SIX AND TWENTY FROM SEPTUS

Williamston, March 31.—Today to a close the third month of the year 1914, and the farmers have never had any more work done toward making a crop than they have at the present time. Many have their preparations so far advanced that they begin planting their cotton crops. Some have already planted their corn and some will wait and plant corn later and thereby try to escape the corn worm.

We are to have a Children's Day at this place sometime in the near future. This will be something new for Six and Twenty, as we have always tried heretofore to stay behind every other community. We have yet a few back numbers who want to oppose any thing that is calculated to benefit church and Sunday school up to the place where they can talk a recent war with the other progressive churches are less in numbers every day. So and schools in the county, but they are beginning to see the light shining and note it.

A local matter that will be watched with a great deal of interest in other sections as well as in this is that of some taxpayers who reside in the school district (Belton) are their property for Lebanon district. The trustees of this district will try to recover the taxes of so much of them as go for school purposes for the benefit of the Lebanon district.

And now since editors have such a good time, we are almost persuaded to aspire to a like position ourselves, for in addition to getting out from one to six papers per week, the only thing left for them to do is to write questions, answers, a baseball game, report weddings, saw wood with nice literary epithets about mean people when they die, describe a fire so that the readers will shed their wraps, make one dollar do the work of ten, shine at a dance measure called, abuse the liquor habit, fast whisker, subscribe to charity, go without meals, attack tree silver, wear diamonds, invent advertisements, sneer at snobbish, overlook scandal, appreciate babies, delight pumpkin raisins, and so on.
