Guano-Distributor

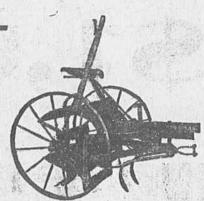

More of this style of Distributors ar esold than all others combined. We call attention to the many points of superiority found in the COLE DIS-TRIBUTOR. The Wheeland Hopper are strong-

ly made and well braced. The wheel is made of seasoned timber, two-ply, cross grained, cement nailed and held firmly by two flanges and three bolts. The feed knives have our peculiar pattern and arrangement for the best results. The cut-off is of improved design and is controlled by a lever in easy reach of the operator. This lever is in rear of hopper and protected by the handles. The gauge is positive accurate and easy to set. The whole machine is a splendid example of accuarte workmanship.

- KINGMAN-

Stalk

More good features than any other. Pressure spring in front of axle prevents neck weight on horses. Spring on hitch takes jerk off the team. Spring between pole and and frame relieves jar on

the driver. No axle through center of reel to wind trash. Double edge knives give twice the service of single edge. Axle pins not part of knife head and can be replaced when worn at slight cost. Wheels have staggard spokes and hubs have hard oil caps.

Trade Dull In Manchester But Liverpool May Take On

New York, Jan. 16.—The cotton market has shown considerably weakness during the week and while advances of some \$3 per hale from recept low records have not been fully maintained, rather a more optimistic feeling as to trade conditions and the

course of prices has been evident in the talk around the ring.

Reports of an improved spot de-mand have undoubtedly contributed to the more bullish average of sentiment, while buying has also been en-couraged by the tendency to scale down estimates of the crop noted since the publication of the last fig-ares, and the continued large domestic mill consumption as shown by the official supply and distribution figures for the month of December.

ed here during the week have re-ported a dult trade in Nam heater, but Liverpool stocks are clarker, 582. Sales, 12,000, including 11,000 small and local bulk are counting upon fairly large buy the takings for the balance of the coase.

NEW YORK COTTON REVIEW.

New York, Jan. ic .- Considerable New York, Jan. 16.—Considerable selling, which appeared to be encouraged by a somewhat beerish view of weekly statistics, the large yield of linters reported up to Jan. 1, by the census bureau and rumors, of full ginning returns for the period ending with the close of business yesterday. The closing was harely steady from 6 to 12 points.

lish over night southern spot advices. March contracts sold at 12,66c, making new high ground for the movement, but the higher level attracted profit taking, and sentiment seemed to be bearishly influenced by the census report showing 396,034 bales of linters obtained from the growth of this season up to Jan. 1, compared with 352,972 last year. Owing to numerous reports that cotton seed had been badly damaged by unfavorable weather, many traders had anticipat-ed the yield of linters this year would fall short of last season, and the official figures consequently led to revi-sion of crop views.

Rumors that preliminary returns to one of the prominent statistical buone of the prominent statistical barroaus indicated a ginning of 157,000 bales for the list period were not confirmed, but attracted considerable attention and while such a ginning would compare with 181,000 bales for the same period last year, these rumors were gize considered partly responsible for the salling movement.
