## FARM, GARDEN AND HOUSEHOLD.

## COWPER'S MALADY,

"From the age of twenty-three," re-

### How John Johnston Applies Manure and Grows Corn.

John Johnston of Geneva, N. Y. (now eighty-seven years old), is acknowledged marks Cowper, in a letter to Lady Hesto be the most successful, common sense, keth. "I was occupied, or ought to have practical farmer in the United States, been occupied, in the study of the law. We notice that the Elmira (N. Y.) Hus- At the age of eighteen, being tolerably bandman has an account of a late visit well furnished with grammatical knowl-to this venerable farmer. The farm, on edge, I was taken from Westminster which he has lived since 1821, was pur- school, and, having spent about nine chased soon after reaching this country months at home, was sent to acquire the from Scotland, and the land at the time practice of an aftorney." It was at this was not thought to be valuable, as the time, it seems, that he became acquaint-crops that grew on it were light. "But ed with Thurlow, who afterward became it was fortunate for me," said Mr. John- lord chancellor of England, and who, in ston, "that I had learned in the old coun- that capacity, more than once bullied try the value of manure, and how to ap- George the Third and his youthful prime ply it. It was fortunate also that I minister (Pitt) after a fashion the most understood the advantage of draining, for extraordinary. Well, it was with Mr. I soon found that was the first great want Chapman, a solicitor in London, that of my farm. I sent to Scotland for Cowper was placed; and in the same samples of tiles and had them made here. office young Thurlow had become a stu-My improvements, through draining, soon dent about the same time. The conjuncattracted great attention. I drained my tion, to say the least of it, was a remarkfarm as rapidly as I could meet the ex- able one-we can scarcely, indeed, conpense, and applied all the manure I could ceive of one more so-and the descripmake. I grew splendid crops of wheat tion Cowper affords to Lady Hesketh of and corn. Corn I found was a very pro- the doings between himself and the emfitable crop. The stalks make excellent bryo chancellor are quite as amusing as feed for animals. My wife always they are remarkable. It appears Cowper thought she could make better butter took no pains whatever to qualify himfrom cows fed on stalks than from those self for practice in his profession (his kept on hay. I wintered a good deal of poetical faculty was already becoming stock, feeding up my stalks, hav and troublesome), which sufficiently explains grain, and working my large product of the ominous speech he addressed to young straw into manure. The best crop of Thurlow on one occasion of their taking tea wheat I ever raised was forty-two and a together at the house of the lady above half bushels per acre on sixty-four acres; mentioned. "Thurlow," remarked Cowbut I have several times raised an aver- per, "I am nobody, and shall always be age of forty bushels. I aimed to have nobody, and you will be chancellor. You my land kept clean and rich, and always shall provide for me when you are." Thurto use pure seed. My rule is to apply lowsmiled and replied: "I will." "These manure several months before it is plow- | ladies," said Cowper, "are witnesses." ed under. I pile my manure in the The future chancellor still smiled, and spring, and in the fall I spread it on such said: "Let it be so, for I certainly will do land as I intend to plow for corn the fol- it." By this time, obviously, Cowper's lowing spring. One great object I have constitutional malady begun to manifest in piling my manure, is to destroy all itself, and he was becoming "good for weed seeds. If the manure is handled nothing" in the estimation of himself enough, all seeds will be destroyed. I and the world. Thurlow, on the other have raised 187 bushels of ears of corn hand, forcibly reminds us of the Irishto the acre (equal to ninety-three and a man's horse, "Botherum," whose owner, half bushels shelled corn). This was a in the exuberance of his pride (though little more than an average, although I Botherum was finally distanced in the have had large crops all the time. I race), could not help exclaiming: "Bothplant my corn in drills three feet four erum forever-see how he drives them inches apart getting as near as possible five kernels to a foot. I have not plant-spondent Cowper-and estimating himed in hills for thirty years. A good hand self in comparison with his friend Thurwill plant seven acres a day with a drill, low as a being of no account whateverand the yield of corn will be larger and continued to feel more feeble, while the stalks vastly better. The last time Thurlow, by sheer force of talent, reachthe corn is plowed, a skillful workman ed the highest position in the realm. He will turn a furrow so closely upon the was hurled from that position eventualrow, as to perfectly cover up and smother | ly, and though his name is inscribed on any weeds which may appear.' REMARKS.-It must be remembered distinguished men it is more than likely

that the kind of corn grown in New York | that a not far distant posterity will be State is the small kind, and hence the rows of corn can be placed nearer to- per (who in his own estimation, was a gether than it would be proper to place them where the larger varieties of corn body"), what will that same distant are raised.

## Farm Notes.

course the writer can never know, but he Subsoiling, like surface plowing, should be done for every crop. Clover can well conceive that when centuries roots are a good subsoiling agent, they will have elapsed and when Thurlow's can well conceive that when centuries mellow and enrich the ground, and give name will have been forgotten that of it porosity.

To eradicate quack roots, plow twice membrance. -- Woonsocket Patriot.

## "Good for Nothing but a Poet" -- A Reminiscence.

Centennial Battle of the Revolution Graphically Described-Fighting Parson Allen-General Stark's Famous Address. Burgoyne and his confident army had marched down from Quebec, compelled early in July, 1777, the evacuation of Ticonderoga, acknowledged to be the key to New England and New York, and was proceeding to unite with Sir William Howe on the lower Hudson, and thus cut off from the rest of the colonies and capture and subjugate this whole eastern country. All this would have been accomplished but for the defeats at Bennington and in the Mohawk valley, end-

BATTLE OF BENNINGTON.

account of the battle, which occurred one hundred years ago on the fifteenth of August. He says: Saturday, the day of the eventful conflict, is said to have been a rarely perfect day, with nature fresh washed and dewily fragrant. General Stark got his 1,600 men-the New Hampshire militia, Green Mountain boys and Berkshire farmers, all fresh from the hay field-early in motion, but did not commence the attack until the middle of the after-Parson Allen, of Pittsfield, is said to have begun the day by a prayer of inspiration, asking the God of battles gan and the Pacific, and he lived to see to "teach their hands to war and their fingers to fight," and it is at this time that General Stark is said to have made the following famous address to the Berkshire soldiers:

"Boys, there are the red coats, and they are ours, or this night Molly Stark sleeps a widow."

The militiamen went stealing behind Baum, the Hessian commander, in their shirt sleeves, mistaken by him, 'tis said, for the loyalists of the region seeking the protection of his lines. Stark was nearing the Tory hill on the front, ready to open fire, when slender, youthful of the Lord to desist from giving battle to the American forces. That they replied with bullets so justly incensed the man of God that he borrowed the gun of his brother, Lieutenant Joseph Allen. and fired the first return shot of the battle. The attack of the American forces in the rear of Baum's camp quickly followed, and General Stark officially says: I pushed forward the remainder with all speed; our people behaved with the greatest spirit and courage imaginable. Had they been Alexanders or Charleses. of Sweden, they could not have behaved better." The Yankee farmers stripped for the fight, and, enraged at encountering their Tory neighbors, soon made the intrenchments too hot for the loyalists, and the poor wretches, attempting to scale the steep and slippery height to the main camp, were shot down remorselessly. The Indians fled early in the battle, and the Americans advanced like veterans against the terrible fire of the Hessians, "mounting the breastworks that were well fortified and defended with cannon." "It was the hottest fight," said Stark, "I ever saw in my of thunder"-two hours of it, before horrors of the more terrible flame that great interest.

## A Representative American.

The New York Times, in noticing the recent death of William B. Ogden in New York, has this to say concerning the wind and running sea about forty miles deceased:

The life of William B. Ogden, which closed at High Bridge yesterday, not only covers a large portion of American history, but has been closely identified with some of the most important industrial developments of the last half century. Born at the beginning of Jefferson's second term, he reached man's estate the boatswain, also a Mongol, violently when John Quincy Adams was President of the United States. He was buying afraid of fire. He has been burned out land at and near the present site of Chicago when the place of the future city when that steamer was burned off the Saratoga. A writer in the New York was marked only by Fort Dearborn and Chinese coast, about two years ago. He Herald gives an interesting and graphic a few huts, and when the land which has for years made it his habit to have bears some of the costliest buildings of the hose placed on the deck every night the metropolis of the West could be had at eight o'clock. Rushing forward, he for a few dollars an acre. His observing found that the ship was indeed on fire. eye took in the future development of The captain was instantly notified, and the great Northwest while as yet the In- Hart, seizing an ax, chopped a hole in dian paddled his canoe on Lake Michi- the hatch, and called for a small-sized gan, and the traveler had to pass through volunteer. A Chinaman sprang forward, the villages of populous tribes of red and Hart ordered him to take the hose men to penetrate into Wisconsin or to and go below to extinguish the fire. The reach the banks of the Mississippi. He almond-eyed tar bound a wet towel over looked over the Western country with the perceptive faculty of a trained man and Hart, who is a large man, enof business when there were little more larged the aperture and followed. gan and the Pacific, and he lived to see him like monkeys, and the pumps

before planting, and the roots will be so cut up that an ordinary horse will have no difficulty in pulling the cultivator, without a rider to keep it down.

chards, to eat the wormy apples and the worms therein. If the orchards are too wherever she goes, and nothing prettier large for the number of hogs kept, sheep than the mouse-colored and milk-white are turned in. If we will all unite in this system, we shall soon see its good den chairs by the royal children, Leopold results. There is no doubt about its and Beatrice. A dozen or more superb being effective.

To prevent saddle-galls, the saddle should be lined with some smooth, hard to Ascot, and two fine horses-one light substance. Flannel or woolen cloth is bay, the other chestnut-occupied small bad. A hard, finished, smooth rawhide stables by themselves, and were named lining, similar to those of the military saddles, is preferable. Then, if the saddle is properly fitted to the horse's back. there will be no galls unless the horse is very hardly used. Galls should be wash- dered. ed with soap and water, and then with a solution of three grains of copperas or blue vitriol to one tablespoonful of water, which will harden the surface, and help to restore the growth of the skin. White fitness. There is not a particle of dishairs growing upon galled spots cannot play, only the names of the horses being be prevented.

The Norwegian method of making hay is as follows : The grass, when cut, is hung up on poles to dry, where it re-mains until the wind and sun cure it. from smell and as neat as a well-kept parlor. One of the queen's horses is The sun does not burn it; on the contrary, it is as bright and green as when growing. In some fields strings of fences are seen, bearing thin loads of hay, several rods in length. Some farmers plant posts in the fields twelve feet apart, and in the upper part of these posts pegs are inserted about one foot asunder. On these pegs poles are laid, and on them the grass is hung, where it remains until it is thoroughly cured. The result is the very best of hay.

## Household Hints.

Lard or butter to be used for pastry should be as hard as possible. If left on the ice for a while before using the pastry will be lighter and better. It needs only to be cut through the flour with a chopping knife, not rubbed.

A tablespoonful of ground horse rad-

to a pailful of hot water. Spread the corset on the washboard, and scrub with a clean brush and a very little soap. Bleach in the sun if yellow, but do not boil. Rub in starch, and when dry sprinkle thoroughly and iron while damp.

A rough towel or a piece of flannel is Postmaster James soon after issued his better to wash the face with than a famous order. They finally reached the sponge. The roughness cleanses the young man. Adrianople.

Adrianople, which lies in the way o the Russian advance to Constantinople, is situated at the confluence of the Tundja, the Maritza and the Arda, and is about one hundred and thirty-five is the most elevated monument in the miles distant from the Turkish capital.

Its population has been variously estimated at from 80,000 to 140,000 inhabitants. According to the most trustworthy accounts, about half of these are Turks, 30,000 Bulgarians and Greeks, and the remainder Jews and Armenians. Adrianople was taken by the Turks

from the Greek emperors in 1362, and was made the capitol of the Turkish empire, remaining so until Constanti-nople was seized in 1453. It is at present virtually an open town. The

old part is surrounded by a wall, and the Russian army is the manner in which contains a citadel; but these are now the several regiments and brigades of a useless as defenses. Recently more division are distinguished from one modern works have been constructed by the Turks, but these are only of a field, The dress of the infantry of the line conor at the most of a provisional type.
