In Defence of the State Dispen-

Says It's Much Harder to Keep Porty County Dispensaries Pure Than

One State Disp nsary, and Indulges in some Plain Talk.

Certain L gi-lators.

Senator B. R. Tillman fired the first gun in this campaign in defence of the State Dispensary on Saturday at Sandy Flats in Greenville County. He was greeted by a large and enthusiastic crowo, and as usual the Senator presented his views with clearness and force. He does not believe in County, Dispensaries and gives his reasons He outlines his ideas as to how the State Dispensary can be run honestly and pays his respects to the members of the Legislature who rethe dispensary at the last session. We print below the full text of the Senator's speech, and we feel sure it will

be read with interest: There is but one important issue involved in this campaign so far as State affairs go, and as for my own candidacy it rests on the record which knowledge which the people of the State have of my character, personality and qualifications. I am willing to leave it there without discussion or presentation. The fight is State no one expects the prohibition candidates, however worthy and weil quallited they may be, to receive very much support. With all their efforts (and they have been many and long conor Governor who advocates local option straight as against dispensary and prohibition, and only in Charlesoption offered the people is between annus prohibition and county dispensary chose and the whole sight is to destroy the product State dispensary first with no other the at ards and therefore cannot en purpose than to then obtain the prive ter in advance and even lege of reopening the old barrooms should the Governor, which is inconander the new guise of liquor store ceival e, be willing to select a board

times distinctly demand one. In any event some counties wil tigers and heavy jug trade by express. Other counties will vote for county the county dispensaries turned into icensed barrooms if the county diss to restore the sa'e of liquor to private individuals rather than let it remain in the hands of state efficials. Priose who caror for courty dispensaries instead of one State Dispensary must demons rate how it is easier to prevent corruption among the thirty or forty county boards than to stop it in one State Board. I have great faith in the good common sense of the people and do not believe they can be persuaded to destroy the State Dis pensary and leave each county to purchase and selents own I quor. Yet The State and The News and Courier which have aiways Lated the Dispensarv

'Worse than the devil hates holy wa-

The only possibly good reason that can be advanced on this line is that the prohibition counties under the constitution refrom the sale of hquor in the other counties. This is unjust as everyone must acknowledge, but it can be remedied very easily by having the State Dispensary make no profits other than a few thousand dollars above its running expenses, thus leaving the counties and the towns to divide the profits between them. This can be easily done and when we consider the extitles and paying local freights on It instead of buying carload lots and paying through freights the county dispensary cannot stand the c mpari son. The issue between private control and control by state chidals must hinge at last on the question of whether or not the people of South Carolina shall determine that we can not find honest men enough to carry on the dispensary system and devise laws to make those who are dishonest afraid. I say we can. I do not believe that every man who handles whiskey must become a thief. I be lieve that the people only need to see and know that the dispensary system can be reformed and cleansed of corruption to make them stand by it.

I will proceed to give the plan which appears to me after a great deal of thought and consideration of suggestions from very many sources to be the best. We will begin on the coun

County Dispensers should be elected in the Lemocratic primary the same as other officers. The County Board fused to vote for measures to reform should be composed of the Mayor of the town in which a dispensary is lo cated, the Supervisor of the County, who is the business agent of the county, and one man appointed by the Governor, The County Dispenser should be removable by the Governor for causa. The conditions in the dispensary now are directly traceable to the of the liquor trade that has hurt blundering and neglect of the legislature. That body placed the State Dispensary in the hands of three politicians, elected without consideration to fitness, experience or character, threw no restrictions whatever around the administration, left the door wide open, limited the salary to \$400 and now we see the result. I have always said and believed it was designedly done to destroy it. Polities and not deness have most always controlled the legislative elections, but no amount of salary alone would cure the evil of which we complain. The original Board was composed

of the Governor, Attorney General our highest State officials elected by the people, but the vital mistake was in not making strict rules and regula tions for the purchase of whiskey. I'ne enemies of the Dispensary declare that it is inherently victous and that it cannot be purified. This cry is inlicative that those who thus concend practically confess that they have lost all faith in the honesty of man or of the ability of men to give themselves just and honest government. I for one do not believe that all of the honest men are dead. The people are disgusted and they have a right to be, but the one orime which they should not forgive is the failure of the last legislature to change the law so as to prevent any further stealing and to whiskey and minimizing the evils inseparable from its sale and use. The enemics of the Dispensary were bent on killing it and the combination of political and other influences in the House having failed in that, compelled the election of a new Board because they refused to change the law and continued all of the old and proven evils. It was the most glaring bearayal of the people's interests that I have ever known respectable white men to be guilty of, and while many of them are my friends, at least politically, 1 take the responsibility to say that very man who refused to put safeguards around the purchase of whiskey and change the system of mangement in the last legislature ought to be left at home. ## AN IMPORTANT ACT.

A NEW LAW AFFECTING BLIND TIGERS IN THIS STATE.

Revenue Licenses Can Hereafter be Used Against Them in the State Courts.

The Columbia Record says collector Micah Jenkins of the internal revenue office at Columbia has received from the treasury department at Washington a copy of a very important act By Parker and Robertson in the Dispenpassed by the recent congress that will affect the testimony given by prosecutors in blind tiger cases. It should be explained that all or nearly all, blind tigers secure a retail l'quor license from the government before they attempt to violate the State dispensary

The government would not permit the book containing the list of licenses to be exhibited in the State courts, holding that the government had exclusive jurisdiction over the government books and also holding that govand the Comptroller General, three of ernment officials should not be allowed to testify in the State courts concerning the licenses issued. As a result State officials in States or counties where the sale of whiskey was prohibited, could never obtain prima facie evidence from the government that would be admitted in any court. Some of the congressman from the western states, however, got together and had the following act passed: "That chapter three of the revised

statues of the Unfeed States be and nereby is amended in section 3,240 so

as to read: "Each collector of internal revenue shall, under regulations by the comand keep conspic ously in his office, for restore the dispensary system to its of all parsons who shall have paid original purpose, that of controlling special taxes in his district, and shall state thereon the time, place and business for which such special taxes shall have been paid, and upon application of any prosecuting officer of any State, county or municipality he shall furnish a certified copy thereof as of a public record for which a fee of one dollar for each hundred words or fraction thereof in the copy or copies requested shall be charged.

This means that the State officials nere interested in the suppression of the blind tigers may obtain from the collector of internal revenue certified copies of all those who have obtained government liceases and that as they practically contain the seal of the government may be introduced in any court in the State and thus become an instrument for conviction of the law breaker. Mr. Wm. H. Lyles, a prominent awyer of Columbia, appeared before the dispensary investigating committee while it was in session last week and made the following statement:

"Just as I came in on the train, a paper was handed me by William Lanahan with the request that I make the statement to the committee that they would be glad to have any of their matters investigated shortly. Inat they had expected same to be investigated, but the subcommittee while in Baltimore had not called upon them and they would be glad to nake any showing that was wanted."

Mr. Lyon made the following exdanation why Lanahan & Sons were not investigated:

"I would like to explain why the subcommittee did not call on Lanamissioner of internal revenue, place nan & Sons. The list of creditors that we had that had been furnished public inspection, an alphabetical list Senator Christensen at Columbia had Lanahan & Sons down for \$600. I knew that \$600 was no inducement to Lanahan, and it was reported to us that he said he would prefer to lose that then submit to an investigation. We have heard since that time that ais claims were somewhere between \$10,000 and \$12,000-that the statement furnished us was not correct. I telephoned Mr. Tatum this morning to send it up, and I presume he will

send it up some time this evening." Mr. R. H. Welch, another lawyer, who was present, arose and made the following statement:

' I wish to introduce the affidavit of Mr. Lanahan in the matter of the cestimony of Lewis W. Parker and E. W. Robertson. I wish to introduce it as a part of the record. I cannot produce Mr. Lahahan and this is the best I can do. Affidavits have been accepted under similar circumstances before and I do not see how it can be refused."

I, will be remembered that Mr. Parker testified to Mr. Lanahan's onwill not be long before this kind of the dissatisfaction with conditions at evidence will be used in the State the State dispensary, as Lanahan had thousands of do lars invested in South Carolina. Personally came before me S. J. Lanahan who, upon oath, deposes and says that with reference to the testimony of Mr. Lewis W. Parker before the dispensary investigating committee at Columbia, S. O., on the 6th day of June, 1906, he makes the following statements:

Mr. L. W. Boykin was employed by the firm of William Lanahan & Son as a salesman, but this was months prior to his election as a member of the board of directors of the State dispensary; that Mr. Boykin had severed his connection with said firm as said salesman and otherwise about a year before his said election. While Mr. Boykin was in our employ as said salesman he was paid a salary, of course, but this salary ceased the moment he severed his connection with the firm as salesman.
