FARME

We guarantee they will do the work properly.

THINK

Knocker Feed Instead of Force Feed

45 FF25 F 25 7 .

if Desired

This machine is used by farmers who wish tovering plows instead of an opening plow. It is used by many who whill a lower priced machine than our approader and cultivator No. 25, and it is a real topor saver. It has a large reliable force feed that can be regulated to sow from 100 pounds to 1,500 pounds of guano to the acre. It has a very large hopper. The double foot sows the guano in a broad stream throws two good furrows upon it. This protects the guane and saves chough plowing to pay for itself ma few days. The plow feet are strong—firmly attached to the side beams, so that good plowing can be good.

Do not let anyone sell you an imitation or an experiment They may claim it is just as good and offer it for less money than the Cole. Still, they make a big profit, and you may have to throw it aside and get a Cole before you are satisfied or fixed right for planting.

There are many chemply made initiations of this; muchino as the nursket. They have a teleplar spearance—may seem the same, but they carried be git to construct the construction and

the work tiey do.

The Cole Guane Distributors No. 20 and 21 have motion in front of the wheel and are very useful in opening furrows and sowing at the same time. With one of bless machines you can run beside growing crops and apply guano at just the right time to make the copp retain its squares and fruit

growing crops and apply guano at just the right time to make the coop retain its squares and trust heavily.

No. 21 is made with the knocker feed, and No. 29 with the famous Cole force rees! No better distributors have ever been made at the price.

These machines—just like the fligher price Cole implements—will prove so downright useful that you will wonder now you ever got along without them—why you ever were content to public with out-of-date faulty machines when you could own distributors like these.

For even the lowest priced machines, we use the best grades of steel adapted to the work. Every machine is impuried again and again so there can be no flaws: For wooden parts requiring strength we employ the toughest oak.

Cole Planters and Cole Distributors are known as the standard implemental used by Propressive Parmers.

Cole Plantors and Sprenders are equally good, and if you use Cole farming implements you may

THE ASYLUMNIX-UP.

Newberry Observer.

The act appointing an asylum commission, looking to the building of a new asylum, was passed in Gov. Ansel's administration in 1910 and something like two thousand acres of Ansel's administration in 1610 and something like two thousand acres of land was bought six miles north of Columbia—a beautiful iscation. The land and the buildings and requipments, it was supposed, would cost something like a million and it was proposed afterwards to vote a million in bonds for the purpose. The people were urged to vote the bands, the argument being that the old skylum property in Columbia would be sold and would bring that amount, to pay for the new. But the bands falled by a narrow vote. Large stuis have been appropriated and borrowed for carrying on the work at the new location, called State Park.

The first commission was composed of Dr. Babcock, Dr. Gromer, ex-Judge Purdy and two others, whose names we do not now recall. The act provided that the commission and secretary—neither receiving pay, except per diem and expenses is other.

elect their own president and secretary—neither receiving pay, except
per diem and expenses, is other,
members of the commission. Dr.
Babcock is still the chairman, but the
other members have been changed,
and dos, the past two years or more.
Col. F. H. Aull of Newberry has, been
secretary, receiving as shown by the
annual report, \$300 a year as secretary and also about thousand dollars a year in addition as secretary.

to Anderson court flowse, (intouting the branch neare provided for
to them shall seem necessary and proper to secure a reasonable and adequate return upon the capital invested: Provided that the average annual yield on such capital shall not be per centum, after all expenses have been paid."

Exclusive Franchise.

The company was given 13 months in which to raise the capital stock, and was given an exclusive franchise for 36 years, after which time other companies might come in and ask for charters, subject to the action of the general assembly. The company was also given permission to unite with the South Carolina railway company.

The charter is signed by Augus Patterson, president of the Senate and Chas, F. Colock, speaker of the House. On the 18th of December, 1846, the

RESUME OF GENERAL ASSEMBLY.

Columbia, Feb. 22.—Of questionable greatness as a deliberative body, the senate of South Carolina is beyond

district vote in favor of it; the Hard per hill to require the registration of all births and seaths in South Unro-line of any one of a helf dozen other office or a toustructive mature which which are either buried in a senate

universe to the lite and a line to so anything it does not have so do in the way of the distance except pass the appropriate of the literature of the county supposed to the county sup proprietates bill and the county sup-ply bill at this session. Of course, the appropriation hill must be some a law, or there won't be any or mose now little green and blue harrants on U issue treasure to pay the sen-aturi board bills ste.

senate of South Carolina is beyond defined on any measured to the shadow of a doubt one of the does not change a stagle of most deliberate bodies in history. Its speeches are intended for record for taking the longest time to sumption, and yilsa the n do nothing bega comparison.
