WOMAN'S NERVES MADE STRONG

By Lydia E. Pinkham's
Vegetable Compound.

Winona, Minn.—"I suffered for more
than a year from nervousness, and was
so bad I could not
rest at night—
would lie awake and
get so nervous I
would have to get
up and walk around
and in the morning
would be all tired
out. I read about
Lydia E. Pinkham's
Vegetable Compound
and thought I
would try it. My
nervousness soon
left me. I sleep
well and feel fine in the morning and
able to do my work. I gladly recom-
mend Lydia E. Pinkham's Vegetable
Compound to make weak nerves
strong."—Mrs. ALBERT SULTZ, 603
Olmsted St., Winona, Minn.

How often do we hear the expression
among women, "I am so nervous, I can-
not sleep," or "it seems as though I
should fly." Such women should profit
by Mrs. Sultz's experience and give
this famous root and herb remedy,
Lydia E. Pinkham's Vegetable Compound,
a trial.

For forty years it has been overcom-
ing such serious conditions as displac-
ements, inflammation, ulceration, irreg-
ularities, periodic pains, backache, diz-
ziness, and nervous prostration of
women, and is now considered the stan-
dard remedy for such ailments.

ing bees and gathers quite a lot of
fine honey. He is gradually improv-
ing and each year adding to his stock
and if he meets with no misfortune
in a few years he will have an apiary
to be proud of.

FARMERS SHOULD NOT HOLD WHEAT FOR SEEDING

Columbia, May 18—So great has
become the European demand for
flour that the Food Administration is
urging farmers not to hold wheat for
seeding their next crop except in a
few states where the period of har-
vesting winter wheat overlaps the
period of planting.

While it has been the practice in
many communities for farmers to
hold over wheat for seed, the Food
Administration regards it as unnec-
essary. It is almost beyond belief
that in any part of the country the
yield from the next harvest will be
insufficient to meet all seed require-
ments for the succeeding crop. It
has never failed in the past; there is
no reason to believe it will now. In
some sections conditions are such that
it would be practically impossible to
put in a successful crop except with
seed that had been held over from
the previous year. The Food Admin-
istration recognizes these conditions,
however, and applies its requests
only to those sections where the only
reason for holding over wheat would
be to protect against the possibility
of failure of the crop now growing—
a contingency which at present seems
very remote.

Even should there be local crop
failures, it would be entirely feasi-
ble to ship in from other sections seed
that is known to be adapted to con-
ditions in the afflicted communities.

Never before has there been such
urgent need for wheat, every car
load, every bushel and every grain
that can possibly leave the farm may
within the next few months play an
important part in our war program.
Throughout the country millions of
people are cutting their consumption
to the barest minimum, many of them
going entirely without wheat. The
release of thousands of bushels ordina-
rily held for seed would do much to
relieve the present situation and to
insure exportation conditions.

At the present rate of consump-
tion each bushel would provide bread
for at least one soldier in Europe will
the next harvest relieves the necessity
for such individual sacrifice at home.
And with every indication of bumper
crops the wheat seed can easily be
thrown on the market.
