Thoughts ON Easter

By 'UNCLE DAVE'

This is the Easter month and brings with it a sense of rejoicing that we are safely through the winter and the earth is again smiling at the gentle touch of spring.

Christmas, which we celebrate as the anniversary of the birth of Christ, is typical of hope and joy, although it comes at a season when the suspension of Nature's animation hardly accords with the sentiment of the occasion.

But in spite of the short daylight, the cold, inclement weather and other forbidding conditions, the joyous spirit of Christianity inspiring the human soul triumphs over adverse physical conditions and makes Christmas bright with happiness and joy.

This should be a constant reminder that the world is what we make it, and should teach us the important lesson that true happiness is from within and that we can and with true Christian fortitude, should rise superior to circumstances.

Easter, which commemorates the resurrection of our Lord and Savior, is beautifully emblematic of immortality which He came on earth to bring to light.

As the resurrection was the crowning act, the glorious consummation of the earthly mission of the Son of God, so Easter surely should rank as high as any of the Christian festivals.

Christmas, like your own birthday, always comes on the same day of the month; but do you know why Easter always comes on Sunday and may have a variation of thirty-four days in different years, coming anywhere from March 22 to April 25?

It is because Easter is always the first Sunday after the first full moon which comes after the 21st day of March.

Does not that seem a strange way to determine a sacred festival? But there is a historic reason for it found in the Bible. Read in your old Testament how, when the Children of Israel were held in bondage in Egypt, the Angel of the Lord in order to punish the Egyptians for their cruelty, in a single night slew the first born in every Egyptian family and passed over the houses of the Hebrews without harming them.

In obedience to the command of Moses the Jews ever since have celebrated the anniversary of this occasion as their greatest feast day. They have always called it 'The Feast of the Passover,' and they make more of it than the Christians do of either Christmas or Easter.

When the kingdom of Judah was in its palmy days and Solomon's temple was the crowning glory of Jerusalem, it was no uncommon thing for the multitude that assembled annually for the Passover from all parts of Judea to number three million souls.

Of course Jerusalem could contain only a small part of this vast throng, so the journey with their families on foot or with ox carts or donkeys, emptying on the road wherever night overtook them, and when they reached the Holy City their tents covered the hills for miles around.

We think, without railroads and improved means of transportation that a hundred thousand people is a large crowd to attend any kind of a celebration but what would we think of three million people coming long distances to celebrate Christmas or Easter now?

The Hebrews have a calendar of their own which dates back to the time of Pharaoh, and their months run according to the moon, beginning a new month with every new moon, and giving them twelve months averaging twenty-nine and a half days to the year except on leap years which have thirteen months.

The astronomical spring begins each year on the 21st day of March, at which time the sun crosses the line of the equator in coming north.

The Feast of the Passover came on the first full moon after the sun crossed the equator in the spring, and every Hebrew that could possibly afford the journey used to go to Jerusalem in the olden times to celebrate it there.

Now turn to your New Testament and you will read how the Savior, one week before he was crucified journeyed to Jerusalem with his disciples to eat the feast of the Passover.

It was to celebrate the Passover the better that the Jews demanded of Pilate, the Roman governor, that he should give Jesus to them to be crucified. And he complied with their request.

It was on Friday that Jesus was crucified, and he was placed that same night in the new stone tomb cut out of the solid rock.

The next day, Saturday as we now call it, was the Jewish Sabbath. There were seven days in this week then the Jews observed as a holy day.

All through the Old and New Testament whenever the Sabbath is mentioned it means Saturday, the last day of the week which the Jews still observe as the Sabbath.

All through the Sabbath Christ lay in the tomb and just at daybreak of the next morning (the morning of the day we now call Sunday) the angel from heaven uttered by a peal of thunder and a earthquake shock and rolled the stone from the door of the tomb and set upon it.

The Roman soldiers guarding the tomb fell senseless with fright and shock. Then Christ rose from the dead and walked forth to meet the two faithful and devoted disciples who came early to visit his sepulchre.

This was the beginning of the first Easter and the first Sunday. This is why all Christians observe Sunday, the first day of the week, instead of Saturday, which the Jews still observe as their Sabbath.

million people coming long distances to celebrate Christmas or Easter now. The Hebrews have a calendar of their own which dates back to the time of Pharaoh, and their months run according to the moon, beginning a new month with every new moon, and giving them twelve months averaging twenty-nine and a half days to the year except on leap years which have thirteen months.

The astronomical spring begins each year on the 21st day of March, at which time the sun crosses the line of the equator in coming north.

The Feast of the Passover came on the first full moon after the sun crossed the equator in the spring, and every Hebrew that could possibly afford the journey used to go to Jerusalem in the olden times to celebrate it there.

Now turn to your New Testament and you will read how the Savior, one week before he was crucified journeyed to Jerusalem with his disciples to eat the feast of the Passover.

It was to celebrate the Passover the better that the Jews demanded of Pilate, the Roman governor, that he should give Jesus to them to be crucified. And he complied with their request.

It was on Friday that Jesus was crucified, and he was placed that same night in the new stone tomb cut out of the solid rock.

The next day, Saturday as we now call it, was the Jewish Sabbath. There were seven days in this week then the Jews observed as a holy day.

All through the Old and New Testament whenever the Sabbath is mentioned it means Saturday, the last day of the week which the Jews still observe as the Sabbath.

All through the Sabbath Christ lay in the tomb and just at daybreak of the next morning (the morning of the day we now call Sunday) the angel from heaven uttered by a peal of thunder and a earthquake shock and rolled the stone from the door of the tomb and set upon it.

The Roman soldiers guarding the tomb fell senseless with fright and shock. Then Christ rose from the dead and walked forth to meet the two faithful and devoted disciples who came early to visit his sepulchre.

This was the beginning of the first Easter and the first Sunday. This is why all Christians observe Sunday, the first day of the week, instead of Saturday, which the Jews still observe as their Sabbath.

So you see the first Sunday was Easter Sunday and it followed the feast of the Passover which came at the first full moon after the 21st day of March.

On Easter morning take your Bible, read carefully the wonderful description of the resurrection in the 28th chapter of St. Matthew and see if Easter does not have a new meaning for you.

Easter Sunday commemorates the greatest event in the world's history, the central fact on which depends the transcendent faith of every Christian.

Uncle Dave.

Table with market prices for various commodities including Corn, Lard, Ribs, and Pork.

No Liverpool Market. South Williams.

South Williamston April 13.—Gray Eagle Tribe No 43 of the Red Men of this place will be represented at the State camp fire at Lock Hill this week by B. B. Gossett, A. G. Pinckney, past incohonee of the state; O. D. Gray, grand junior sagamore, M. F. Adams, Ben Reed, W. I. Mabaffey, W. T. Campbell.

There will be an all day singing at this place on the fourth Sunday. The public is cordially invited.

Mr. Hiram W. Kirby, manager of the Williamston mill store made a business trip to Calhoun Falls last week.

Miss Bettie Robinson of Greenville has been visiting Miss Flora Adams.

Mr. and Mrs. C. M. Timmerman of Greenville spent the week end in the city with relatives.

Mr. Jas. P. Gossett, president of the Williamston mills, has been in Greenville on business.

Mr. A. C. Alexander, was called to Abbeville Friday on account of the serious illness of his brother.

SOUTH CAROLINA'S FUTURE PEACH CROP Twenty Thousand Young Trees Have Been Set Out Since Early Spring.

Clemson College, April 11.—More young peach trees have been set out in the Sand Belt of this State since November than have ever been planted in any year since a young peach tree was first set out in South Carolina.

Twenty thousand young peach trees have been set out in this time by C. E. Niven, assistant professor of horticulture of Clemson college in cooperation with the farm demonstration work. These young trees, the greatest addition to South Carolina's orchard crops ever made at one time, were planted four hundred to one thousand to an acre. They are doing well and are expected to reach maturity successfully.

Prof. Niven, however, did more than set out twenty thousand trees. He has also since November, removed seven thousand old trees, in all parts of the state, about 75 per cent of which were peach and the remainder apple and pear. Prof. Niven will at once begin the task of keeping the young trees in good condition and of spraying the old trees throughout the warm weather for insects and fungus diseases.

His work has meant more to the farmers than the mere setting out of or pruning and spraying of trees, since in most cases he has notified farmers in advance to have their neighbors present at the orchard demonstrations and in this way has spread a knowledge of correct horticultural methods into every neighborhood in which he has gone.

Prof. Niven feels convinced that South Carolina is capable of becoming a great peach state and he is working especially hard with peaches. The results of his one season's work are expected to be, when the trees reach bearing age, a peach crop larger than any before produced in the State.

TOWEL STERILIZER W. E. HAZOR Says That They Are Best Germ Killers.

Editor The Intelligencer: It is only to Dr. Mitchell our great inspector in regard to the sanitary laws governing the barber shops of Anderson, I am in favor of your fine improvement to make our shops as safe as any possible and in regard to the towel sterilizer, I want to advise a few things.

I have had the so-called 'towel sterilizer' that I described in my letter to you and I consider it to be nothing but a germ incubator. When these so-called 'towel sterilizers' are used the barber will have a towel on his customer's head, and when the next customer comes in he gets the same towel. This towel is used day after day and is saturated with three or four millions of germs. This amount of germs makes the dirt which is on the towel, a germ incubator.

These so-called 'towel sterilizers' are used in small towns where there are no municipal water works and where the water is 'well water.' So I think you can easily see that these so-called 'towel sterilizers' are anything but germ killers in a first class barber shop.

In regard to the towels I advise Mr. Hayward, the proprietor of the Anderson Steam Laundry, to have our towels washed with live steam and to use a germicide. I do not think it is possible to have towels germ free to go through this process of washing.

In regard to the sanitary laws of the State I think the barber shops we do not get an inspector with a certificate of health or a certificate of health.

W. E. HAZOR.

FERTILIZE YOUR CROP

In fertilizing your cotton and corn, care should be taken to apply at least 600 pounds of high grade fish, blood and bone fertilizer to the acre for the best and most lasting results. Where less than 600 pounds of fertilizer is used to the acre, it acts as a stimulant only, and the crop takes more plant food from the soil than it furnishes, and your soil runs down, but where you use 600 pounds or more of fine fertilizer to the acre, you furnish the soil with more plant food than the crop takes from it and your soil improves. And besides, the more fertilizer you use, the faster your crop grows and the quicker your land is shaded and you know that is an advantage. And then with heavy fertilization you have larger stalks, more limbs and leaves and bolls. This gives you more vegetable matter for the soil this vegetable matter furnishes humus for the soil and soil without humus is like leather without oil, its usefulness is greatly impaired. And then heavy fertilization makes more bolls and this makes more bales, and there is where you make your money in farming.

The difference in cost of fertilizing an acre with 400 pounds and 600 pounds of fertilizer is around \$3 an acre, the difference in the crop will be at least 100 pounds of lint cotton and at present prices that is a little the rise of \$13.00. That is how it pays. There is no doubt of its paying and 600 pounds to the acre will pay better than 400 pounds or 300 pounds. Unless the ground is in an unusually high state of cultivation we doubt if it will pay to use more than 600 pounds to the acre for cotton or corn. If your lands are red our 8-3-3 or our 9-3-3 or our 10-3-3 is about what you need.

If your lands are gray use our 8-4-4 or our 10-4-4. If you are a little late in planting, use our 10-3-3 or our 10-4-4, as the extra percentage of phosphoric acid will hasten the growth and maturity of your cotton. If you don't care to use 600 pounds to the acre on all your crop, try it on half and see where you make your money.

We are getting out a fish, blood and bone goods that has no equal, and farmers using it this year will have an advantage in crop making that people who are deprived of it will not understand. We hope you have noticed the analysis of our goods this year, issued by Clemson College. Not a single sample has come down the analysis of every one of them stands up like a little tin soldier. Where the price is the same, get the best.

ANDERSON PHOSPHATE & OIL CO. J. R. Vandiver, President. D. S. Vandiver, Manager. P. S.—If you have bought other goods try some of this anyway.

SEE BRONCHO BILLY and the RED MEN Great Western Drama At the PALMETTO THEATRE TODAY SATURDAY, APRIL 11th.

THE CHARM OF MUSIC What more rapturous than to hear some popular air exquisitely played on a Flauto! Good instruments are not expensive. They may appear so. When the quality and life of a Flauto at \$250.00 is compared with one at \$100.00 that costing the same is found to be the cheapest. We charge less for what is good than others charge for what is poor.
