PROSPECTS GOOD FOR AMATEUR BASEBALL

FOUR TOWN CIRCUIT BE PAYING PROPOSITION

STOUCH HAS IDEA

W. S. Lee Has Offered to Give Anderson and Greenville \$10 For Every Game Played

Tommie Stouch says that an amateur association for baseball, composed of the towns of Spartanburg, Greenville, Anderson and Greenwood, would pay and Tommie ought to know because he has been in the game long enough to know all there is to know about it.

D. C. Garvin said last night that he had talked with Stouch while he was in Greenville and that the veteran ball player is strong for the organization. He says that Stouch intends visiting all the towns in the proposed circuit and trying to get some interest aroused and says that he has already secured Greenville's consent to the plan and that town will be ready to go in as soon as the other three will be. It is a foregone conclusion that

Anderson a trial and therefore the question is simply up to Anderson and Greenwood. Greenwood already has a ball team organized and he thought that the people there would wait long before they would enter such an association.

It has been pointed out that in such an organization as this, composed largely of college men and amateurs here at home, with not more than two professionals on the pay roll, the monthly expenses could not be very large.

Again, all the towns mentioned in connection with the association on the interurban and it would be possible to have hotel bills in almost every instance. With the lowest railroad rate obtainable and no hotel bills to pay the expense of the league should be low every month.

W. S. Lee of the Piedmont & Northern lines has agreed to give Anderson and Greenville \$10 each for every game played and this would be a big start on the every-day average expense. With this sum for a starter it would not take more than \$15 or \$20 additional to make the game pay.

The plan to be put into operation here does not include paying the players a salary. It would be a co-operative scheme, entirely and the players would share equally what was made out of the game. Therefore, there would be no heavy salary list hanging over the heads of the promoters.

BETHEL AGAIN WON A VICTORY

Local Lads Lost the Second Game To Fast Bethlehem Team of the Spartan City

The Anderson High School team lost the second game of their trip yesterday when the Bethlehem team of Spartanburg beat them 5 to 3. The game was a locally played exhibition from start to finish. Anderson had only one pitcher and he hurled the opening game against the Spartanburg team. The local had to rely upon their catcher to do the pitching yesterday.

The Intelligencer's Daily Short Story

Restored To His Rights By Louise B. Cummings

Robert Wykoff has no remembrance of anything that occurred before he was five years old, except being carried by a woman who seemed to love him very dearly, and even this is scarcely a memory with him. After that he became cognizant of being a member of a family, a man whom he understood to be his father, a woman whom he understood to be his mother gave him what he needed, especially clothes, which were not better than those of the other children of the household.

school and his unpleasant home to a life wherein he lived almost entirely out of doors, attending to cattle, planting and gathering in crops. This period Bob Wykoff remembers as the happiest of his life, for here was born a boy's love for Molly Eskine, a little girl he one day saw trudging along a road with some milk she was going to deliver to a neighbor. He carried her milk for her and many another burden from that time forward for three years. Then he was eight years old and she was fifteen.

SIDE DRESSING PAYS

Every stalk of cotton grown in South Carolina last year could and would have taken on more bolls than it did if it had been properly side-dressed. You will not see the long slips between bolls in side-dressed cotton that you see in other cotton, and you will see more bolls to the stalk.

Every stalk of cotton grown in South Carolina last year would have made more if it had been properly side-dressed. The reason cotton sheds is that it is deficient in plant food. The only way to supply this plant food is to side dress your cotton. You can't pump it into it. A young, tender, growing child should be fed frequently to make it grow rapidly and envelop and come into its own, and it is the same way with young, tender growing plants, they should be fed (side-dressed) frequently. You don't expect to feed your male enough in April to last until October and the plant food you supply your crop with in April will not last until October either. When the plant exhausts your cotton sheds. Your crop is "cat."

You can only make one cotton crop a year, that is your money crop. You want to make all the cotton you can. You want to make all the money you can. For every dollar you pay out for fertilizer for side dressing you get back from three to five dollars. This man Rogers in Florence county who fertilized every time he cultivated his crop, made 250 pounds of lint cotton to the acre, but cotton that does not seed cotton—that cotton.

By side dressing early your cotton grows on early and gets its maturity early and opens early, for when cotton gets its growth and maturity and ripens it is going to open. Your early cotton weighs better than late cotton. It takes about 120 bolls of cotton picked in September and October to make a pound. It takes from 300 to 400 bolls that are picked in the last half of November and later to make a pound.

When the boll weevil strikes a country the early cotton "small the farmer gets. The boll weevil gets the balance. You don't know when the Boll Weevil will strike you, or I don't. Experience ginners say that 1,300 pounds of side dressed cotton will make as heavy a bale as 1,500 pounds that has not been side dressed. The lint is better developed and there is more of it. Suppose side dressing makes two extra bolls to the stalk. The right kind properly applied will add more than that and make every boll heavier. It will add three and four to the stalk. You will have at least 12,000 stalks to the acre, taking two extra bolls to the stalk and 120 bolls to make a pound you have 200 extra pounds of cotton from the extra bolls to say nothing of all the bolls being larger and heavier.

Side dressed cotton stands drought better than other cotton. It is better fed and in better condition to stand anything. Side dressing makes more bolls, makes heavier bolls, makes more lint to the boll, makes cotton shed less, makes a better staple, that means a better price, causes your cotton to stand drought better. If side dressing does not pay, it does not pay to farm. The side dressing specially prepared by the Anderson Phosphate and Oil Company boys, is the goods you need.
