FACTS No. 10 ECONOMY

Previous Fertilizer Facts have treated with CO-OPERATION, EDUCATION, GREATER PROFITS.

And now comes that subject which is the basis of all lasting wealth as defined above—ECONOMY.

Practically applied, what does Economy mean? Is it in buying theap cotton seed, corn and grain that gives you only half a stand?

Is it in you making a pair of slices out of materials that cost \$1.50 that will wear out in sixty days when a pair that costs you \$2.00 will wear a year?

fe it in spending lifty cants for a medicine which you think you need when a \$2.00 visit from a physician will put you on your feet in a few days 2.

Is it mixing your own fertilizer unevenly so that some plants get all the nitrogen and run to stalk; others all the potash and bear heavy fruit with no body; or is it buying Commercial Fertilizers where only the most carefully selected materials, thoroughly analyzed, chemically tested and accurately balanced are mixed under careful and watchful supervision by the most modern machinery, which INSURES a uniformity in the goods offered?

At the outside there is only about 30 cents an acre difference in the cost of the two fertilizers mentioned above, and 30 cents is dirt cheap for the insurance on your crop certified to through the analysis on every bag of goods you buy.

The opposite of ECONOMY is EXTRAVAGANCE, which is oftentimes caused by being "Penny wise and pound foolish." Remember, "strict husbanding of resources and regulation with respect to production" is the accepted definition of Economy. The time to make money on your crop is when you are producing it. The way to make money on your crop is to keep down the cost.

GOOD WEATHER LOWERS COTTON

Trading On New York Exchange Has Narrow Range In Prices Most of Session

New York, May 5.—Prospects for letter weather in the Southwest and July ilquidation attributed to some of the more prominent local interests seem A reasonable for quite a sharn deel as in today's cotton market.

Private cables attributed the rolatively firm showing of Liverpool to American and continental buying on unfavorable crop accounts and the local market opened steady at an advance of 3 to 6 points on overnight buying orders. There was a good deal of realizing at the initial figure, and the market spon turned easier.

When the first May notices were issued find an analysis on nearly even terms, while at further reports fro the Southwest find close today May showed a prendim of about thirty points. There were further reports from the Southwest of about hirty points. There were further reports from the Southwest of about hirty points. There were further reports from the Southwest of damage and necessity for replanting, but not many complaints were received from east of the Mississippi river and the outlook for clearing weather in the southwest appeared to offset both private damage reports and the unfavorable features of the official weather review.

Cotton futures closed steady.
