### AGAIN URGES NO GLUT IN CHICKEN WORK

The United States Department of Agriculture again advises farmers to sell their hens gradually and not to glut the market immediately after April 20, when the restriction against sale of hens is removed. Hens should be sold gradually. This will stabilize the market and bring better prices for them. It also will mean more eggs. Every laying hen at this season produces eggs at far less cost for feed than during the winter.

### THE GREAT WAR HAS MADE CIGARETTES A NECESSITY.

"Our boys must have their smokes. Send them cigarettes!" This is a familiar appeal now to all of us.

Among those most in demand is the now famous "toasted" cigarette—LUCKY STRIKE. Thousands of this favorite brand have been shipped to France. There is something homelike and friendly to the boys in the sight of the familiar green packages with the red circle.

This homelike, appetizing quality of the LUCKY STRIKE cigarette is largely due to the fact that the Burley tobacco used in making it has been toasted. "It's toasted" was the "slogan" that made a great success of LUCKY STRIKE in less than a year. Now the American Tobacco Co. is making 15 million LUCKY STRIKE Cigarettes a day.

A good part of this immense production is making its way across the water to cheer our boys.

## Cattle relish the sweet odor of wet Buckeye Hulls

BUCKEYE HULLS, after being wetted down for ten or twelve hours, acquire a taste or odor similar to the succulent ensilage odor that cattle like so well. Simply feed

## BUCKEYE HULLS

properly and your stock will like them better than any other roughage. Once they are accustomed to them, they will not be satisfied with anything else.

There is every reason why your cattle should relish Buckeye Hulls. They are all roughage; no lint that is worthless as forage; no dirt, trash or dust.

### Other Advantages

Buckeye Hulls cost much less per ton than old style hulls. They take less space in the barn. Buckeye Hulls allow better assimilation of other food. They are sacked—easy to handle. Every pound goes farther. They mix well, when wet, with other forage.

Mr. L. R. Farmer, Louisville, Ga., says: that he has used no other hulls but Buckeye for the past year and gets good results. Cows have not been bothered with cough since using Buckeye Hulls.

To secure the best results and to develop the ensilage odor, wet the hulls thoroughly twelve hours before feeding. It is easy to do this by wetting them down night and morning for the next feeding. If at any time this cannot be done, wet down at least thirty minutes. If you prefer to feed the hulls dry, use only half as much by bulk as of old style hulls.

### Book of Mixed Feeds Free

Gives the right formula for every combination of feeds used in the South. Tells how much to feed for maintenance, for milk, for fattening, for work. Describes Buckeye Hulls and gives directions for using them properly. Send for your copy to the nearest mill.
