VEGETABLE PANACEA.

T HE subscriber informs the public, that he has just completed the mixture of this valuable mc-dicine. He takes pleasure in stating that he has made use of this PANACEA, successfully in a case of Scrofula, which he has been afflicted with more than THREE years. On several occasions he applied to practical Physicians for aid, (North and South.) and received no 'senefit. He was, at length, prevailed upon by numerous acquaintances, to try the virtue of certain ROOTS and HERBS; and believing, that the Receipt would greatly benefit him, he took it, together with an old French Receipt: from which is manufactured the VEGETABLE PANA-CEA.

It is proper here to sav, that the quality of some, or ALL the principal Roots, are well known to the Medical Faculty, by whom they are frequently used. For Scroula or King's Evil, Ulcerated Sores, general diseases of the BLOOD, or the effects of Mercury; it has a decided salutary effect. For BOWEL COMPLAINT he would also recommend the use of the VEGET ABLE PANACEA. Chil-dren are frequently attacked with this complaint

dren are frequently attacked with this complaint : especially when teething. A few doses of the PAN-ACEA will check the Bowels, and they become regular again. It has been tried by a great number of respectable individuals, and pronounced a "certain cure." He has tried it at different times in his own family, and it relieved the child immediately.

This Medicine is simple in its operations; and has

pleasant taste. Give it a trial, and judge its worth. The subscriber will keep a constant supply of the PANACEA at the different Drog Stores throughout the United States. made double, they reduce labor, and gin jus double, the quantity of cotton over the single cylin-der Gin, no other knd having been in use prevous to this patent; and whether single or double, they are found to improve the quality of the cotton, by more perfectly cleaning it. They can be made to contain from 20 to 160 saws in a stand, and whether small or large, one hand will be sufficient to attend them. The Gins have mechanical feeders and hoppers attached to them, which free the cotton from leaves, trash, dirt, &c. before it can reach the saws, and by the thorough hackling operation it receives from the feeders, which make two revo-lutions to one of the saws, it is almost in a half gined state, before it descends to the saw By a very simple arrangement of a screw to each set of gaates, on which the hoppers rest. a d through which the teeth of the feeders pass, they can be made to teed slow or fast to suit the condition of the cotton at the time. When made double, the saws are placed on two sets of cylinders and turn upon each other in opposite directions, and are cleansed by two sets of brushes that have four revo lutions to one of twe saw. The two cylinders can

be detached so as to enable the planter to run one or both at pleasure, although embraced with feeders. &c. in one stand. The whole is put in operation with a drum and band, as in the ordinary Gin, and may be propelled by horse, steam, or water power It may also be propelled by iron running gear. The force required to work it, is about the same as that necessary to move an equal number of saws in the common Gin. This Gin has been put in operation in New Orleans for two or three weeks, and its success tested in the presence of a large number of planters, mcrchants and others, and received their general approbation. Desaussure, will give their undivided and entire attention to any business which may be committed to our care. and is about 18 or 20 years of age. The owner is from the common Gins in use, and that it saves requested to come forward, prove property, pay considerably in labor. Respectfully, &c.

E. D. WHITE. From Mr J. Compton, a wealthy pl nter, resident in the Parish of Rapide, Louisiana.

Dr. Jones-Dear Sir. I have examined your Patent Cotton Gin, with feeders, &c. And have

seen it in operation, and approve of it so highly, that I have taken the liberty of ordering one for my plantation in time for the next crop. Yours respectfully, J. COMPTON. New ( rleans, F b. 28, 1837.

From Mr. A. Longer, an experienced and eminent

Cotton Broker of Yew Orleans.

\$6 50 per saw, For do. of 40 saws, with feeders, &c. at 300,00 \$6 75 per saw, For do. of 20 saws, with feeders, &c. at 300,00

\$750 per saw, 150 000 Extra teeth where desired, for feeders, supplied at 40 cents each; the number of teeth being about equal to the number of saws. One set of feeders, it is considered however, will wear out two or three sets of saws Extra saws supplied at 80 cents each. The Gins ordered will be delivered to the agents, of planters in any of the sea port towns of the cotton planting States, at the above prices, the agents paying the treight on the same from New York, and becoming responsible for the amount of the Gin.

It is desirable, when planters give orders for Gins, they should accompany them with their views in regard to the arrangement of saws, breasts, brushes. &c. It is found they differ in opinion. Some desire saws of larger diameter than others. The most common size is 9 or 10 inches; but some wish them 12 inches. Some wish 5 or 6 rows of brushes on an axle, while others do not want more than 4 at most. Some wish saws with 8 or 9 teeth to the inch. while others want 10 or 11. With so much discrepancy, we prefer they should, at the time of giving orders, turnish a statement of their wishes, and the manufacturerers can fulfil them in every particular. Where it is left to our discretion, we shall make them on the most modern and approved plan. An order can be executed, from the time it is received, in the space of eight or nine weeks, and the Gin in that time placed in the hands of the factor. To be in time for the next crop, all orders ought to be in the hands of the manufacturers by the first or middle of May; except for plantations

Oration--Price 12 1-2 cents.
