Months ago I foreshadowed this deal. When Governor Blease and his close advisory friends, accepted the homage of flopper John Richards, an eleventh hour convert, and the joint personal candidate of Senator Tillman and Gonzales, that proved it. Then later John Gary's eloquent sil-ence, and the "State's" endorsement, sufficiently corroborated it. But old Ben, as usual, now puts on the cap-

## TWO ACCIDENTS **DURING THE DAY**

Negro Boy and White Boy Run Over in Different Parts of Town by Autos

(From Sunday's Dialy.) So far as was known around town last night only two accidents occured in Anderson yesterday. A negro boy was run over by an automobile near the Orr mills yesterday, the machine passing entirely over the boy's body but fortunately he was not much in jured. The man driving the machine picked the boy up quickly and brought him to town where medical attention was given and it was discovered that

he was not badly hurt.

A youngster riding a bicycle was run over on the public square yester-day afternoon by an automobile but he was struck a glancing blow by the machine and he suffered but little damage. His bicycle was considerably torn up but the man driving the car gave him \$5 and doubtless the boy was glad that the accident occurred.
With these two exceptions the police department had heard of no further accidents yesterday.

This is a remarkable record for the day, since there were dozens of out-

of-town automobiles and hundreds of buggies here for the day and every Anderson man boasting of a machine had it out for airing during the day.

Chemical analysis of coffee, tea and Coca-Cola as served in the home, at restaurants and at soda fountains. shows that coffee and tea contain approximately twice as much caffcine as does Coca-Cola. In other words, two glarses of Coca-Cola are approximately equivalent to one cup of coffee or tea so far as the amount of caffeine is concerned.

The only other material difference

The only other material difference in chemical composition is that both tea and coffee contain tannic acid, a rubstance found quite generally in plants, whereas Coca-Cola does not. Drink Loats of Water and Stop Eat-ing Meat for a While if Your Blauder Troubles You. 00000000000000000

Editor The Intelligencer. America, from its first settlement, has been advertised to the world as the "home of the free, and the land of the brave." "It pays to advertise" and this advertisement has/been the cause of bringing to this new country hundreds of thousands of liberty lovng men and women-who by their intelligence and labor have help-ed to form an empire of freemenand whose descendants have proven most loyal and patriotic citizens.

But of late years there have been many dissensions among our peopleand trivial at first, but canstantly growing—which have finally assumed

a character that bodes no good for a liberty loving republic.

Failing to defeat Blease two years ago with all the election machiner at his command, the Chairman John Gary Frana bit upon a plan that will lose Please thousands of votes in the coming election. Not atisfied with new club lists, the voter is required to sign his full name and give a complete account of himself from the day he was born. It is claimed that the new rule is as fair to one side as to the other. Nobody believes this. The banker and the merchant (as a rule anti-Bleasz), read the daily papers and are familiar with all the reprimary laws primary laws

Not so with the farmer, laborer and mill operative. Many are not readers of papers and would not have the time to read if they were subscribers. As a rule, the secretaries of the clubs over the state are anti-Blease and I am told that when a Blease man calls to sign the club book and signs only his initials that some secretarier-laugh in their sleeves and never tell the voter that he must sign his full name. It has been charged that many secretaries keep their club books hid from Blease men and put them off with such excuses: "Oh, I left the book at home. I'll bring it up to mor-row." And tomorrow never comes unless the Blease voter flatly de-mands ble rights.

mands his rights.
I heard one Blease voter say that it was necessary for him to threaten to do bodily harm to a certain secretary in order to get his name on the club book. Now, this isn't right and if this method is continued, will result in another Wade Hampton revolu-

To show the indifference voters are displaying in the matter of enrolling their names on club books, I was in Pelzer on the 4th and was told that although that precipct voted several hundred—more than any other one point out side the city of Anderson, only about 60 voters, had enrolled their names. They have only a few days-until the 25th of this month-in which to do so. This is only a fair sample of conditions existing all over the state and thousands of good citizens will sleep over their rights and not get to vote on August 25th.

When one views the absolute apathy—the colossal and consummate indifference which the average voter exhibits in the selection of public offictals it is distressingly astounding. The rural voter is a busy man—works six days in a week—goes to church on Sunday, hears a sermon on temperance—returns home, feeds the

he "looks over" the men and weighs the merits of each one carefully. They permit themselves to become pledged to support either Major Tectotaler, a prohibitionist, or Colonel Twoquarts, an anti-prohibitionist (as the voter happens to prefer), when in fact neither the major or the colonel hold the clightest claim to the office. Their sole qualification consists in the fact that the major has discontinued the use of whiskey because it makes him sick—and it makes the colonel sick when he fails to get his booze. Whether Smith or Blease goes to the senate, we want to see a successful fight made on those negroes hold-
