

ASPIRIN FOR COLDS

Name "Bayer" is on Genuine Aspirin—say Bayer

Insist on "Bayer Tablets of Aspirin" in a "Bayer package," containing proper directions for Colds, Pain, Headache, Neuralgia, Lumbago, and Rheumatism.

MR. DODSON WARNS USERS OF CALOMEL

Says Drug Acts Like Dynamite on Liver and You Lose a Day's Work.

There's no reason why a person should take sickening, salivating calomel when a few cents buys a large bottle of Dodson's Liver Tone—a perfect substitute for calomel.

It is a pleasant, vegetable liquid which will start your liver just as surely as calomel, but it doesn't make you sick and can not salivate.

Children and grown folks can take Dodson's Liver Tone, because it is perfectly harmless.

Calomel is a dangerous drug. It is mercury and attacks your bones. Take a dose of nasty calomel today and you will feel weak, sick and nauseated tomorrow.

Children and grown folks can take Dodson's Liver Tone, because it is perfectly harmless.

NOTICE TOBACCO GROWERS.

A FAMILY MEDICINE

In Her Mother's Home, Says This Georgia Lady, Regarding Black-Draught. Relief From Headache, Malaria, Chills, Etc.

Ringgold, Ga.—Mrs. Chas. Gaston, of this place, writes: "I am a user of Theford's Black-Draught; in fact, it was one of our family medicines. Also in my mother's home, when I was a child. When any of us children complained of headache, usually caused by constipation, she gave us a dose of Black-Draught, which would rectify the trouble. Often in the Spring, we would have malaria, and chills, or troubles of this kind, we would take Black-Draught pretty regular until the liver acted well, and we would soon be up and around again. We would not be without it, for it certainly has saved us lots of doctor bills. Just a dose of Black-Draught when not so well saves a lot of days in bed."

Theford's Black-Draught has been in use for many years in the treatment of stomach, liver and bowel troubles, and the popularity which it now enjoys is proof of its merit.

If your liver is not doing its duty, you will suffer from such disagreeable symptoms as headache, biliousness, constipation, indigestion, etc., and unless something is done, serious trouble may result.

Theford's Black-Draught has been found a valuable remedy for these troubles. It is purely vegetable, and acts in a prompt and natural way, regulating the liver to its proper functions and cleansing the bowels of impurities. Try it. Insist on Theford's, the original and genuine. E 79

"MACHINERY FOR QUICK DELIVERY"

We have had orders with factory for several months and they are now beginning to make shipment. We have following machinery coming to Wilmington stock for quick delivery; viz:

- 2 No. 1 American Saw Mills, Wire Cable Drive, Equipped with Extended Mandrel, 400-lb. Balance wheel for light power, for use with Gasoline Engines, Tractors, etc.
2 No. 2 American Saw Mills, Heacock Feed, Wire Cable Drive, Equipped with Extended Mandrel, and 500-lb Balance Wheel.
3 No. 2 American Saw Mills, Heacock Feed, Wire Cable Drive, Regular Equipment.
1 No. 2 American Saw Mill, Heacock Feed, Log Beam Carriage, Wire Cable Drive.
2 No. 3 American Saw Mills, Heacock Feed, Wire Cable Drive, Regular Equipment.
1 No. 3 American Saw Mill, Heacock Feed, Log Beam Carriage, Wire Cable Drive
1 No. 4A Farquhar Saw Mill, Heacock Feed, Wire Cable Drive.
3--American 2-saw Pony Gang Edgers, Double Pressure Rolls.
3--22" New Williams Corn Mills.
1--20 H. P. Farquhar Cornish Boiler and Center Crank Engine mounted on Wheels.
1--20 H. P. Frick Boiler and Engine mounted on Wheels.
1--25 H. P. Frick Boiler and Engine mounted on Wheels.
1--10X12 Frick Center Crank Engine.
1--20 H. P. Muncie Crude Oil Engine.
Gasoline and Kerosene Engines 1 1-2 to 12 H. P.

We also have listed with us all sizes and types of Second-Hand Machinery. Let us figure on your requirements.

BUENOS AIRES TO HAVE GREAT STATUE

Buenos Aires.—As voyagers entering the harbor of the greatest city of North America behold the majestic Staute of Liberty, so within the present year those coming to the greatest city of South America will behold a majestic sentinel, a towering statue of Christopher Columbus.

The monument of the great navigator will not, like the Liberty statue in New York, stand in the harbor, for Buenos Aires has no

real harbor, but will rise nearly 100 feet in height from a point near the watre's edge. The site selected is in the broad Paseo Colon, in front of the government house, whence the statue will overlook the beautiful Plaza Colon and the wide expanse of the River Plate as it enters the ocean.

Representing ten years' labor of the sculptor, Arnaldo Zocchi, appropriately a native of the country in which the discoverer of America was born, the monument soon will be shipped from the artist's workshop in Rome to Buenos Aires, according to recent advices. The image of the navigator is itself 22 feet high carved out of a single block of marble. It will therefore have to be brought over in one piece.

Critics who have visited the sculptor's workshop recently and seen the work virtually completed write that, for symbolic beauty and grandeur of proportions the monument will be one of the most impressive in the world.

"The column supporting the statue of the navigator is placed upon an ample socle covered with sculptured scenes and figures" says a Rome correspondent of La Razon. "The front part of the socle is the bow of a Latin ship about to be launched into the sea by four youths with naked torsos bent with effort. The scene represents the start of the caravels of Columbus from the port of Palos, Spain.

High up on the bow of the vessel is the figure of Civilization. In the toga of a Roman matron, she extends with naked arm the torch which illumines the new lands and toward which a youth beside her—Genius— gazes with inspired countenance.

"From this base rises the pedes-

RELIGIOUS FINANCIER-ING REVOLUTIONIZED

The Interchurch World Movement of North America is an attempt by forward-looking leaders of the various evangelical denominations of the United States and Canada to co-ordinate the resources in men, money and material for Protestant America.

Historically it is the logical outgrowth of a tendency of the national boards in each denomination to form working alliances among themselves, in which each board shall preserve its identity and control its own personnel and treasury.

In former times, the home mission society, the foreign mission society, the church extension society and the various philanthropic and eleemosynary agencies of any denomination conducted their affairs independently of one another. Each surveyed its own restricted territory, prepared a budget of money and workers for its own purposes and made its own appeal to its constituency for support.

This could only mean that these agencies were more or less in competition with one another; that there were waste and duplication of work and money, and that among them all some work was neglected and some denominational resources were entirely overlooked. Because of their specialized training, the leaders of each agency regarded themselves as peculiarly fitted for their tasks, and jealousy regarded attempts at outside interference.

Decide On Experiment After decades of such haphazard methods, the leaders of one denomination decided on an experiment. They thought it would be possible for the agencies to get together for a common study of all the opportunities and resources of their brotherhood, to make out a unified budget of men and money, and to conduct a concerted appeal for funds. It was made clear that each constituent board should preserve complete autonomy.

When the board representatives met they found it possible to eliminate a great amount of organization expenses. They ultimately worked out a budget and plan of campaign that was satisfactory to all. This resulted in the famous "Men and Millions Movement" of the Disciples of Christ, which brought in what was then considered the staggering sum of \$6,300,000 for a five-year program. The members of the communion were so pleased with this business-like method of conducting affairs that they contributed even more generously than had been expected.

The success of this enterprise revolutionized the whole business of church financing. The other great denominations immediately adopted the plan. The denominational associations have come to be known as "forward movements," and some thirty of them are in existence today. Each one has clarified all the information in relation to enterprise within the denomination, and has reduced the business of collecting and spending money to a science.

World-Budget Formed The Interchurch World Movement is simply a plan to do interdenominationally what the forward movements have done within the various communions. It means that every denominational budget will be made in the light of world needs instead of in the semi-obscurity of incomplete information. It means that contributions to one denomination will not be in wasteful competition with contributions to another, because all the fellowships will have worked out their program together.

The functions of the Interchurch World Movement are threefold. First, it collects, by means of world surveys, all the pertinent facts on which denominational programs may be built. Second, it sets up the practical machinery of co-operation. Third, it acts in an advisory capacity whenever its advice is requested.

The Movement has nothing to do with organic church union or matters of creed or doctrine. Each constituent unit preserves complete autonomy, and is bound only so far as it wishes to be bound. Financial appeals are made by each denomination to its own constituency. Any surplus in undesignated funds, over and above the actual cost of administration, will be prorated among the denominations engaged in a given financial undertaking.

An illustration of one thing the Movement can do is to be found in a western community of 1,600 persons in which thirteen denominations have been supporting separate churches with missionary funds, while an adjacent territory of 50,000 persons has only three churches. By seeing that all missionary boards are supplied with information in such cases, the Movement will make possible a wiser distribution of funds.

Its first goals are to reduce unnecessary duplication and overlapping to a minimum and to bring about an intelligent division of labor in unoccupied fields.

FARMERS ARE URGED TO MAKE LIME TESTS

Whether Soil Needs Lime May Be Determined—Various Forms May Be Used.

Whether or not lime is necessary for the successful growth of peanuts will depend entirely on the nature of the soil, says Prof. C. P. Blackwell, agronomist of Clemson College. Soils that are low and poorly drained or that have been poorly drained in the past are generally in need of lime. It is doubtful if lime will pay on well drained upland soils. In a three year test at the Pee Dee substation at Florence lime gave no increase at all.

Any farmer who is in doubt as to whether or not his soil needs lime for peanuts should try the following scheme: Lay the field out in several sections and apply lime at a good rate to some of the sections and leave some unlimed. Keep a careful record as to where lime has been applied and at harvest time make careful comparisons between the limed sections and an equal area where no lime was used. This will give a good test of the lime requirements of the soil and may save a great deal of money in future years.

Satisfactory results will be secured from any of the high calcium, high grade oyster shells and marl, or the burnt products of any of these. The finer the limestone is ground the greater will be its immediate availability. Limestone ground to pass through a tenmesh screener, all finer particles included, is recommended when a heavy application is made (one to two tons per acre). Either very finely pulverized limestone or burnt lime 12 recommended where only a few hundred pounds are used.

The amount which should be applied will depend on the frequency of application and the kind of lime applied. Some farmers who raise peanuts apply about 500 pounds of finely pulverized limestone or burnt lime every year. A much better practice is to plow in one or two tons of ground limestone or half that amount of burnt lime, once every three or five years. This will give just as good results and will save much labor.

Lime may safely be used at any time in a crop rotation. Perhaps the best time would be in the winter before peanuts are planted. It can be applied to the land just before plowing, and this method has the advantage of giving one a firm ground on which to work. It may also be applied just after the land has been plowed and then harrowed in with a spike tooth harrow. It is most easily applied with a regular lime or fertilizer distributor. The effects of lime are likely to be in proportion to the thoroughness with which it is mixed with the soil in which the plant roots are to develop.

Citation Notice. STATE OF SOUTH CAROLINA, County of Horry. By J. S. VAUGHT, ESQUIRE, PROBATE JUDGE.

WHEREAS, Josephine Jenkins made suit to me, to grant her Letters of Administration of the Estate of and effects of Arthur M. Jenkins.

THESE ARE THEREFORE to ite and admonish all and singular he kindred and creditors of the said Arthur M. Jenkins, deceased, that they be and appear, before me, in the Court of Probate, to be held at Conway, S. C., on March 6th, 1920 next, after publication hereof, at 11 o'clock in the forenoon, to shew cause, if any they have, why the said Administration should not be granted.

GIVEN under my Hand, this 20th day of February Anno Domini, 1920.

Published on the 26th day of February, 1920; and the 4th day of March 1920, in the Horry Herald. SEAL) J. S. VAUGHT, Probate Judge, H. C.

Dye That Skirt, Coat or Blouse

"Diamond Dyes" Make Old, Shabby, Faded Apparel Just Like New.

Don't worry about perfect results. Use "Diamond Dyes," guaranteed to give a new, rich, fadeless color to any fabric, whether wool, silk, linen, cotton or mixed goods,—dresses, blouses, stockings, skirts, children's coats, draperies,—everything! A Direction Book is in package. To match any material, have dealer show you "Diamond Dye" Color Card.

LIFT CORNS OR CALLUSES OFF

Doesn't hurt! Lift any corn or callus off with fingers

Don't suffer! A tiny bottle of Frezone costs but a few cents at any drug store. Apply a few drops on the corns, calluses and "hard skin" on bottom of feet, then lift them off.

When Frezone removes corns from the toes or calluses from the bottom of feet, the skin beneath is left pink and healthy and never sore, tender or irritated.

I have in this week 65 extra good Horses and Mules. 2-carloads to arrive January 7, 1920. All good broke, nice quality. Big lot Buggies, Wagons, and Harness.

G. B. JENKINS CONWAY S. C.
