L. E. STUBBS: Bennettsville, S. C. Oct. 18, 1837, 29:ti.

ABOUT TO BE PUBLISHED. BY S. J. CASSELS. PROVIDENCE, AND OTHER POEMS. HE Posm, Providence, will be in nine books regularly arranged, and containing exhibi-tions of special Divine Interpositions in human affairs. The other poems are a collection of fugitive pieces, written on different subjects and at different times. The work will contain about 200 pages, duodecime, and will be issued in the course of this year. It is to be printed on ane paper, and published by Gairran and Ponsa, ma-con. It will appear in different styles of binding and cost from \$1,25 to \$3,00, according to th

character of the binding.

As it is one of the first efforts in our southern country in this kind of liberty labor, and may therefore, have some tendency to awaken minds better harmonized by nature to song, and as the auther would, if the dare, entertain some san! guine hope that its perusal, will not disappoi expectation; and as he always has been, and as ways expects, to be, poor-on these accounts, he HE Subscriber has resumed the FACTOR. ways expects, to be, poor—on these accounts, he AGE and COMISSION BUSINESS, and would humble solicit the patronage of his frien. and the public, to this little poetic adventurert And to those who may attempt to secure a circu. Mr. Hardin once sold hay from

A number of Prospectuses having been sen-during the year to different individuals, the wri ter would respectfully request such, if souvenient to transmit the result to him, either by mail to Macon, or by private conveyance to Syned at Augusta. He would olso request any other friend who can procure ten subscribers to address him on the subject at Macon, by the first of middle of November.

It is with a blush, Mr. Editor, that a candidate fer authorship, has thus to do, both himself and the public, the injustice to beg patronage for an unknown liberary work. But, hew such a result is to be avoided, and publish at all, is what he cannot discover. There is no great metropolis among us, where a book may be devoured in a day-and, where to put a new work in the Bookseiler office, and in a libreary, are nearly identic al. People here are scattered, and their appetite for literary food is not very strong; sepecially I presume, it domestic. Under all these disadvantages however and many more I some-

A blushing, unknown, upstart Bard, To meet my fate, or sent or bard. SAML. J. CASSELS

A Circular prepared by direction of the Charles-ton Bible Society
CHARLESTON, May 1807.
Sir:—The Managers of the Charleston Bible Society, have appointed the und raigned, a conmittee to prepare and send forth a Cercular, invi-ting the several Bible Societies in the State to unite with them by their delegates, in a Convention, to be held at Columbia, on Tessday the 3th

PROPOSED BIBLE CONVENTION.

December 1837. The objects to be secured by such a Convention, are to ascertain what has been done in this State for the last four or five years in giving circulation to the Bible; what facts may be collected, which will throw light upon our yet re-maining destitutions; whether it is expedient, en gage simultaneously in Tesupplying the States, with the Word of Life upon a plan similar to that which was agreed upon in Columbia, several years ago; and if so, by what means and by what agencies the plan can be most fully and theroughly, and jediciously carried into effect, so that our entire reading population, have free access to copies of the Holy Scriptures in their own possession. And finally to deliberate upon any other subject connected with the diffusion of the Bible, whether at home or abroad, in

Christian or in heathen lande The general fact is known, that districts o country, which have been thoroughly supplied r have contained many destitute familie. and what is true of one district is true

hof all e rest, as the same causes operate to create the want, vis: the formation of new families. of the Bibles themselves: In most cases whe ra re supply has been wadertaken, after an interval of four or five years, the destitution has been found full half as great as at the period of the original supply, and in some cases greater, from the causes already easigned. We allude to this fact because it was one of the principal metives which induced the Managers of the Charleston

Bible Society to propose a convention.

The Committee regard it as superfluous to urge the subject upon your consideration by any fur-ther remarks, as all the reasons for a Convention, which we could submit, must be farmiliar to your mind. All that we have so solicit, is, that you would call the attention of your society to the proposition, that should they deem it expedient, lelegates may be appointed to represent your So.

we have the honor to subscribe ourselves, in name, and by the appointment of the Managers of the Charleston Bible Society your fellow porers in the Bible cause.

B. MANLY, B. GILDERSLEEVE. AGRICULTURAL.

LEACHED ASHES AS A MANURE. Leached or drawn ashes possess a highly beneficial effect, particularly when applied to lands different n calcareous matters, as lime or marl. They serve to improve the permanent texture of such soils. The askes from the soap boileres of London yield 90 pounds in 100 of calcareous matter.

They serve to free light lands of sorre! other variety.

As an evidence of his superior powers in the perpetuation of his species, we would state, that he is the sire of Nancy Thompson and Hampton, calves now owned by Mr. George Beltzhoover, Nancy Thompson, was calved in March last, and now weighs 527 lbs. Hampton was calved 4th May last, and now weighs 380 lbs. Indeed all the calves of Montezuma, which we have seen, are remarkable for their extraordinary size and fine points:

A short forned Durham bull calf, 3 months old got by Neptune, he by Orozmbo out of a full dispersion to are dispersion.

Durham heifer, 2 years old, the dam of hands. and in swampy soils they effectually desirny

cous matter, as a top dressing for kind of grass. Soap boiler's ashae, cellent on a peat moss, strong cold wils when applied in the quantity of two or three cart-loads an acre. In Lancashire, they have been found good and durable on dry pastures, and have also been successfully used in o her parts, and various proportions.

They are generally considered better for pastures than arable, and crops of clover hay have been more than doubled by them.

GRAZING.

The effect of this manure is, that it destroys bugs and vermio of every kind.—

Albany Cultivator.

We doubt not that much land in the middle and lower tracts of the Carolinas which is now deemed of little valuemight by proper management and the selection of proper grasses, be rendered highly valuable for grazing.

The following instances of profitable gra zing farms we copy from an article in the Tennessee Farmer.

Wm. Hardin, deceased, of Davidson country, sowed a timothy meadow, shout 12 or 13 years ago. He grazed in the the win er, and none in the summer. A respessable gentleman informed me that he had as many as fifty mules upon that meadow at a ime. Guessing at the amount, I suppose the meadow contains not more than ten or twelve acres, I am informed ther lation, to the work, he promises, if no other com amount of \$1100 in one acason. It sawit of atton, at least a roll's graduage, in May last, and it was as fine as when-

first saw it about seven years ago. Mr. Daniel Safferans, of Gallatin, has four acres of timothy meadow, about 12 years old, from which he sold the present year's crop, delivered on the spot to Mr.

Lewis, for \$270. John Gordon, of this county has a licrdsgrass meadow about six years old, which he supposes to yield between four and five tons to the acre; and says that he would not rent it for \$30 per acre.

The following statement was written to

me by Rev. John, W. Bowen, Smith John McMinn, Esq. 5 miles south of Stateville, Wilson country, has a Timothy Meadow, which he sowed in 1800, and has moved every season since. It contains about three and a half acres. Lihas made hay enough to feed all his stock for twenty-eight years, which never consisted of less than five borses and fifteen cattle. and sometimes he had deable that pumber of each. Squire McMinn has always grazed it in August and Sountember with his stock; and during the winter and spring, until the first of April, his sheep (generally about 15,) have always grased constantly. He assured the writer, met April, that he would not now take \$60 rent

for his little me adow. Respectfully, J. W. BOWEN."

Mr. Henry L. Moores, who saw this

Meadew, in company with Mr. Bowen, conveyed his idea of it to me, by saying: when I saw it, I was at once remi of the best meadows of Kentucky."

Esq. Sewell of Wilson County, has a

herds grass meadon, which yielded over four tons to the acre in 1886. These specimens are equal to the meadows of Great Britain, which has been recently sending hay to the U: States for sale. In fact, Professer Law, of Edinburg, supposes their meadows to average less than two ons per aere. But I must stop to give

room for a letter from mr. Hughe of Kon-

Fayette County, Ky., June 16, 1887. Dear Sir-I received, a few days since. from Wm. P. Hume, Esq. of Bourbon County, a note requesting me to inform you of the number of acres of land in my farm ; what quantity I have in pasture ; how many hands I work ; and what have been my annual profits for the last two years. My farm contains between 18 and 1900 acres. I cultivate about 200 in com. about 20 in meadow, about 100 in whose and rve; and the balance is in posture. I work 10 hands. My farm is what we call here a grazing form. I buy, graze, and feed about 300 cattle amounty, raise and sell about 200 hogs. My profits on cattle, hogs and other articles sold off my farm in 1835, were \$9,945 00 ; in 1836, \$10,478 00.

I would take pleasure in communication to you at any time, any information I in presession of on this subject,

Yours respectfully, JACOB HUGHE
