

BOATS RECOVER LIQUOR STORE

Many Cases That Cast Off in Fear of The Officers

The rum-running game off the New Jersey coast took a new turn last week with the smaller fry having their inings. A kind providence in the guise of a rum pirate provided about 200 cases of whiskey for the little fellows.

A strange craft took a boat making for Highland, N. J., on a trip from the liquor armada. The men on the pursued boat, believing them to be prohibition agents, dumped their cargo in the mouth of the Shrewsbury river. Another rum-runner had the same experience. This boat was overtaken and searched, when the captain discovered to his great disgust that his pursuers were only pirates.

Hard-working fisher folk were soon out in twenty small boats searching for the cases in seven feet of water.

More Liquor Ships The supply of ships increased in number to seventeen, three steamships and fourteen sailing vessels. There was no great activity, however, as the northwest wind filled the Shrewsbury channel with drift ice.

Daniel Docherty, former captain of the steamship Javary, was brought in from the Atlanta Federal penitentiary, where he is serving a year for unlawfully unloading alcohol in December, 1921.

He will be a government witness in the Federal court trial of Harry K. Barr, of the Barr Shipping Company; John A. Kirsch, William C. Prendegast and Alexander Karlin, indicted in connection with the same case.

Yellowley Returns. Acting Prohibition Director Yellowley returned from a four days' trip to Detroit and Washington. He had nothing much to say.

Frank Gagstone, safe owner at No. 2250 Seventh avenue, was arrested by dry agents, who said he sold them gin.

In Brooklyn, Frank De Maio was held under \$1,000 bail, and Salvatore Lania, \$500, accused of selling whiskey voluntarily to dry agents in a cider store at No. 84 Summit street, Brooklyn. It was 10 cents a glass.

Lips cracked and sore? MENTHOLATUM quickly heals them.

Thin? Run-down? Sure Way to Get Right Weight

Increase Your Red-Blood-Cells. That's the Sure Way! S. S. S. Builds Blood-Cells; This Means Strength!

Do you know why insurance companies refuse to insure a great many people because they are under weight? It is simply because to be under weight often proves

low fighting-power in the body. It often means you are minus nerve-power, minus red-cells in your blood, minus health, minus energy, minus vitality. It is serious to be minus, but the moment you increase the number of your red-blood-cells, you begin to become plus. That's why S. S. S. since 1876, has meant to thousands of underweight men and women, a plus in their strength. Hollow cheeks fill out. You stop being a calamity-looker. You inspire confidence. Your body fills to the point of power, your flesh becomes firmer, the age lines that come from thinness disappear. You look younger, firmer, happier, and you feel it, too, all over your body. More red-blood-cells! S. S. S. will build them. Ladies and gentlemen, a peppy, bonny face doesn't make you look very important or pretty, does it? Take S. S. S. It contains only pure vegetable medicinal ingredients. S. S. S. is sold at all drug stores in two sizes. The larger size bottle is the more economical.

S.S.S. makes you feel like yourself again

MOTHER! MOVE CHILD'S BOWELS

"California Fig Syrup" is Child's Best Laxative

Hurry Mother! A teaspoonful of "California Fig Syrup" now will thoroughly clean the little bowels and in a few hours you have a well, playful child again. Even if cross, feverish, bilious, constipated or full of cold, children love its "fruity" taste, and mothers can rest easy because it never fails to work all the souring food and nasty bile

TELL HIM NOW

If with pleasure you are viewing any work a man is doing, If you like him or you love him, tell him now, Don't withhold your appreciation till the parson makes oration, And he lies with snowy lilies o'er his brow;

For no matter how you shout it, he won't really care about it, He won't know how many teardrops you have shed, If you think some praise is due him, now's the time to slip it to him, For he cannot read his tombstone when he's dead. More than fame and more than money is the comment, kind and sunny, And the hearty, warm approval of a friend, For it gives to life a savor, and it makes you stronger, braver; And it gives you heart and spirit to the end; If he earns your praise bestow it— if you like him let him know it; Let the words of true encouragement be said. Do not wait till life is over and he's underneath the cover; For he cannot read his tombstone when he's dead.—Exchange.

CO-OPERATE IN WEEVIL FIGHT

Communities Should Get Together and Help one Another

Enclosed you will find Boll Weevil Edition published by the Augusta Herald, Wednesday, December 20th, 1922, reporting the Augusta Cotton Conference.

Please carefully study what Dr. A. E. Grantham, Agricultural Commissioner of the Virginia-Carolina Chemical Company has to say about results obtained during the past season from boll weevil demonstrations carried on under his direction on many Southern farms, which Dr. R. J. H. DeLoach, director, Armour's Bureau Agricultural Research and Economics, has to say about results obtained from the use of calcium arsenate dusting methods on a large experimental cotton farm in Georgia conducted last season by Armour & Company; what Frank H. Barrett, president Barrett & Company, Augusta, Ga., cotton factors, has to say about boll weevil control obtained by using a liquid poison known as "Hill's Mixture," and what L. D. Hill, a cotton planter of Gough, Ga., has to say about results obtained from the use of this mixture.

There are also articles in this sheet worthy of study by J. C. Maness, of the State Board of Entomology, Atlanta, Ga., and by Prof. Frank C. Ward, of the Georgia State College of Agriculture.

Daily and weekly papers and farm and industrial journals have, for some time, been pumping us full of boll weevil information. Speakers representing many interests have been shooting away at audiences of farmers, business men, bankers, professional men and men and women following all kinds of vocations in the cotton belt states. The public has in this way gained a great deal of information and a great deal of misinformation about the Mexican Cotton Boll Weevil and about boll weevil control. However, as stated by Dr. R. J. H. DeLoach, director, Armour's Bureau of Agriculture Research and Economics at the Augusta Cotton Conference "there are many methods of poisoning the weevil and it is something that nobody can speak of dogmatically."

This department has issued a number of letters in regard to boll weevil control, advocating the dusting method recommended by the Federal Government. This method has also been advocated by our state departments of agriculture.

Recently several new methods, after considerable experimental work, have been made public.

The U. S. Department of Agriculture has to say about the "Florida Method," published in the University of Florida in Bulletin 165, October, 1922:

"The Bureau of Entomology of the United States Department of Agriculture takes great interest in the new method of boll weevil control announced by the Florida State Experiment Station, in its bulletin dealing with experiments by G. D. Smith, under the direction of Dr. Wilmon Newell. In these experiments which were conducted in northern Florida, the treated fields averaged 429 pounds of

seed cotton per acre; the untreated checks averaged only 164 pounds of seed cotton per acre, or an average increase of 275 pounds of seed cotton per acre in all tests. The average cost of treatment for the entire season was \$1.57 per acre. The new method consists of the removal and destruction of all squares present on the plants at a time when about two squares per plant are present. This operation destroys a large percentage of the weevils and is immediately followed by a thorough dusting to poison the terminal buds where the remaining weevils are forced to feed. "This announcement is particularly important because it apparently offers a means of controlling the boll weevil on low yielding land on which it has so far been unprofitable to use the dusting method."

The "Florida Method" is clearly explained by Franklin Sherman, Entomologist North Carolina State College of Agriculture, in The Progressive Farmer, issue of December 30th, 1922.

In the report of the Augusta Cotton Conference you will find that Frank H. Barrett, president Barrett & Company, Augusta, possibly the largest cottons factors in the world, strongly advocates the use of "Hill's Mixture," having satisfied himself that L. D. Hill of Gough, Ga., has after several years of experimental work, discovered a liquid poison that has, under rigid tests, given splendid results.

The "Hill Method" has also been studied by J. Swinton Whaley, of Edisto Island, S. C., whose recent report published in the Manufacturers' Record, issue of December 21st, 1922, is summed up in these words:

"A boll weevil remedy that permits the remunerative production of cotton under ordinary conditions has unquestionably been found."

The sheet enclosed is mailed to you in order that you may have an opportunity to note results obtained under a variety of conditions. Boll weevil fighting should be a community fight. Most careful consideration should be given control methods recommended for use in your community by authorized representatives of the state college of agriculture, state extension service and the United States Department of Agriculture.

G. A. CARDWELL, Agricultural and Industrial Agent, Atlantic Coast Line R. R. Co.

GERMANY FAILS REPARATIONS

Germany is now in absolute default on all her reparations obligations and will be afforded no assistance in the nature of a moratorium to gain her financial feet, according to a decision of the reparations commission. Also at the end of the present month the German government is to be called upon to pay to the Allies the sum of half a billion gold marks on her delayed reparations account.

Inside the occupied area of Germany comparative tranquility prevailed Friday so far as untoward demonstrations were concerned; but nevertheless the felling of bitterness against the French was as apparent as on previous days. Numerous arrests of persons concerned in Thursday's disorders were made, and others are likely to follow because of the recalcitrancy of various German officials in carrying out orders given them by the occupation officials.

Dusseldorf bears somewhat of the aspect of a besieged city with French troops patrolling the streets in place of the German police, who have left their posts. Cafes, hotels and places of amusement were closed at 10 o'clock by the order of the French officials. Throughout the entire Ruhr region the number of men on strike in the coal mines and other industries is slowly, but surely augmenting. The railroads are virtually idle, and traffic on the river has all but ceased, the only boats plying being manned by the French.

Large contingents of French troops are being brought into the Ruhr for the purpose of meeting any eventualities that may arise.

"Ask Marshal Foch."

Essen, Germany.—The customs barriers with which the French are threatening to encircle the occupied Ruhr region was expected to come to effect at midnight on Jan. 26th.

The occupation authorities decline to reveal their proposed plan or to indicate the methods they will take for enforcement. "Ask Marshal Foch" was the uniform reply to the newspaper men today when they asked for information.

This interpreted as indicating that Marshal Foch will have headquarters in Essen and be in charge of the customs embargo, which it is presumed, will permit of exports and imports to and from occupied Germany only with the consent of the French authorities. German industrialists declare such action will mean the shutting down in the industries of the Ruhr.

The mine situation was reported normal. The French will attempt to French railway workers, who are due to arrive tomorrow.

The post and telegraph authorities have issued an ultimatum to the

A TONIC

Grove's Tasteless chill Tonic restores Energy and Vitality by Purifying and Enriching the Blood. When you feel its strengthening, invigorating effect, see how it brings color to the cheeks and how it improves the appetite, you will then appreciate its true tonic value. Grove's Tasteless chill Tonic is simply Iron and Quinine suspended in syrup. So pleasant even children like it. The blood needs QUININE to Purify it and IRON to Enrich it. Destroys Malarial germs and Grip germs by its Strengthening, Invigorating Effect.

French demanding the avacuation of the telephone, postal and telegraph services, abolition of mail censorship, removal of military patrols from governmental premises and non-interference with the government administration.

CULLING INCREASES PRODUCTION OF EGGS

A sure means of increasing egg production by proper culling was given in an exhibit entitled "Make Your Poultry Pay," shown by the United States Department of Agriculture at the International Livestock exposition, Chicago.

Two pens of chickens were shown, one lot of 12 hens was not culled, and ate in one year 900 pounds of feed, costing \$20.70. The 12 hens laid 100 dozen eggs during the year. Contrasted with this lot was one of eight hens which had been culled, and which laid the same number of eggs but ate only 600 pounds of feed, at a cost of \$13.50. The lot of 12 hens that was not culled ate 50 per cent more feed than the lot that was culled and produced no more eggs. The extra cost of feed, however, is but one of the larger costs. Others are the extra labor, extra housing room, and extra capital invested.

To enable the poultryman to cull his hens properly the exhibit gave the points to be looked for when determining a poor layer or a good layer. These points are quickly learned and are means of increasing profits from poultry.

NOTICE OF SALE

Under and by virtue of the order of Hon. R. J. Kirk, Referee in Bankruptcy in the matter of Prince Brothers, bankrupt, as well as in the matter of E. W. Prince and F. G. Prince as individual bankrupts, which order is dated on January 31st, 1923; I, the undersigned Trustee of said bankrupts, will offer for sale at public auction for cash at the Post Office at Bayboro, South Carolina, at eleven o'clock A. M., on Friday, the 16th day of February, 1923.

ALL AND SINGULAR. The remaining book accounts, notes, bills of sale, chattel mortgages and other bills receivable of the said bankrupt estates, said book accounts and bills receivable consisting of those not held by secured creditors of said bankrupt concern and for a more particular description reference is hereby made to the schedule of said bankrupts, a copy of which is in the hands of the undersigned.

Dated February 1st, 1923.

A. BELL, Trustee.

It was too wet and cold to work on the roads some of the days of last week.

FLORENCE MAN MEDICAL BOARD

Riley Elected Trustee of The Medical College of Charleston

Columbia.—The General assembly today elected four trustees of the medical college at Charleston, and one trustee of Winthrop college. There were seven nominees for the medical college board. Those elected were: Dr. J. A. Neuffer, of Abbeville; Dr. D. T. Riley, of Florence; Dr. L. H. Jennings, of Bishopville, and Dr. E. H. Barnwell, of Charleston.

The other nominees were: Dr. H. B. Fishburne, of Columbia; Dr. W. A. Woodruff, of Spartanburg; and Alfred Huger, of Charleston. The incumbents are Dr. Jennings, Dr. Fishburne, Dr. Woodruff, and Mr. Huger.

Mrs. C. W. Harris, of Bishopville, was elected trustee of Winthrop college, to succeed Governor McLeod. Mrs. Harris was nominated by Senator Cooper, of Lee County, and there were numerous seconds. The name of former Governor McLeod was presented but later drawn in honor of Mrs. Harris, and Mrs. Harris was unanimously elected. There was applause.

The election of a trustee of the John De La Howe institute was not taken up as had been announced, as this is a position filled by the governor's appointment.—Times.

CONWAY ADOPTS FLORENCE PLAN

(Florence Times.) The Merchants association of Conway, after investigating the workings of a number of credit bureaus throughout this state and North Carolina, have decided that the system of getting and keeping credit information used in Florence is the best

To Stop a Cough Quick take HAYES' HEALING HONEY, a cough medicine which stops the cough by healing the inflamed and irritated tissues. A box of GROVE'S O-PEN-TRATE SALVE for Chest Colds, Head Colds and Croup is enclosed with every bottle of HAYES' HEALING HONEY. The salve should be rubbed on the chest and throat of children suffering from a Cold or Croup. The healing effect of Hayes' Healing Honey inside the throat combined with the healing effect of Grove's O-Pen-Trate Salve through the pores of the skin soon stops a cough. Both remedies are packed in one carton and the cost of the combined treatment is 35c. Just ask your druggist for HAYES' HEALING HONEY.

plan they have had offered to them, both as to accuracy and fairness to the good pay customer, whose rights the association is formed to protect as much as possible.

The secretary of the local association was asked to go to Conway and explain the workings of this city. About 35 Conway merchants were present to hear the discussion and they signed up the Conway association to a man. They all expressed the belief that the two associations could be of mutual benefit to each other due to the fact that so many Florence people go to Myrtle Beach during the summer and are accustomed to doing their buying in Conway. Should they feel they need any credit in Conway, the local association in Florence will always be glad to give them ratings in Conway or any other place the people of this city feel they may need credit, stated the local secretary.

The Florence Merchants' Credit Association wants the general public to know that they always stand ready to buy goods elsewhere and they would suggest that the general public make use of this service, the secretary said.
