POISON FOR BOLL WEEVILS.

Clemson College, Sept. 29.—Though the boll weevil injury in some counties is heavy this year, it must not be forgotten, says Prof. A. F. Conradi, of the Entomology Division, that the weevil has not yet developed his full force in

any part of the state. Tremendous efforts are being made, meanwhile, by the Federal Government and by the State Crop Pest Commission to work out a poisoning system of efficiency and economy, which it is hoped may be of much service another year.

But the Commission urges that it is necessary for farmers to obtain ac-

so do mice, once they eat RAT-SNAP. And they leave no odor behind. Don't take our word for it—try a package. Cats and dogs won't touch it. Rats pass up all food to get RAT-SNAP. Three sizes.

25c. size (1 cake) enough for Pantry, Kitchen, or Cellar.

50c. size (2 cakes) for Chicken House, coops, or small buildings.

\$1.00 size (5 cakes) enough for all farm and out-buildings, storage buildings, or factory buildings.

curate information before attempting any poisoning work. Full instructions should be obtained in regard to arsenate of lime and dusting guns, or there will be severe disappointments. A campaign is now being organized for work with planters in the Coastal and Savannah River counties. The pro-

gress of this work will be frequently announced as the work goes on in these counties during the fall and winter.

Many a man who knows his own mind has a somewhat limited acquaintance.

There were two plates of cake on the table and the hostess asked Arthur which he preferred chocolate or coconut. "Oh, I'm not particular like some folks is," said the little chap; "an' so I'll just have a piece of each kind."
