### MADE IN ANDERSON

Outfits for Canning Fruits and Vegetables at Low Cost.

To meet the growing demand for a compact, successful and inexpensive canning outfit for small growers and to be used in the home, John T. Burris & Son have put on the market one of the completest outfits that has yet felt under our observation. It is built on practical and substantial lines and the cost is trifling. This complete outfit selling for \$10. It is outfit was designed by I. G. Watson, foreman in

the tin shop of the Burris plant, and those who have tried it say that it works perfectly. Mr. Watson was for a number of years engaged in the canning business in North Carolina and naturally would know the strong points of an outfit to be used as this one will.

A number of Anderson county farmers are interested in canning vegetables, fruits, etc., and a great number of these small outfits are in use over the county. None of them, however, will compare with the Burris-Watson outfit made in Anderson.
