In Which He Shows the Tendency

Excuse Brilliant Faults. In this discourse Dr. Talmage shows that there is a tendency to excuse brilliant faults because they are brilliant, when the same law of right and wrong ought to be applied to high places and low; text, Daniel iv, 33, "The same hour was the thing fulfilled upon Nebuchadnezzar, and he was driven from men and did eat grass as exen."

Here is the mightiest of the Babylonish kings. Look at him. He did more for the grandeur of the capital than did all his predecessors or successors. Hanging gardens, reservoirs, aqueducts, pal-aces, all of his own planning. The bricks that are brought up today from the ruins of Babylon have his name on them, "Nebuchadnızzar, son of Nabo polassor, kirg of Babylona" He was a great conqueror. He stretched forth his spear toward a nation, and it surrender. But he plundered the temple of the true God. He lifted an idol, Bel Mercdach, and compelled the people to bow down before it, and if they refused they must go through the redhot furnace or be crunched by lion or lion ess. So God pulled him down.

He was smitten with what physicians call lycanthropy and fancied that he was a wild beast, and he went out and pas-tured amid the cattle. God did not excuse him because he had committed the sin in high places or because the trausgression was wide resounding. He meas ured Nebuchadnezzar in high places just as he would measure the humblest cap-

But in our time, you know as well as I, that there is a disposition to put a halo around iniguity if it is committed in conspicuous place and if it is wide re bounding and of large proportions. Ever and r non there has been an epidemic of crime in high places, and there is not a state or city and hardly a village which has not been called to look upon as-tounding forgery or an absconding bank cashier or president or the wasting of trust fund or swindling mortgages. I propose in carrying out the suggestion of my text, as far as I can, to scatter the fascinations around iniquity and show you that sin is sin and wrong is wrong whether in high place or low place and that it will be dealt with by that God who dealt with impalaced Nebuchadnezzar.

All who preach feel that two kinds of sermons are neccessary, the one on the faith of the gospel, the other en the morality of the gospel, and the one is just as important as the other, for you know that in this land today there are hundreds of men hiding behind the communion tables and in churches of Jesus Christ who have no business to be there as professors of religion. They expect to be all right with God, although they are all wrong with man. And, while I want you to understand that by the deeds of the law no flesh living can be justified and a mere honest life cannot enter us into heaven. I want you as plainly to understand that unless the life is right the heart is not right Grace in the heart and grace in the life; so we must preach sometimes the faith of the gospel and sometimes the morality of

Now, look abroad and see the fascinations that are thrown around different styles of crime. The question that every man and woman has been asked has been, Should crime be excused because it is on a large scale? Is in:quity guilty and to be pursued of the law in proportion as it is on a small scale? Shall we have the penitentiary for the man who steals an overcoat from a hatrack and all Canada for a man to range in if he have robbed the public of mil-

Look upon all the fascinations thrown around fraud in this country. You know for years men have been made neroes of and pictorialized and in various ways presented to the public as though some times they were worthy of admiration it they have scattered the funds of banks or swallowed great estates that did not belong to them. Our young men have been dazed with this quick accumulation. They have said: 'That's the way to do it. What's the use of our plodding on with small wages or insignificant salary when we may go into business life and with some stratagem achieve such a fortune as that man has achieved?" A different measure has been applied to the crime of Wall street from that which has been applied to the spoils which the man carries up Rat

So a peddler came down from New England many years ago, took hold of the money market of New York, flaunted his abominations in the sight of all the people, defied public morals every and said: "He was a peddler in one decade, and in the next decade he is habits as good as when you left your one of the monarchs of the stock mar father's house? Have you a pool ticket ket. That's the way to do it." To this day the evil influence of that profligate has been felt, and within the past few weeks he has had conspicuous imita-

There has been an irresistible impression going abroad among young men that the poorest way to get money is to earn it. The young man of flaunting cravat says to the young man of humble apparel: "What, you only get \$1,800 a year? Why, that wouldn't keep me in pin money. I spend \$5,000 a year." 'Where do you get it?" asks the plain young man. 'Oh, stocks, enterprises -all that sort of thing, you know.' The plain young man has hardly enough money to pay his board and has to wear clothes after they are out of fashion and deny himself all luxuries. After sches to call them back. awhile he gets tired of his plodding, and he goes to the man who has achiev-

It is quite a long road sometimes for them out and sweeps them off forever.

A man to travel before he gets into the Oh, come back! The one farthest away romance of crime. Those are caught who are only in the prosaic stage of it. If the sheriff and constables would only leave them alone a little while, they would steal as well as anybody. They might not be able to steal a whole railroad, but they could master a load of

pig iron.
Now, I always thank God when I such a wreck it can never be gathered up again. I want it to become so sterch that honest young men will take warning. If God should put into money or its representative the capacities and succession of the state of the ty to go to its lawful owner, there would not be a bank or a safety deposit in the Inited States whose walls would not be blown out and mortgages would rip and parebments would rend and gold would shoot and beggars would get on horseback and stock gamblers would go to the almshouse.

So there has been a great deal of fas cination thrown around libertinista Secrety is vary severe upon the impurity that lurks around the alleys and low haunts of the town. The law pursues it, smites it, incarcerates it, tries to destroy it. You know as well as I that society becomes lenient in proportion as impurity becomes affluent or is in clevat d circles, and finally society is silent or disposed to palliate. Where is the judge, the jury, the police officer that dare arraign the wealthy libertine? He walks the streets, he rides the parks, he flaunts his iniquity in the eyes of the pure. The hag of unlean-ness looks out of the tapestried window. Where is the law that dares take the brazen wretches and put their faces in an iron frame of a state prison window?

Sometimes it seems to me as if scciety were going back to the state of morals of Herculaneam, when it sculptured its vileness on pillars and temple wall and nothing but the lava of a corn in a few counties, on the 14th. burning mountain could hide the imearthquake; but a holy God I do not think will stand it much longer. I believe the thunderbolts are hissing hot and that when God comes to chastise which he has uttered himself more bit terly than against any other, the fate of Sodom and Gomorrah will be tolermodern society, which knew better, but did worse.

Society is alert for certain kinds of nurder. If a citizen going along the road at night is waylaid and slain by a robber, we all want the villain arrested and executed. For all garroting, for all beating out of life by a club or an ax or a sluog shot, the law has quick spring and heavy stroke, but you know that when men get silluent and high position and they avenge their wrongs by taking the lives of others, great sympathy is excited, lawers plead, ladies weep, judge halts, jury is bribed and the mar goes free. If the verdict happen to be against him, a new trial is called on through some technicality, and they adjourn for witnesses that never come, and adjourn and adjourn until the community has forgotten all about it, and then the prison door opens and the mur-

erer goes free Now, if capital punishment be right, say let the life of the polished murderer go with the life of the vulgar assassin. Let us have no partiality of gallows, no aristocracy of electrocution chair. Do not let us float back to parbarism, when every man was his own judge, jury and executioner, and that man had the supremacy who had the strongest arm and the quickest step and the stealthiest revenge. He who willfully and in hatred takes the life of another is a murderer, I care not what the provocation or the circumstances. He may be cleared by an enthusiastic courtroom, he may be sent by the goverament of the United States as minister to some foreign court, or modern literature may polish the crime until it looks like heroism; but in the sight of God murder is murder, and the judg-

Nor should we forget the common people's absolute faith in alcoholic liquors and tobacco as remedies for snake bite.

Dr. James Evans informs the writer, who records it as a curious fact which will doubtlessly interest many, that the poison of our rattlesnakes has been found to be the efficient and most reliable antidote to the poi on of the cobra. For the bite of the rattlesnake in localities naturally infested, there grows a plant vulgarly named ratilesuake master which indicates the purpose of its existence by a flower bearing the shape of a rattlesnake's opened mouth, with fangs ready to strike. A tea is made of the entire plant and given freely to the unfortunate sufferer.

A PREVENTATIVE OF HYDROPHOBIA. But this prolonged prologue must eme to an end that we may give earnest heed to a proposed plan, a suggested possibility, of a world wide proventive of hyd ophobia. The subject matter of the proposed preventive will prove to be an exemplification, but of the most extraordinary kind, of the often quoted, but oftener forgot and seldom practiced maxim: An ounce of prevention is worth a pound of cure. Not to delay longer, in plain words it is credibly declared that a dog can be sterilized by an easy and almost painless surgical operation, so that never a germ of hpdrophobia will be bred in his body.
