Hearing is Believing

That is the final supreme test of the Columbia Grafonola—as of any other musical instrument. Tone is the ultimate demand.

And it is tone that has given Columbia Grafonolas the place they hold. It is their tone—unmatchable in its natural purity and absolute fidelity—that justifies their description as incomparable instruments of music.

GAFFNEY WANTS A BERTH IN LEAGUE

Another Town Proposed For Membership In Piedmont League Instead of Greenwood

Since Greenwood has announced that she will withdraw from the proposed Piedmont league and has served notice to that effect on the league directors, it is proposed that Gaffney be admitted to membership in the association. It was said last night that Gaffney and that by early Monday it would be completed, at which time the Gaffney people would be able to definitely announce whether or not they would apply for membership in the league.

Gaffney is a good base-ball town, which once boasted of a team winning 52 games out of 52 played and if that town is admitted to the league it will hold up its share of the league's burdens. It seems that all of the trouble at Greenwood grew out of the fact that one parent did not care for his son to participate in organized baseball, and that son was one of those elected as directors for the new league. The young man must evidently be of some parts, as Greenwood seemed afraid to risk the venture unless he could be secured to play on the team. From that it would seem that he constituted some seven or eight of the proposed team in Greenwood.

While it is by no means an assured fact that the league is to be launched on the 15th, as he had proposed, it is believed that Gaffney may come in, in which event the first games will be played as originally planned, except for the fact that Gaffney would then play the opening games in Anderson instead of the home team going to Greenwood. Local people will hope that the plans may be completed for organizing the team and that Gaffney may be admitted.

COTTON GOODS

The Market Showed More Activity During Last Week.

New York, June 6.—Cotton goods markets have broadened steadily throughout the week and prices have advanced. The buying has been done by contractors, bleachers, printers, jobbers, and base manufacturers, and engagements have been made which will carry the mills moderately well through the summer on gray and brown. Print cloth prices are 1-2c to 2-2 1/2c advance. Prices are firmer. Prices have been named on shirting, chambray on the same level as a year ago, 6 1-2c for 32 inch goods; while bleached madras has been priced at 6 3-4c, 1-4c advance. Business on these lines is up to the volume of last year. Bleached goods are in better call from the manufacturing trades. Denims and tickings are comfortably under order for the next two months in the largest mills. Wide sheetings, pillow tickings, sheets and pillow cases, and other domestics are in better demands. Wash goods sales during the week were active, the best selling cloths being printed fancies in sheer constructions. Yarns are still quiet and prices are low. There has been a better spot demand for underwear and hosiery and preparations are under way for opening for spring, 1915. Prices on cotton goods are as follows:

Print cloth 28 inch 64 x 64s 3-2-4c nominal; 64 x 60s, 3 1-2c; 68 1-3 1/2 inch 64 x 64s, 5 1-4c; sheetings southern standards 8c; denims 9 oz 14c; tickings 8 oz 13 1-2c; prints 5 1-4c; naple gingham 6 1-4c; dress gingham 9 3-4c.

Big in Bull Times

Cleveland Leader. It is easy to show by impressive figures that the volume of commerce and industry in the United States is immense, even while business men complain of dull times. It is not at all difficult to present facts which prove that this country is leading the world today in many branches of production and trade. American supremacy has been a long well established fact. A period of unsatisfactory business, however, is not so much that the country has lost ground as it is that there has been no such advance as should have been made. It is not that traffic and production have become smaller, but that they ought to be much larger. In some lines of industrial and commercial activity there has been a disappointing and unnatural check on growth. Nothing that is past can satisfy American demands upon the future. What has been done is never enough to measure satisfactorily the standard of today and business plans for tomorrow.
