Glenn-McDonald.

A beautiful Easterlike wedding was that of Miss Bessie Glenn to Robert C. McDonald, Jr., at the home of the bride's father, Mr. W. Henry Glenn. The parlor hall and stairway were decorated in white and green, ferns, palms and vines being used. The parlor was darkened and lights from many candles beautified the wedding scene. In the other rooms purple violets and hyacinths were used, purple being the bride's favorite color. Mendelssohn's wedding march was rendered by Miss Helen Burress, at the first strains of which Misses Mary Lipscomb and Gertrude Douthit entered carrying wide tulle ribbons forming an aisle. Rev. John F. Vines then took his place in front of the altar, which was banked high with palms and ferns. Next came Misses Hazel Gilreath and Jean Harris. All four of the bridesmaids were dressed in white lingerie dresses and carried round bouquets of purple hyacinths. When entered four dames—Mesdames W. D. Workman, L. James Whitte, Jake W. Sullivan, E. P. Coffield. Next came the best man, George Willis and the groom, Robert McDonald, followed by the little ring bearer, Master Kelly Sullivan. Miss Annabel Glenn, the young maid of honor came in, then the two dainty little flower girls, Margaret and Elfreda Glenn, scattering white hyacinths in the path of the bride, who entered on the arm of her brother, John Glenn. During the solemn and impressive ceremony soft music was played by Miss Burress. The bride never looked more beautiful than she did as she stood at the altar dressed in white crepe net, entrails trimmed with chiffon and pearls. Her long veil was arranged over her hair and held by a coronet of white hyacinths and her shower bouquet was of the same flower. After congratulations a salad course was served by a bevy of young girls.

THE SPRING TOOTH CULTIVATOR is today recognized as one of the greatest labor-saving implements, especially since it has reached its high state of perfection found in the CHAMPION

We have made it our aim to improve our famous CHAMPION Cultivator, so that today it stands without an equal.

The Adjustment is the simplest ever used on a cultivator, and yet is the most rigid. The adjusting bars are wedge-shaped—thicker in front than in rear—the harder the strain, the tighter they hold. These bars are shelled, a bolt passing through them and through the beam, tightens on top by a crank nut.

The teeth are full size, oil tempered, with only one hole in them, and are held strongly by double rear cross-bars. We use 3-8 inch bolts in these teeth—most manufacturers use 5-16 inch.

We ask our farmer friend to do just one thing—examine the Champion Cultivator, compare it with any and every other on the market. Then buy what is, in his judgment, the BEST. We know, and thousands of farmers know, that the best is
