#### BONDS FOR HIGHWAYS

Valuable Official Suggestions For Everyone Interested in Good Roads

A most practical publication is suffetin No. 136 of the United States partment of agriculture, contributed by the office of public roads, being a compilation by Lawrence I. Hewes and James W. Glover or data and an malysis of economic features affecting construction and maintenance of highways financed by bond issues, on parties to con-likeary of highway bond calculations. the federal interest net, will not decided by the internal revolute for highways and bridge construction can according to a decision to be a decided by the internal revolute for highways and bridge construction by countries and their subdivisions has become quite prominent, and this become quite prominent, and this evolving delivery of cotton un- in introduction the statement is made ecome quite prominent, and this

in 120% counties, or 41.1 per cent all the counties in this country, th the intures act and that disputes there were outstanding highway bonds of ving the obligations in such con- on January 1, 1911. The total amount for the courts or of such bonds voted, as ascertained lide.

by the office of public roads up to that date, was \$286,556,973, of which township bonds alone amounted to \$57,15,718. The amount of outstandorder issued by the department of hig local highway bonds on January expension today governing the fed-1, 1913, was approximately \$202,007. 6. This amount was increased durnoted below, but was also slightly

decreased by maturing payments.

"The county highway bond is essentially a municipal bond; that is, a bond issued by a public corporation. Statistics indicate that all municipal bonds are regarded as excellent in-vestments, and are frequently used by banks as a second reserve dicated by comparison with the \$79,-741,688 of irrigation and drainage bonds authorized in the interval from 1907 to 1912, inclusive.

bond movement is further indicated by the diagram of first issues for the interval 1900-1913. Dates of first issues were reported, however, for only 579 counties. First issues for 1912 and 1913 are practically complete.

"During the past three years county, district and township highway and bridge bonds were voted as follows: 1911, \$29,200,022; 1912, \$32,-022,703; 1913, \$50,445,756—making a total of \$111,668,481.
"There have also been voted State

highway bonds which total \$158,590,-000. The grand total of all highway bonds voted and reported to the of-fice of public roads to January 1, 1914, is, therefore, \$445,147,073."

The bulletin presents diagrams, half-tone illustrations and statistics in illustration of its text dealing with the economic value of the market road, the cost of highway construction and maintenance, the methods of is-suing bonds and the total cost of highways. It dwells upon legal re-strictions on bond issues and the need for highway engages. or highway engineer, and, discussing

he advantage of bond issues, says: issuance of highway bonds is essentially a method of capitalizing the resources of a community for the purpose o fereating improved highways. The fundamental advantage of the bond plan is the construction of a good system of roads at once, but there are secondary advantages in building roads in long stretches and in the planning of the maintenance

of such roads.

"The question is hot merely whether a community shall incur a debt; it is also a question as to whether the maximum economic efficiency and the full development of the public wealth will be best promoted by using public credit

public credit.
"Emphasis has been placed in this publication on the strictly measurable economic benefits to a community from road improvement. There are many additional economic benefits and very great social benefits which are no treadily 'measured.' Increased school and church attendance is shown in repeated instances to me an immediate consequence of better roads. The general stamulus to business is difficult to evaluate. It is evident, however, that business and professional men of all classes are among the first to be benefited. This is especially true of physicians. The cost

fee first to be benefited. This is especially true of physicians. The cost of upkeep of automobiles, particularity of fires, it becoming yearly a large litem, and ; a road condition it a most serious factor for the automobilist and the users of motor trucks.

"It should be understood at the outset that the question of debt it self is relatively less important than the question of sound planning and good management of the loan. The very presence of the imprived road system fincreases the value of the county property, and therefore the resources aupporting the loan it is a well-established business grincips that extension of credit within safe limits is necessary for maximum results. The financing of all private enterprises by bond issues has increased above, it, will be found necessary to missing and owners fasted that such property, and therefore the founds were issued as a method of capitalizing public and private enterprises the rate of \$583,00,000."

Meeting and argument which is sometimes advanced the highway system or the many roads the improvement of which is generally desired by abutting a landowners. The fact that such property and therefore the founds were fasted as a method of capitalizing public and private enterprises the rate of \$583,00,000."

Meeting and argument which is cometimes advanced the highway system or the many roads the improvement of which is greatly desired by abutting a landowners. The fact that such property holders must pay a tax for the bond issues must pay a tax for the bond issues is only by apparent injustice, for if the highway system or the many roads the improvement of which is greatly desired by abutting landowners. The fact that such property holders must pay a tax for the bond issues is only by apparent injustice, for if the highway system or the patient. The wound in the negret load of the patient property holders must pay a tax for the bond issues is only by apparent injustice, for if the highway system or the patient property holders must be patient. The wound in the n

planned the entire county will feel the benefits of the improvement. As a rule, main market roads reach the ma-jority of producing areas, and when they are improved, all land values are improved, all land values 

towns are frequently taxed for bond their own limits is sometimes made point of debate in bond elections. It is argued that because a large part of the county wealth is within the towas, highway bond money should alit is even urged that the expenditure should be made proportionate to the assessed valuation within the city limits. If the proceeds of highway bond issues were distributed in this way their purpose in many cases jet of the county highway bond issue is to build county market roads, and not to improve city streets, although a high percentage of the assessed valuation may be chy property. It is now known that the expenditure of now known that the expenditure of city taxes on country roads is a sound principle, and that it is one of the best features of State aid for highways. In Massachusetts the city of Boston pays possibly 10 per cent of the total State highway fund, but not a mile of State-aid highway has been built within its limits. New York city also ways about 40 per cent. York city also pays about 60 per cent of the cost of the State highway bonds. Some State laws prohibit the expenditure of proceeds of State highway bords within corporate limits of cities or towns. The improvement of market roads results in improved marketing conditions, which benefit the city. Most cities are essentially dependent upon the surrounding dependent upon the surrounding country for their prosperity and decountry for their prosperity and development. The development of suburban property for residence purposes is also dependent upon highway conditions, and it is becoming evident yearly that whatever makes for an increase in rural population must be encouraged. Since the introduction of motor traffic, country highways have motor traffic, country highways have been used to anincreasing extent by city residents. In fact, the cost of maintaining many country highways has been greatly increased by the presence of city-owned motor vehicles. The general advance of facilities for doing country business from town headquarters when roads are improved is no inconsiderable factor in the commercial life of a community."

## PARALYSIS SEALS LIPS OF LOWNDESVILLE NEGRO

Who Would Reveal Name of Person Sending Bullet Through His Brain.

While the body of Mrs. M. E. Scott, victim of a midnight assassin, who crept into her home near Lowndes-ville 12to Tuesday night and crushed her skull with a blunt instrument, was being lowered in the grave in the cemetery near there Thursday after-noon, between 12 and 1 o'clock, annoon, between 12 and 1 o'clock, another chapter, fraught with baffling mystery, was added, to the tragedy, when Earl Burton, suspected of having had some connection with the murder of the old lady, was shot through the head with a pistol in a clump of words some 500 yards from clump of woods some 500 yards from his home on the Scott place.

The negro is not yet dead, but the wound in his head has paralyzed his tongue, and, being bereft of the power of speech, and unable to write, he cannot give the name of his assailant, who he evidently knows, since he nods his head in assent of the question whether he can tell who shot him. The attending physician states that there is no hope for the ecovery of the negro, and unless some way is found by which he can make known the name of his assassin, he will go to his grave with the secret ne will go to his grave with the secret on his lips.

Among the Suspects.

Ben Massey, who was carried to Abbeville jall last Wednesday together with Charlie Logan, self-confessed slayed of Mrs. Scott, and Earl Burton, the negro who lies at his home at Lowndesville speechless from the effects of the bullet sent into his brain by an unknown assailant, claim that on the night Mrs. Scott was attacked they were in Anderson and spent the

known to his questioners the name of EQUITY MATTERS ONLY questioners have not tried the plan of calling off a list of names to the negro and asking him to make some signal if the tight name was called, is not known. But if such a plan were tried and an affirmative answer given by the negro, it is doubtful if such eyi-dence would be competent in a court of justice.

Are Many Rumors.

Earl Burton is the negro concern-ing whom reports were current in Anderson Thursday night to the ef-fect that he and been shot and beaten, and brought to the Anderson County Hospital for treatment. The bunty Hospital for treatment.

negro was not beaten, and he was not brought to the hospital. A Mr. Speer of Lowndesville was rushed to the hospital here Thursday night for an spreading the report that the negro nature. had been brought to the hospital for Judge treatment.

Reports were also current in Anderson Thursday night that a second negro had been shot at Lowndesville. This report was also erroneous insofar as the statement that the shoot far as the statement that the shooting occurred at Lowndesville. The facts are that a negro was shot in the leg on the plantation of a white fendant, without prejudice, however, man living between Iva and Starr. This was the result of a personal difficulty between the negro and the white man who is said to have shot him, and has no connection whatever with the Lowndesville affair.

No Whites Arrested. rest has been made since Charlie Logan and Ben Massey were placed under arrest the door of Mrs. Scott's murder, and this ton is Will Johnson, who was arrested yesterday and carried to Abbeville jail by Magistrate J. G. Huckabee and assistants. Will Johnson is the negro who spent the night with Charlie Logan the night Mrs. Scott was murdered.

In conversation over long distance telephone late yesterday afternoon Magistrate Huckabee told The Intelligencer that no white people had of alleged breach of contract. The been arrested in connection with the jury returned a verdict in favor of the affair, and no other arrests had been defendent made with the exception of that of Will Johnson.

Ugly Rumors Abroad. various ugly rumors are affoat. In fact, one can hear almost anything he wants to hear about the murder. Stories are going the rounds that white people are mixed up in the kil ling of Mrs. Scott, and that the negro. paid to do so by negroes. One report went so far as to say that one of the negroes had confessed that white peo ple had paid him \$50 to put Mrs.

Scott out of the way.

So far as evidence bearing out these reports is concerned, the reports are as empty as the idle wind. There are number of people in close touch with the case who believe that the death of Mrs. Scott was the result of a conspiracy, and there are some who be-lieve that all the facts in connection with her death have not yet been un-covered. But so far as there being any evidence in hand so far to bear these rumors, there is nothing to it.

Theories of Shooting.

Of course, every one has his theory of the shooting of Earl Burton. Some have advanced the theory that Burton was shot by some person who was afraid that the negro might talk and tell something about the murder of Mrs. Scott that would implicate him, the person firing the shot. There are scores of other theories advanced concerning the mysterious affair, but and a great many of them are so rediculous as to be aimost disgusting.

ANOTHER VICTORY FOR JUDGE FOWLER

Jury Awarded Him Verdict in Second of Insurance Cases.

(From Saturday's Daily) verdict for the plaintiff awarding him the full amount of \$2,500 sued for, together with interest of \$125.95,

for, together with interest of \$125.95, was invited to spend the night, which was the outcome of the case of Judge J. S. Fowler against the Georgia He Logan making a short ladder. This which was completed yesterday in the spring term of the court of common pleas for Anderson county.

This is the second case tried of the six which this plaintiff brought

against a number of insurance companies carrying policies on his auto mobile garage which was burned several months ago, entailing a loss es-timated at \$34,000. The aggregate amount sued for in the six cases was \$22,000. This is also second victory for Judge Fowler in this matter for the jury in the first case awarded him

Jurors Will Be Drawn For Term Convening April Twelve.

(From Saturday's Daily) No jurors will be summoned for the term of the court of common pleas scheduled to convene here on Monday, April 12, as the time will be devoted to the he ring of matters in equity. An agreement to this effect was reached yesterday at a meeting of the Bar Association, and the jur. commissioners instructed not to proeced with the drawing of veniremen. Habeas Corpus Matter.

The last few minutes of yesterday's session of court of common pleas was devoted to the hearing of motions operation and persons confused this for new trials, the taking of orders fact with the shooting of Earl Burton, and disposing of other matters of like Judge Gary filed an order in

matter of Minnie McConnell Ballard renew an application for custody of the child if its best interests should require a change in its custody. New Trials Refused,

The court overruled a motion for a Reports were rife on the streets against the Charleston & Western yesterday that theere had been other Carolina Railway company. It will arrests, including white people, in connection with the murder of Mrs. during the first week of court, result-As a matter of fact but one art ing in a verdict for the defendant company

A motion for a new trial in the case of H. H. Griffin against E. Gregory was also overruled. This case was also tried during the first week of court, resulting in the plain-tiff being awarded damages.

One Case Yesterday. Only one new case was taken up as esterday's session of the court, this being the matter of Mrs. Julia Lyon of alleged breach of contract. The

Third Arrest in the Lowndesville Murder Case Made

(From Saturday's Daily) The only development of impor-iance so far in the case of the murder of Mrs. M. E. Scott at her home near Lowndesville close at midnight of last Tuesday, a ide from the mysterious shooting of Earl Burton, was the arrest yesterday morning of Will John son, who was carried to Abbeville and

Magistrate J. G. Huckabee, of Lowndesville, told The Intelligencer that he arrested Will Johnson about o'clock yesterday morning, - placed im is an automobile and im to Abbeville jall, where he turned over to Sheriff Lyon. The magistrate was accompanied on this mis-sion by his constable, J. M. Huckthee, and a special deputy, Alvin Har-per. A fourth white man, a Mr. Boles, brother of Mrs. M. E. Scott, accompanied the trio of officers to Abbeville with the prisoner, but Mr.

Boles went on personal business.

Johnson Accused. Will Johnson is the negro who spent the night with Charlle Logan on the night Mrs. Scott was murdered. Charlie Logan's regular bed-fellow was Ben Massie, but it is claimed that on the night of the murder Ben Massie and Earl Burton, (the former being in Abbeville jali on suspicion la conaection with the case, and the latter lying speechless at Lowadesville from the effects of a pistol shot in his head at the hands of a party unknown to snyone but the speechless negre), were in Anderson, where they the night with Will Davis, a brother-in-law of Burton.

Testified at Juquest.

At the inquest over Mrs. Scott's body Will Johnson testified. He lives on the Scott place. On the night of the murden of Mrs. Scott, he stated, he came by Charlie Logan's house, and, in the absence of iten Massie, is the ladder which wa, used by the person who crawled through the win-dow of Mrs. Scott's house and mur-dered her. The ladder was found after the murder in Logan's house. Johnson further testified that he did not know what time Charlie Logan went to bed, and knew nothing of the murler of Mrs. Scott until he yas awak-cn by the general marin which was raised after the discovery of the dastardly deed.
Logan Implicates Johnson.

If is reported on good authority that while Charlie Logan was enroute to the State pententiary for safe keeping he confessed to the deputy sheriff of Greenwood county that he had murdered

of Greenwood county that he had murdered Mrs. Scott, and was assisted in the act by Will Johnson.

It was on the strength of this alteged statement of Logan's and upon the strength of other evidence uncovered by Magistrate Huckebee that the official yesterday morning placed Will Johnson under arrest and carried him to Abbeville faill.

#### WOMEN RUIN HEALTH DRAGGING COTTON SACKS

DALIAS, Tex., March 19.—The effect on the health of white women on tenant farms from dragging cotton sacks in the fields at cotton picking season was investigated by Mrs. J. Borden Harriman, of the Federal commission on Industrial Relations, at today's hearing on land problems. W. L. Thurman, of Sulphur, Okla., who said he had practiced medicine in the southwest, and is now a lecturer in Oklahoma, was on the witness stand.

"Do women," asked Mrs. Harriman, "drag cotton sacks?"

"They very generally do."

"They very generally do."
"As a physician, what do you think is the effect so the women's health."
"I positively know that the health of many women has been ruined by it," replied Mr. Thurman.
