### Farmers' Cotton Exchange.

Why not producers of cotton run their own cotton exchange, and have their own prices published in the newspapers?

Who has a better right to do this business for the cotton grower than the cotton growers themselves?

Cotton farmers just because you have been acting silly all your days by allowing others to price your stuff for you is no good reason why you should continue along this silly line when you now know better how to attend to your own affairs by lining up in an organized way with your fellow oraftsmen who are in it with you.

Come across, brother, and join the Farmers' Union.

Where is the fairness in making the cotton growers lose the bagging and ties while these same Manchester spinners make consumers of their manufactured products pay for the boxing and wrappings?

These conditions of trade could not exist if the producers of cotton would come together in an organized body and put their best business men in charge of their affairs of trade as to these Manchester Spinners.

Educate the farmer in his busiuess and he will soon learn that the only way that he can ever expect to take care of his own interest in setting a profitable price on his cotton is to combine his strength with others so as to meet combination with combination. Come along and join the Farmers' Union.

Farmers, wake up and fight succossfully in your own battles. You have labored, struggled and paid taxes for others, and upon their inloneliness, hardships, severe toil and privation in order that others might be fed. The factory, the railroad and the mill all live off the farm. People talk of labor as the source of wealth, and so it is, but it is the labor of the farmer. And yet, these men who should be the most independent men in the world, are dependent on the captains of industry, the promoters, the labo. leader and the cotton bears. It is time to end this dependence. And unless the farmers arouse themselves they will have to be content to have their business controlled by others and be called a fool or a hayseed always.

It may be asked why the speculators, etc., object to the organiza tion of the farmers? There are many reasons, each of which is an argument in favor of the former organization, when considered

successful. In Union there is strength and success. We can see this illustration every day in the business world. J. C. Rice.

Some farmers seem to act upon the principal that more scrubby their stock is the more they must have. This reminds us of the little boy who was buying knives at 10 cents and selling them at 6 cents. He said he would have to sell a lot of knives in order to make any money out of it.

We farmers have established this Union in order to establish justice, provide for the common detense, promote the general welfare, and secure the blessings of liberty to ourselves and our prosperity.

To fight the battle alone is to be lost. Association with others is an absolute necessity if we would be successful. In Union there is strength and success. We can see

Over-Work Weakens Your Kidneys.

Unhealthy Kidneys Make Impure Blood.

your kidneys once every three minutes. The kidneys are your blood purifiers, they filter out the waste or impurities in the blood. If they are sick or out of order, they fail to do their work. Pains, aches and rheumatism come from excess of uric acid in the

blood, due to neglected cidney trouble. Kidney trouble causes quick or unsteady neart beats, and makes one feel as though they had heart trouble, because the heart is over-working in pumping thick, kidney-poisoned blood through veins and arteries. It used to be considered that only urinary troubles were to be traced to the kidneys, but now modern science proves that nearly all constitutional diseases have their beginning in kidney trouble. If you are sick you can make no mistake

by first doctoring your kidneys. The mild and the extraordinary effect of Dr. Kilmer's Swamp-Root, the great kidney remedy is soon realized. It stands the highest for its wonderful cures of the most distressing cases and is sold on its merits cent and one-dollar sizes. The Land of BIG CROPS and PROSPERITY

Are you making as much off your farm as you ought? No doubt you are making all you can. The trouble is the land costs too much. It takes too much money to buy a big farm, and so you are trying to make a living on a small farm, or perhaps you are renting one and paying a good share of what you raise, in rent. Wouldn't it be better to go where the price of good land is so little that you can own a big farm—where every acre of the ground is working for you and all you raise is paying you good profits?

There are thousands of acres of fertile land in Southwest along the line of

the Cotton Belt Route that can be bought for from \$3 to \$10 an acre. This land is increasing in value each year. See the Southwest at Small Cost

A trip to the Southwest would convince you that your best interest lay in

settling there. The trip can be made at very little expense. On the first and third Tuesday of each month you purchase a round trip ticket to any point in the Southwest on via of the Cotten Belt Route at very low rates. Stop-overs will be allowed for you to examine any locality you are interested in.

Write at once for free copies of books describing this wonderful country and for full information about cost of tickets.
