Williamston, S. C., January 7.—
This section and Piercetown is greatly pleased over the prospects of the Greenville road being made one of the best roads in the county. We understand that Commissioner Vandiver has given assurance that the road will be widened to the limit allowed by law and graded, wherever in need of grading. This is already a very good road and with the improvements contemplated in will be second to none. With the building of a good highway from Anderson to Piedmont and the building of the Abbeville-Anderson and Easley electric road we look for great things for Piercetown. In the near future we look for this to be a live, thrifty, bustling little city.

The majority of Senator Smith's remarks were in the line of a detailled and olear examination of the fundamental principles and workings of the new currency law. He predicted that it would make the currency of the country more clustic and would greatly facilitate the removal of money from a section where it was not noticed to a section where it was not noticed.

A steady stream of gold has been flawing for centuries into India. One might say streams of gold flowing thence, for since India produces comparatively little gold herself she lays the whole world under tribute. Finnelly any of this gold returns. It is as if the earth of India had opened and swellowed it up. The American tourist in India, who parts from a severeign or a five dellar gold piece may be received the country of its minitug.
