FARM KITCHEN ARCHITECTURE DISCUSSED BY DEPARTMENT

Washington, D. C., Jan. 26.—The importance to the farmer of having an economical farm house has been emphasized by the farm architect of the Department of Agriculture...

The most important building on a farm is the home. The health, comfort and happiness of the family are dependent upon its construction...

In 1910 a western farm paper, at the suggestion of the Department of Agriculture, conducted a competition for farm house plans...

Atlanta, Jan. 26.—Atlanta models of the new spring styles from Paris and New York declare that the old-fashioned bustle, or something nearly like it, is coming back into vogue...

The possible economy in the housewife's strength. Investigation of the strength of the housewife are two important factors to be considered in the construction of a farm house...

The public is awakening to the fact that better farm houses are needed, and the special feature which many farm papers now issue as a "House Building Number" proves its interest to thousands of readers...

The Office of Farm Management of the Department of Agriculture has now undertaken to investigate this problem systematically and to evolve, if possible, practical improvements for the benefit of the farmer's home...

After economy in the construction of the building and in the house work has been attained, attention will be given to developing beauty. Simplicity in line and good proportions are meant by the use of this word...

Economy Not Cheapness. Economy, however, is not a synonym for cheapness. Double strength glass may even be more economical in a tenant house than single strength...

which even the smallest house plans may well consider. Separate dining rooms for families that generally eat in the kitchen are less important, as are "parlors."

For the average farmer, economy bars a room especially reserved for weddings and funerals. A back stairway in small houses is an unnecessary luxury.

It may not be found practicable for the Department of Agriculture to furnish plans and specifications of farm house worked out for particular individual needs.

Bustles Are Coming Back in the Fashion

Atlanta, Jan. 26.—Atlanta models of the new spring styles from Paris and New York declare that the old-fashioned bustle, or something nearly like it, is coming back into vogue...

The most striking fact that is apparent, they say, from the new advance models, is that the likeness of the bustle, the old-fashioned bustle that had been a serious foothold...

FLORENCE SENT INVITATION

Asked the Assembly to Visit the Industrial School and See Work Going on There. The senate was not in session Tuesday, but will meet for a short while Tuesday evening before the joint session.

There has been some talk of the general assembly taking a trip or so this year, but nothing definite has yet been decided. It has been the custom for the members to go to Winthrop or other educational centers to see the work that is being done by the State's institutions.

The citizens of Florence have arranged an interesting program in the event the complete membership of the house and senate meet in that city, and according to the Florence papers, the Florence delegation has been asked to press the invitation so that the members of the general assembly might see for themselves the great work that the Industrial school is doing for South Carolina.

Table with 2 columns: Item description and Amount. Includes Maintenance and Stables, Building and equipment, Barn, Extra clothing, Laundry.

CEDAR SPRINGS FARMERS MEET

Chamber of Agriculture Organized by Citizens of Progressive Community

On Saturday night, January 24th, 1914, notwithstanding the unfavorable weather, a goodly number of the citizens of the Cedar Springs community met in the Woodmen hall at the spring, for the purpose of considering the advisability of organizing a community association or chamber of agriculture.

Dr. Walker, on taking the chair, made a clear-cut and most interesting statement regarding the farmers organizations with which he had been connected. All these had done good and had accomplished lasting benefits; but these organizations had possibly been launched on too large a scale and at the outset had undertaken too many big things at the same time.

The proper proportion of sand and clay can be determined, however, as the work progresses, as some clay will contain more sand than others. In fact, clays are very frequently found which already contain about the right proportion of sand.

If the road to be treated is sandy, the surface is first leveled off and crowned with a road machine, the crown being about one-half inch to the foot from the center to the sides. The clay is then dumped on the surface and carefully spread, so that it will be from 6 to 8 inches in depth at the center and gradually decreasing in depth toward the sides.

The best results have been obtained by thoroughly mixing or mounding the materials when wet. For this reason, it is desirable that the mixing be done in wet weather. The materials have been properly placed, but this involves a whole winter and spring of bad road, and even then the mixing is not always satisfactory.

Atlanta, Jan. 26.—Judge Richard B. Russell, who has automatically become chief justice of the State court of appeals, will have no opposition for re-election to the bench, according to statements made here today.

At the suggestion of Dr. Walker known local attorney, has already formally announced his candidacy. Judge Bonan of the local superior court also has a race on his hand, as Recorder Nash B. Boyles has entered the lists in opposition to him.

The fact that Judge Russell will have no opposition in a year, when opposition is rare, is a strong tribute to a man whose friends and associates agree is one of the hardest working judges who ever sat on any bench in Georgia.

Special to The Intelligencer. Sept. 27.—The weather man has certainly been good to the farmer during the first half of this month, and they have not failed to take advantage of it for it has been a rainy season since farm work was started at this time of the year.

What is needed is an up-to-date, modern school building at this place, one that is in keeping with the progress of the community. However, we are bitterly opposed to a bond issue for this building as some of the patrons seem to favor. Lebanon, one of the oldest country churches to be found any where and they got it by going down into their pockets and paying for it and now the same push, energy and get will put out a new school building. No bond issue was necessary in a new church building at Lebanon and the same

SAND-CLAY ROADS AND THE TIME TO WORK THEM

Washington, D. C., Jan. 27.—There are at present about 35,000 miles of sand-clay roads in the United States, mainly in the Southern States, according to the Office of Public Roads, U. S. Department of Agriculture.

The approximate mixture of sand and clay may be determined by filling a vessel with a sample of the sand to be used, and another vessel of the same size with water. The water is poured carefully into the sand until it reaches the point of overflowing.

After the clay on sand, or the sand on clay, is completed, it should be carefully maintained until the surface becomes firm and smooth. The construction of this type of road is by no means a quick operation. If soft, sticky places appear, more sand should be added, and if loose, sandy places are found, more clay is needed.

It requires approximately 1 cubic yard of clay to surface one and a half running yards of road 12 feet in width, or about 1175 cubic yards to the mile. From three-fourths to 1 cubic yard will make a road for two horses on a dry clay road. The cost of the road will, therefore, depend largely upon the distance the material is hauled, the average being from \$500 to \$1,000 per mile.

people are behind this modern school building that built the church. Mr. and Mrs. Foster Mullikin, visited Mrs. Mullikin's parents, Mr. and Mrs. John Hall at Pendleton last Sunday.

No, no, Samantha, don't think that every man you see riding in an automobile is a millionaire, neither is every man you see riding into town in a two-horse wagon a pauper.

Miss Annie Eaton, a charming young lady is spending sometime with friends and relatives in and around Septon.

The many friends of Mr. S. R. Timms are sorry to learn that he is a very sick man. Only last Tuesday Mr. and Mrs. Adams buried their little nine-year-old baby girl she, having died of pneumonia and was sick just one

FROM SEPTUS Special to The Intelligencer. Sept. 27.—The weather man has certainly been good to the farmer during the first half of this month, and they have not failed to take advantage of it for it has been a rainy season since farm work was started at this time of the year.

materials have been thoroughly mixed, and to give it a crown of not more than one inch or less than three-fourths inch to the foot from the center to the sides. A light coating of sand may then be added. The use of the road machine or drag should be continued at frequent intervals until the surface is smooth and firm.

The road to be treated is composed of clay, it should first be brought to a rough grade with a road machine. The surface should then be plowed and thoroughly pulverized by harrowing to a depth of about 4 inches after which it is given a crown or slope of about one-half inch to the foot from the center to the sides.

After the clay on sand, or the sand on clay, is completed, it should be carefully maintained until the surface becomes firm and smooth. The construction of this type of road is by no means a quick operation. If soft, sticky places appear, more sand should be added, and if loose, sandy places are found, more clay is needed.

It requires approximately 1 cubic yard of clay to surface one and a half running yards of road 12 feet in width, or about 1175 cubic yards to the mile. JOB PRINTING

THE plant of The Belton News has been purchased by us, and it will be run as a Job Printing Plant. Already splendidly equipped, additional machinery and equipment will be added to enable us to handle all orders, large or small.

Competent and Experienced Workmen will be employed and our efforts will be to merit the patronage of those needing commercial stationery.

Let Us Do Your Printing

The Anderson Intelligencer

JOB PRINTING DEPARTMENT BELTON, :: SO. CAR.

week. We hope and trust that Mr. Timms will soon be better and well in a few days in his usual good health.

Miss Yelda Wyatt, a beautiful young lady of Basely, is visiting her grandparents, Mr. and Mrs. M. B. Richardson for a few days.

If we had our way "raller" cars would look as tame as defeated candidates after election.

Lebanon's Sunday school teacher—John did you ever resist temptation? John—Yes'm, once.

Teacher—And what noble sentiment prompted you to do it? John—The jam was in the top shelf and I could not reach it. Yes, and the jam being on the top shelf is why a great many grown people do noble things.

There is some talk of a store exclusively for groceries being opened up at this place, this fall and we are sure that such a store would do good business.

When last seen our young friend and cousin, Mr. C. M. (Bub) Deery, rympled his himself on high gear with brakes off, and had in hand, going toward Stoke's bridge at the rate of seventy miles an hour. His friends understood all when they found that a fine set of twin girls had arrived at his house. The mother and babies are doing fine and we hope they will find "Bub" all right and that he will get back home in time to make a crop.

The Intelligencer continues to grow in favor with the Septuagesim, and may its popularity never wane. W. L. C.

First Cecil

Special to The Intelligencer. The health of the community is exceedingly good. All of the labor are busy splitting wood for the summer uses and the ladies are busy quilting.

Mr. and Mrs. Will Murdock and family spent Sunday with the latter's mother, Mrs. C. P. ...

Mr. and Mrs. George Brock were the guests of Mr. and Mrs. H. B. Brock Sunday.

Among those visiting in Fair Play last week were Mr. and Mrs. Wilson Tathen, Messrs. Kearn Brock, Henry Meeks, and Joe McCurry.

Miss Mildred Bonds spent Sunday afternoon with Misses Maggie and Winnie Hawkins.

Mr. and Mrs. Ellis Clapp of Belton were the guests of Mr. and Mrs. D. A. MacClain the first of the week.

The Asheville school is progressing nicely under the management of Miss Gertrude Chisholm.

Rev. O. L. Martin filled his regular appointment at this place Sunday.

Mr. Joe Hall attended preaching at Mrs. ...

Messrs. Kearn Brock and Clyde Murdock were out driving Sunday afternoon.

Mr. Otto Bonds visited Mr. Charlie Tyler Saturday night.

Will close for this time. Will call again soon if this escapes the waste basket.

Star Sluggo of Nashville Defeated Offer of \$45,000

Greenville, Jan. 27.—Joe Jackson, star outfielder of the Cleveland Americans, today announced that he had refused an offer from the Federal League of a \$45,000 contract, covering three years. Jackson said he had signed a contract with Cleveland over a week ago at an advance in salary over last season's figure. President Somers and other officials of the Cleveland club have been glad to hear said Jackson, and I would rather play with that organization than any other in the big leagues.
