Dun's Review.

New York, Aug. 28.—"Trade is very irregular, verging, in fact, toward marked unsettlement in some sections. The South, for instance, and although parts of the west and north-west continue to report activity, the general trend is toward conservatism. The disposition is to gauge purchases to immediate requirements, for which prompt shipments are requested, and to disregard probable future wants. Southern reports are poor, owing to uncertainty about methods for financing the cotton crop, and their development is reflected in the trend of affairs at leading southwestern markets, where some cancellations of orders have been received. A feasible plan for marketing cotton is developed prompt resumption of business activity is anticipated."
 "Failures for the week in the United States were 237 against 269 last year; bank clearings, 2,057,830,000, a decrease of 24.4 per cent from last year; wheat exports 9,397,627 bushels against 7,042,180 last year.

The above picture of the king of England was taken during the recent review of the home fleet of England at Portland, where there were 425 ships assembled. England takes great pride in her navy, and the prospects of a clash between her fleet and that of Germany was fraught with awe inspiring possibilities.

ELECTRICITY AT HOME.

A Boon to Every Housewife Who Can Get Its Use.

Atlanta, Ga., Aug. 28.—On Peachtree street, in the heart of town, there is an exhibit which causes the average housewife to long for a pocketful of money and an unlimited supply of electricity. It is an exposition of electrical household machinery which embraces everything from a curling iron to a combination churn, clothes wringer and feed cutter.

The windows and aisles are filled with labor-saving devices which prove how easily and economically many of the hated duties of the woman housekeeper can be handled by the magic "flick" and from the way the women are flocking to the show they welcome a relief from drudgery.
 Since the Georgia Railway and Power Company put in its great plant at Tallulah Falls and cut the rate on current Atlanta is becoming more and more an "Electric City." The old-fashioned steam plants and their smoky chimneys are being discarded in favor of the clean and silent motor, and in nearly every home there is a motor at work on sewing machine, washing machine, vacuum cleaner or some other household help.
 The company's power wires now cover the territory between Tallulah Falls and Atlanta and reach into many north Georgia towns, and the farmers are learning that electricity hatched to a machine is cheaper than human power, even if that is furnished by a wife who works without wages.

Americans Have Left Danger Line.

(By Associated Press.)
 Washington, Aug. 28.—Mildred Stovall at Berne, forwarded a report today from her vice consul general at Lyons, saying all Americans have left that district.

Conditions in Copenhagen are normal and Americans there supplied with letters of credit are having no trouble in obtaining funds. The American consular agent at the Danish capital reported the American yacht Karina passed through there safely on August 10.

English Cruisers Guard Our Coast.

(By Associated Press.)
 New York, Aug. 28.—It was reported in shipping circles here today that six British cruisers had been ordered to the Atlantic coast to blockade American ports against the escape of German merchant ships and to clear the North Atlantic of the enemy's warships. The British consul general here would neither confirm nor deny the report, but the news yesterday that five warships of the British Atlantic fleet had been ordered to the Gulf of Mexico was pointed to as indicating that reinforcements would be held in northern waters.

Another Case of Plague.

(By Associated Press.)
 New Orleans, Aug. 28.—The twenty-first case of bubonic plague was reported here today. Mary Jones, a negro, 31 years old, is the victim.
