

THE Trumbull Cyclecar

America's first completely equipped four-wheeled light car—is here briefly described. To appreciate the price is to read carefully the specifications, and by comparing them with any other popular priced cars on the market.

With special features and expensive equipment, such as mechanical self starter, electric lights and horn, interchangeable wire wheels, top, windshield, we believe we offer more real car for the dollar than others.

THE TRUMBULL CYCLECAR, with its stream line body; European style hood and wire wheels, has a smart and stylish appearance, yet is conservative in general outline to satisfy the most critical.

The top and windshield are designed and proportioned to fit the car; the electric light equipment is similar to and as efficient as that used on the highest priced automobiles.

The seating capacity and floor space of the body afford ample comfort to both the driver and passenger.

The spare wheel is conveniently carried on the left side running board or step.

Specifications Model 14-A

ENGINE—Four cylinder, cast engine, four cycle, 2 7/8 inch bore, 4 inch stroke, Thermo Syphon, water-cooled, "L" head, mechanically operated valves.

HORSE POWER—14-18 at nominal speed.

LUBRICATION—Pump and splash. Pump delivers oil to all main bearings and timing gears. Crank case is provided with reservoir and oil pump pan into which the connecting rods dip.

IGNITION—Splitdorf high tension magneto. Dust proof and water-proof.

TRANSMISSION—Friction-chain; Four speeds forward, and reverse. Ball with chain.

CONTROL—Self hand drive—one hand lever for all speeds; four forward and reverse.

BRAKES—Standard contracting friction, operating on brake drums on rear wheels and controlled by pedal foot brake. Friction may also be used in emergency.

AXLES—Special forged steel front and rear, heat treated. Dropped steel forgings used for knuckles and steering arms. Ball Bearing in Hubs.

WHEELS—Special wire detachable; 40 spokes to each wheel, 5-32 inch diameter. Any wheel will fit all hubs, front and rear either side.

TIRES—28 inch by 3 inch Clincher type. United States Studed Treads.

HUBS—Special pressed steel. All wheels may be removed without disturbing bearings. Patents pending on design.

LAMPS—Electric front and rear, special arrangement for dimming controlled by switch from seat. Current supplied by storage battery.

WHEEL BASE—30 inch tread 44 inch.

GASOLINE TANK—Located under cowl over dash; capacity seven gallons.

SPRINGS—Semi-elliptic transverse front and rear, special heat treated steel.

BODY—Roadster type; special stream line. Tufted upholstery; door on right side, sociable seating; large parcel compartment at rear, 20 pound capacity.

FINISH—Standard black; nickel trimmings.

SEATING CAPACITY—Two persons side by side. All pedals and control levers within easy reach of the operator.

SPEED—3 to 45 miles per hour.

WEIGHT—Approximately 950 pounds, 9 1/2 inch clearance.

FUEL CONSUMPTION—35 miles per gallon gasoline.

REGULAR EQUIPMENT—All cars are shipped complete with the following equipment: Top, with side curtains and envelope complete. Wind Shield, special torpedo type; adjustable; frame black enamel, nickel trimmings. Electric Lights, two front, one electric light in rear. Self Starter, mechanical, operated from seat. Electric Horn, under hood. Oil Gauge on base or reservoir of engine. Jack, Tire Pump and Tool Kit.

THE MOTOR
The motor of the TRUMBULL Cyclecar is well built of the best material and of ample horsepower. The internal cooling surfaces are large and have been designed to give maximum cooling by the thermo-syphon system of water cooling. All bearing surfaces are generous in size and of the best bearing metal obtainable.

The crank shaft and cam shaft are made of special drop forge steel and ground true to size.

All parts needing oil are supplied by standard pump and splash system, insuring long life and quiet running.

The motor develops 14 to 18 horsepower at nominal speed.

This motor was designed for us by our own engineers, and has been made as light and compact as the desired efficiency would permit.

GUARANTEE
The materials and workmanship in the TRUMBULL Cyclecar are of the best throughout. Any breakage is well guarded against, but we (the manufacturers) will only be responsible for the free renewal of any broken part which, in our opinion, is due to defective material. All goods other than our manufacture, and cars resold are exempt from this guarantee.

The above view shows the arrangement of the dash equipment on the TRUMBULL Cyclecar and the location of the operative parts of the car.

The speedometer is extra equipment, but can be conveniently adjusted on the dash as shown.

The ignition and lighting switches, brake, clutch and transmission controls are located in close proximity to the steering gear—all within easy reach of the driver.

WILL START A CAMPAIGN FOR Y. M. C. A. BUILDING

WORK OF THE INSTITUTION IS BEING CRIPPLED FOR ROOM

SEC. BURNETT COMPLIMENTED

Directors Put Minimum Amount To Be Raised at \$50,000— Some of Which Is Pledged

(From Wednesday's Daily.)
At a meeting of the directors of the Y. M. C. A. last night it was decided to inaugurate a campaign for a new home for the association to cost not less than \$50,000. This is in pursuance of the agreement entered into with Secretary Burnett when he was engaged a year ago, and also in compliance with the statements made to the subscribers in the reorganization of the Y. M. C. A.

The Y. M. C. A. last fall and spring did some wonderful work, when the lack of equipment is considered. It attracted attention all over the United States. The night school was hailed with particular delight by the welfare workers of the country, and the success of the textile night school was regarded as the most remarkable thing ever undertaken by a Y. M. C. A. of this size, especially handicapped for teaching facilities. As a result of that work a number of young men have been inspired to seek for a broader and more liberal education, and the college and the Y. M. C. A. are actually gratified.

So notable has been the achievement of the Anderson Y. M. C. A. in the last year that persons from other cities and in "big business" have been trying to get the secretary away from Anderson into what they consider a larger field of usefulness. Mr. Burnett has repeatedly declined to consider any offers, but some have come recently with such persistence that the directors thought it their duty to him to give Mr. Burnett a better equipment with which to work. In consequence whereof it was decided last night that unless there should be something to interfere, the campaign for funds for a \$50,000 building will be inaugurated in November. It is thought that nothing will interfere. Nothing To Interfere.

The field was canvassed thoroughly and it was found that there is no other benevolent or charitable or eleemosynary institution having claims on the public that desires to put on any such campaign for some time, and as the need of a Y. M. C. A. building must be faced some time, it was decided to start right now. Pledges of subscriptions aggregating several thousands of dollars were made some time ago and there was a strong sentiment to start out for an even more pretentious building, but Mr. Burnett and others cautioned that what Anderson needs is merely a home for its Y. M. C. A. and a comfortable and attractive working quarters, and it would be better to have a definite and modest amount in view and to get it.

Anderson is the only city of its size in the country that has no Y. M. C. A. building, and this cannot be said a year from now, for the directors have had such assurances that they believe that the money will be raised in four days of the week set for the campaign, about the 15th of October. Spartanburg is just completing a handsome home for its Y. M. C. A. and the building at Greenville is the center of interest for that bustling city. Sumter has recently occupied its building similar to the one that Anderson would like to have.

Columbia a few years ago put on a campaign for \$75,000 and raised over \$100,000. The people in the cities where the campaigns have been put on declare that the greatest asset of those cities is the home for the Y. M. C. A. For every live city there is a growing population of young men, and the atmosphere of the Y. M. C. A. building is always such that the young men seek to get in there, and to have a home-like place where they are away from home. The result is that they are kept from straying into mischief.

Good Work Appreciated.
The directors in appreciation of the faithful and valuable work of Secretary Burnett for the last year voted him a vacation, and it was announced that he will receive an increase in salary next year, in consideration of the increased responsibility and work.

The building campaign will not be started until after the work of the institution is shaped up for the winter and after Mr. Burnett's return from his rest, and really his vacation will be spent in shaping matters to the end that is desired and will not be so much of a vacation after all. The night school will have new features and additional teachers, and the textile school will be conducted for the entire six months in a manner to improve the mental and technical qualifications of the young men of the mills who take this course.

Mr. Burnett has also mapped out another series of those delightful Sunday afternoon addresses such as were delivered at the court house last winter and did so much good in the community. He will endeavor to engage some splendid material while he is away on this visit.

Col. Dave H. Wise.
Col. Dave H. Wise of Aiken, representing the comptroller general, is here checking up the books in some of the county offices. Col. Wise has done a mass of this kind of work in his time.

MR. VANDIVER IS SECURED BY BANK

Announcement Made That He Is Shortly To Become Vice President of Peoples Bank

(From Thursday's Daily.)
Following a special meeting of the directors of the Peoples Bank of Anderson, held in the parlors of the bank yesterday afternoon, Lee G. Holleman, president of the institution, announced that E. P. Vandiver had been elected vice president of the institution and would accept the position. This will be of general interest throughout Anderson county as Mr. Vandiver is one of the best known bankers in the county. He has seen long service with the Farmers & Merchants Bank and the Farmers Loan & Trust company and there will be no more able banker in the city. It is understood that he will enter upon his new duties at an early date.

While no announcement has been made in this respect, it is presumed that the plans for a new bank, which Mr. Vandiver was to head, have been given up.

YOUNG REEL

Takes Constitutional Oath of Office At Age of 16. (By Associated Press.)

IMPORTANT STEP WILL BE TAKEN

Anderson Chamber of Commerce Asked To Aid in Fight Against Discriminatory Legislating

Following the example of the Charleston chamber of commerce, almost all the trades bodies of South Carolina will shortly pass resolutions in which they will urge South Carolina congressmen to fight any legislation which seems to discriminate for one trade against another. The following is a copy of the resolutions which Anderson has been asked to adopt and which will probably be accepted:

Whereas, the chamber of commerce of Anderson has been requested by several commercial bodies and constantly importuned by a number of special interests to pass resolutions and to bring the influence of this body to bear upon the members of congress of this state with the view of securing a postponement of pending legislation for the regulation of unfair business practices and prevention of unjust discrimination by corporate bodies; and

Whereas, the people of the United States have demanded that certain corporate abuses and unfair business practices be corrected by legislation so far as present experience will justify, and

Whereas, present uncertainty is extremely harmful to business and industrial progress, which uncertainty is sure to continue should conservative action be longer postponed; therefore, be it

Resolved, That the Anderson chamber of commerce urge upon the members of congress from the state of South Carolina immediate and vigorous action to secure such necessary and conservative legislation as present experience will justify for the prevention of unfair business practices and discrimination and restriction of trade, and be it further

Resolved, That this body solemnly protest against the enactment of any legislation that will discriminate either directly or indirectly in favor of any body or special class of our citizens; and be it further

Resolved, That a copy of these resolutions be forwarded to commercial organizations throughout the United States with a request for similar action and that the business men of this city and throughout the State of South Carolina be requested to take a similar course of action.

HINDUS MUST GO OR GET SHOT-UP

Have Fought Deportation For Three Months, But Crisis Has Been Reached

Vancouver, B. C., July 20.—With this announcement that the Canadian cruiser Rainbow and a contingent of bluejackets reinforced by details from the cruiser Nobe, the situation regarding the Komagata Maru and her riotous Hindu passengers became very grave tonight.

The Hindus, several hundred in number, have resisted deportation for three months. Early Sunday morning they repelled immigration inspectors and police officers who had tried to board the ship to quell a disturbance. In the fight a score of white men were injured. The Rainbow is expected to arrive after day light and she will embark a contingent of Irish fusiliers and the Duke of Connaught's own regiment. It is then intended to train the Rainbow's gun on the Komagata Maru and if the Hindus do not agree to removal from the harbor, bloodshed is believed inevitable.

SPEED LIMIT SET IN PANAMA CANAL

Rules and Regulations Governing Navigation of Canal Have Been Fixed

(By Associated Press.)
Washington, July 21.—Rules and regulations for operating and navigation of the Panama canal are provided for in an executive order just issued. Generally these are framed upon the regulations in force in the Suez canal and the Soo, though there are new features made necessary by peculiar local conditions. One is the limitation to six knots per hour imposed upon the speed of vessels in the Culebra cut, and it is even required that in approaching turns vessels shall maintain the slowest speed that will keep their headway.

LICENSE REVOKED
River Pilot Charged With Carelessness Is Deposed.

St. Louis, July 20.—The license of Captain S. E. Withrow as a river pilot was revoked today by United States Steamboat Inspectors Downs and Brewer. Withrow, who was in the pilot house of the steamer Majestic when she struck the rigging of the new in-take tower at the city's water works at Chain-of-Rocks, near here on the night of June 20, was charged with carelessness.
