

The Most Profitable

... Fertilizer To Be Used Is ...

for red lands, 8-3-3-9-3-3-10-3-3; for gray lands, 8-4-4-10-4-4.

You get more for your money in these analyses than in the lower grades.

The freight incoming and outgoing, labor account and general expenses, is just as much on a ton of 10-2-2 as it is on a ton of 10-4-4. The difference in the cost of the goods is the difference in the cost of the extra material in the 10-4-4 and then you get Fish in these high grade goods and fish lasts longer in the soil than any other ammoniate going into Fertilizer.

The longer your fertilizer lasts the longer your crops will keep growing.

The longer you keep your crop green and growing the better crops you will make.

The difference in cost per acre is very little, say One Dollar an Acre, the difference in the yield of cotton is much more than that.

The high grade goods are the economical goods to buy. The Anderson Phosphate & Oil Company goods are the goods to buy. They use the very best of material and use plenty of it.

Buy goods made by

THE ANDERSON PHOSPHATE & OIL CO.

The Price is the same and the goods are better

YOU'LL LIKE THE SERVICE

you get at this restaurant. From the time you enter until you leave, every attention that will attend toward your comfort will be shown you. Your order will be promptly taken and as promptly filled. You'll wonder how we can cook things so quickly and perfectly as we do.

Labor Savers

Whether you employ a servant or not, labor-saving devices in the home will pay. Household affairs run more smoothly—more work can be done. Situations in such houses are more sought after and more persistently held on to. Labor saving, Time saving, Comfort saving devices pay in the end.
