Map Showing Available National Guard Troops In the United States and Points of Embarkation if Called

Railroad officials from Portland, Me., to Portland, Ore., and from northern Michigan to the southeastern corner of Texas are engaged in working out the transportation plans to meet a possible call by the war department for the carrying of 200,000 men to the most convenient point on the southern coast or border for transportation to Mexico. As the quartermaster's department has figured out the movement of the land forces so far, the principal points of mobilization in this country will be New York, Washington, Chicago, St. Louis, Kansas City and Denver. The term "mobilization" as applied to these cities means, of course, merely a centralization point for transportation purposes, with as little delay as possible in railroad movements. The places adjacent to Mexico at which army forces would most likely be held for division in making up various commands to enter Mexico would, it is said, be New Orleans, Galveston, San Antonio, El Paso, Douglas, Ariz., and Los Angeles, Cal.

CANDIDATE AGAIN?

William R. Hearst to Keep Open House For the Shriners.

Atlanta, May 7.—William Randolph Hearst is to become an Atlantian during the Shriners' convention next week. Mr. Hearst has obtained a short time lease on the palatial home of Captain J. W. English, Jr., on Peachtree street to keep "open house" for the Shriners.

The first plan which Mr. Hearst discussed, was the holding of one or two elaborate receptions, but it was decided later to have a kind of an informal house warming that will keep the mansion open for all the Shriners at all hours of the day or night.

The pantries are to be lavishly stocked with refreshments, both eatables and drinkables and all the Shriners will be welcome. It is rumored, by the way, that Mr. Hearst is going to entertain in the same mansion in a different way for the grand opera stars next season.

The Shrine plan grows now in size and magnificence as the last days pass. Every hour brings new developments and indications point to the largest crowd that has ever gathered for any purpose in the southern states.

Under the direction of the local Potentate Forrest Adair a splendid organization has been completed here for the housing and entertainment of the crowds, and Atlanta is prepared in every way to open up to the new and gigantic task set her as a dispenser of southern hospitality to over 30,000 guests.

Every individual Atlantian is aiding in the preparations. Hundreds of homes have been thrown open to accomodate the the overflow from the hotels and parked Pullmans, while practically every merchant in the central part of the city is aiding by decorating the front of his store.

Many of the tallest skyscrapers are already elaborately draped with the many colored flags from top to bottom, while festooned chains of electric lights cross the streets in many directions. The capital dome is outlined in lines of fire and gigantic Shrine emblems are hung everywhere.

ANDERSON COTTON MILLS

The attendance at the revival services at the Bethel Methodist church is increasing daily and much interest is being manifested.

Rev. T. H. Danner is assisting his brother, the pastor, Rev. Sam Danner. The meeting will continue all the week and everybody is invited to attend the services.

Mrs. H. M. Thacker has returned home after spending a while with her son, Otto Thacker, in Atlanta.

Mrs. Fannie Pennell and son, William, spent Sunday in Seneca.

Mrs. S. D. Nicholson of Walhalla is visiting her mother, Mrs. Lindsay this week.

Miss Bella Burroughs is visiting in Atlanta this week.

Mr. A. B. Hamlin has moved his family to McCormick, S. C.

Miss Sallie May Patterson of Abbeville is visiting the Misses Heaton this week.

Mrs. J. W. Abbott and daughter, Ms. Joe Colley and little son of Walhalla are spending the day with Mr. and Mrs. F. J. White.

Mr. W. S. Stone has moved his family to Central, S. C.

Mr. Tee Morgan and Chas. Gray were out on the river fishing last week and they report a good time.

Mr. P. M. [illegible] has been promoted from second hand in No. 2 mill to overseer of weaving in No. 1 Mill. His many friends will be glad to hear of this and all wish him success.

Messrs. E. P. Clark and C. O. Carver spent Sunday in Pedder, going Clark's automobile.

Mr. C. C. Stevenson has accepted a position with the Anderson Cotton Mills and has moved his family to this place. We are glad to have these people come with us.

Appropriation Bill Passes.

Washington, May 7.—The house today passed without roll call the annual naval appropriation bill, carrying $139,655,324 and providing for the entire administration naval construction program. The building program includes two battleships, one to be built in some government navy yard; six torpedo boat destroyers, one sea going torpedo boat, three coast defense submarine torpedo boats to be constructed on the Pacific coast, and four submarines.

FRECKLE-FACE

Sun and Wind Bring Out Ugly Spots—How to Remove Easily.

Here's a chance. Miss Freckle-face to try a remedy for freckles with the guarantee of a reliable dealer that it will not cost you a penny unless it removes the freckles; while it it does give you a clear complexion, the expense is trifling.

Simply get an ounce of othine—double strength from any druggist and a few applications should show you how easy it is to rid yourself of the homely freckles and get a beautiful complexion. Rarely is more than one ounce needed for the worst case.

Be sure to ask the druggist for the double strength othine as this is the prescription sold under guarantee of money back if it fails to remove the freckles.

Most Prompt and Efficient Cure for Bad Colds.

When you have a bad cold you want a remedy that will not only give relief, but effect a prompt and permanent cure, a remedy that is pleasant to take, a remedy that contains nothing injurious. Chamberlain's Cough Remedy meets all these requirements. It acts on nature's plan, relieves the lungs, aids expectoration, opens the secretions and restores the system to a healthy condition. This remedy has a world-wide reputation and can always be depended upon. Sold by Evans' Pharmacy.

Ten thousand Chicago school boys, selected on the basis of their school work, are now being taught to swim.

Reliable Remedies

For every ache and pain is a reliable remedy. You can cure the difficulty if you only put it right and act with wisdom. A lazy, torpid, sluggish liver is, without a doubt, responsible for more aches and pains than any other thing, for to it we trace constipation, biliousness, indigestion, headache, etc.

R. L. T.

knocks all these out by going right to the bottom of the difficulty—the liver and from there strengthens the entire system. A trial proves it.

50 cents and $1.00 per bottle at your druggists.

Manufactured and Guaranteed by

Evans Pharmacy.

Three Stores.

STATUS OF FRANK CASE

Nothing New But a Legal Technicality Is Left Him.

Atlanta, May 7.—The denial by Judge Roan Hill of a new trial to Leo M. Frank means that the final termination of the case cannot be many months distant. The only appeal which Frank possibly can make is the one outlined on United States appellate grounds, based principally on the entirely technical grounds that Frank was not present in the court room when the verdict was rendered.

Frank's attorneys, it will be recalled consented to waive this right at the time, but the attorneys who have since been called into the defense say that it was a constitutional right that could not be waived.

On such a slender thread is Frank now basing his hope of salvation from the gallows. Solicitor Dorsey is today convinced that the case has reached its end. He does not believe that the United States supreme court will have jurisdiction or will interfere with the verdict.

A sensational side issue of the case as it now stands, which will be watched with almost as keen interest as the fate of Frank itself, is the proposed investigation of bribery by the grand jury, in which Dan Lehon, the chief lieutenant of William J. Burns, has been bound over as a material witness and in which Detective Burns himself may be bound over.

The charge is that the preacher, Rev. Mr. Ragsdale, was bribed with $200 in the presence of the Burns men, to give false testimony that Conley had confessed, in order to help Frank's cause.

Ragsdale had made such a confession but afterwards repudiated it in a public confession that he had fallen victim to the temptation of bribery.

Former Cashier Gets 8 Years.

Augusta, May 7.—James P. Armstrong entered pleas of guilty in the superior court today five indictments charging forgery and one indictment for being cashier of a bank which became fraudulently insolvent, and was sentenced to serve an aggregate of 8 years in the penitentiary. Armstrong was cashier of the Irish American bank, which failed last December.

CONCERNING CLEAN LIVER

MODERN SANITATION IS A GROWING GOOD.

No woman or man can perform all the duties of life unless they keep themselves clean within.

An upset liver or sluggish kidneys will soon ruin your work and spoil your play.

Regularly take CARSWELL'S LIVER-AID and you will be a new being in this direction for it will clear your system as soon will cause your cares.

CARSWELL'S LIVER-AID takes the place of calomel—takes its place by ousting the CALOMEL effects.

It generally acts RIGHT NOW on the liver and kidneys and eliminates the poisons and accumulations.

Results—internal cleanliness—and by means of pure VEGETABLE ingredients.

No danger, no discomfort.

On sale at Peterson's Pharmacy in 25 cent bottles. Purchase price refunded to full if you wish it, but you won't, when you try this splendid remedy.

Jackies and Marines Off For First Landing at Vera Cruz

This picture has historical interest in a way. It shows Uncle Sam's first landing of insurrection and general looting one of the United States battleships in Vera Cruz harbor to effect a landing. This was the first step in the occupation of the first Mexican city by the American government. Fully seven dozen brave jackies and marines landed and, with others immediately plunged into the fight with the Mexican "snipers."

"Your crop will be largely made or marred in the months of May and June." If you get it started off growing nicely in these months, given good preparation you stand a very much better chance of making a good crop and your crop will stand adverse conditions better in July and August.

If a pig gets stunted in its early youth, it is almost impossible to make a good rousing hog out of it later. If your cotton is stunted, or if it gets sore shin or any of the other ailments to which cotton is liable, it has to recover from this before it can take on its natural growth, and it never does as well as it would if it had not suffered these troubles. Side dressing, by supplying plant food, makes this plant vigorous and healthy and strong and it grows off from the start. If you break your arm and set it, and get it properly set and properly knitted together, it is never as strong as before it was broken. "A bird with a broken wing never soars so high again."

And so it is with your cotton. Early attention and early fertilization is more than half of the battle. There is no question of side dressing paying. You notice what top dressing did for grain this spring; as soon as the top dressing was administered, the grain came out of the kinks, and if you administer side dressing to your cotton, it will come out of the kinks. The preparation for a crop has been unusually fine this spring, and where the preparation is fine the farming is good and side dressing is bound to pay.

Some farmers have found side dressing unprofitable; that is because it was applied too late; it should be applied early, as soon as you bring your cotton to a stand, because you do not care to side dress cotton that you are going to cut out; and as soon as you get the grass out of your cotton, because you do not care to side dress grass; grass takes care of itself in a crop if let alone. As soon as this is done, then the side dressing should be applied and you are not going to apply too much of it. Up to a few years ago France used more fertilizer than the whole United States of America and they did not use it all at once, either. The French farmers make very fine crops.

In a few years people will wonder why we use so little fertilizer now in making crops. Joel Key told the writer of a Mr. Rogers down in Florence County who side dressed his cotton every time he cultivated it, and when he wound up cultivating his crop, he had used about 1800 pounds of fertilizer to the acre, and when he wound up gathering his crop, he had gathered 800 pounds of lint cotton to the acre; not seed cotton—lint cotton, two bales weighing 440 pounds each to the acre. Now, if this is not profitable, the most of us had better quit farming.

Side dressing your cotton prevents disease to which cotton is liable because it is stronger and better able to withstand these troubles. It is stronger because it is better fed. A well fed pig or a well fed child can resist disease better than a little stunted child or pig.

Then, when a man's cotton crop grows off well, when it is green and greasy and growing, it makes him feel better, it encourages him to work it better and he will have a better crop. Then, too, a man feels his oats a little more with a good crop than he does otherwise; it gives him better credit and it gives him better standing in his community having a good crop of green, greasy growing cotton than having a little yellow, rusty, stunted, bumble bee cotton. The time is past when a man can maintain his respectability and grow bumble bee cotton. Some people complain that they cannot get their hands to side dress crops, but this Mr. Rogers had no trouble of that sort. He is like the centurion spoken of in the Good Book; when he tells man to do a thing, he does it.

If you apply all your fertilizer when you plant your cotton, the spring rains get a part of it, the grass gets a part, the cotton that you cut out in reducing your crop to a stand has taken a part, so your remaining crop gets probably not more than half of what you put down.

Now, suppose you use 400 pounds to the acre of 10-2-2 goods. You will have 128 ounces of ammonia; half of this has been taken up by the rains, the grass and cotton you have taken out, so you would have about 64 ounces of ammonia and you have 14,700 cotton stalks to fertilize with this 64 ounces of ammonia. The wonder is that little fertilizer will make such a difference in the crop. You can see this difference by comparing a field fertilized with a field of cotton that is not fertilized. You will come to the conclusion that fertilizer men are giving you good goods or so little would not make such a difference.

As your cotton grows, your fertilizer is absorbed and used up [illegible] when this is going on the strain on the cotton plant is greatest. Now, just at the time when the strain is greatest, the supply of plant food, which is already reduced, is weakening, so just at the time it increasing by the additional fruit that the stalk takes on, just at the time when your plant is hungering and thirsting for plant food, for sustenance, or you might say, for victles, as the hart panteth after the water brook, the supply is reduced and is decreasing and your crop shuts. What else can it do? When your farm work is heaviest on the mules, you increase the food and then they do not hold their own; suppose you did not increase their food when you increased their work, wouldn't you expect them to shed too?

In every contest for corn or cotton that has been entered [illegible] years past, the one who got the prize side dressed his crop and more than once. There is [illegible] about this. A [illegible] man does not stand a ghost of a chance of getting the prize in a crop contest who does not side dress.

In 1911 this county made the biggest cotton crop it has ever grown and there was more side dressing used than ever. That was not accident, either; it was another consequence. You do not expect to give your mule enough corn and oats Monday morning to last it until Saturday night, and you have no notion of giving it enough corn and oats and water in April to last it until October, but that is what you do when you fertilize your cotton in April and expect it to feed a crop until it matures in October.

In a man's farming, his cotton crop is his money crop—his way of making a profit and he only makes one cotton crop a year. That being the case, it will pay him to nurse his crop, feed it, look after it. It has been estimated that for every dollar a man spends in fertilizer he gets back $5.00, leaving him a clean, clear profit of $4.00 on every dollar he spends for fertilizer. The profit is greater than this on side dressing, because in side dressing the crop gets every ounce of fertilizer, where it gets not over half of that which is applied when the crop is planted.

Few people realize the value of side dressing and the profit in it. If they did, we feel sure they would find farming very much more profitable. To change the reading of the text of the Good Book a little, we will say "When you know the truth, then shall you [illegible]."

Now, we are making a fertilizer especially adapted to side dressing. It takes a different fertilizer for side dressing than it does for that which is applied at the time the crop is planted, it requires quicker action, for whatever is done to improve the crop in May or June must be done quickly. The business of this crop requires haste. So we have commenced a campaign especially adapted to side dressing. We manufacture an 8-4-4 which is excellent; we also have 4-8-4 which is better because it acts a little quicker; then we have 4-10-2 which is better still than we have a 9-0 which is a prescription. It is a combination medicine and tonic, makes a crop grow and wards off diseases to which cotton if liable. It will cost you something, but it will bring more than it costs. You get back more than three times what you pay out in any of these fertilizers that you get for side dressing.

We have had a number of farmers tell us that 1500 pounds of seed cotton that has been side dressed will turn out as heavy a bale of cotton as 1500 pounds of seed cotton that has not been side dressed and it makes a better sample and a better sample brings a better price.

Now, lest we forget, the fertilizer made by the Anderson Phosphate and Oil Company boys is the best put in sacks, or barrels, or tubes or pots. It is the best fertilizer for side dressing or for any other purpose that you have ever administered to your crop. We have it ready made and ready to be shipped. It is bagged and [illegible]
