He is a capaeven in the United States, and a recurrence is what the scientists are tle debater, and frequently deputed to state the views of the government of Sciences, this city, and Morgan to the house

Patrick O'Hogan, a young solicitor whose father was a chief official of the Irish Land Commission and whose uncle, Monsigner Hogan, was president of St. Patrick's College, Maynooth, administers the Agricultural Hebard, research associate, returned recently from a tour of Southwest United States in the course of which cust specimens. Mr. Rehm declared that they are now approaching the end of the survey they set them-Department.

These three young men are Mr. Cosgrave's chief assistants. They all share fully the common sense attitude which has marked his conduct since he became prime minister. That attitude is firmer and less yielding than the parliament was accustomed to from either Mr. Griffith or Mr. Coilins. His marked is fixed and decisions. lins. His purpose is fixed and de-clared. He arris being led into spec. ulative debat, and resists all suggestions to "ake it unanimous," unless unanimity means frank acceptance of the cition he is maintain-

\$100 000,000. The great value of the expeditions fostered by the academy is that they place at the disposal of agricultural stations in this country and elsewhere definite information of the habits, geographical preference, and data on the conditions which fewer their development.

Power Shows Growth

Tokio, Oct. 22.-Power produced by hydro-electric plants in Japan continue to show steady growth. The generating power recorded an in-crease of 40,000 kilowatts during the store of well corelated data, readily first half of last year over the corresponding period of the preceding year, and an increase of 81,000 kilowatts during the first half of the current year over the corresponding

period of the preceding year.

This growth of generating power is chiefly due to the development of hydro-electric enterprises. The offi-cial returns recently published put the increase of the capital last year at 94,000,000 pen and this year at 144,-006,000 yen. The number of companies, however, records quite a limited growth. This fact is due to the amalgamation of minor concerns. The Tokio Electric Light company has registered an increase of its capital in consequence of amalgamation by something like 54,000,000 yeu during the first half of the current year.
