A SHORT WAR, SAYS MAXIM

Sir Hiram Maxim, the famous gun inventor, believes it will be a short Civil war there were in round num war. He has forseen the clash for a bers 23,000 killed outright and 119, long time. They had these armies and, like a boy with a plaything, they wanted to use them. That is his idea about it.

Sir Hiram talks interestingly of the participants. Austria has a very large army, but the Austrians will have all they can do and a great deal more to keep the Russians out of their own country, to say nothing of keeping them out of German

It will be necessary for Germany to send a large force to the East to aid Austria, and in all probability the alliance will not last a great deal longer than the war.

The English army, it is true, isn't very large, but England can certainly send 200,000 men to the front. Little Belgium can send a like number. If England is pressed she can sent fully 600,000 men to the front. The English are very good, stubborn fighters, and, as the matter stands I don't think the Germans have much chance If I was to look at it from a purely

mathematical standpoint, I should say the chances against Germany are fully 10 to 1. Nothing but a very unfortunate mis-

French will enable the Germans to reach Paris

This particular war is not like the war in South Africa or any other uncivilized country. Troops can and will be moved with great rapidity.

Napoleon-said battles were won by quick marches. There, are no better sea fighters in the world than the English. If they had to deal with Germany alone there would be little chance but that the German fleet would be wiped off the sea, but when you consider the French and Russian fleets are added. I should say the Germans don't stand one chance in a

Money is the great factor in the war. Leaving the United States out of the question, England is the richest country in the world, France is second, Russia third, and Germany

France is extremely rich; her people are quite as patriotic as any. The war of 1860 between Russia and Austria lasted only six weeks.

THE POTATO

The people of this state should raise more of things to eat. Then such a cataclysm as war would not alarm. There is a certain good farmer in Anderson county who brings eggs and butter to town every week. He has enough meat ahead in his smokehouse and his bins to last him a year. He is not dependent upon cotton.

There is a staple article of diet in this country which should be more extenvively produced in the south-potatoes. The potato is always in seacon, is edible in a number of ways and always commands a big price on Northern markets.

The South Carolina Irish potato contains 10,000 acres this year and the total production will be approximately 656,000 bushels, according to the estimates made by the United States Crop Reporting Bureau. The con-dition of the crop is 65 per cent of normal and the price at the present time is averaging around \$1.18 per bushel.

In continental United States there are 3,708,000 acres planted to this product and this year's production is estimated at 360,614,000 bushels by the federal department of egriculture. This year's crop will exceed the average year's by approximately 4,000,000 bushels. The nation's production last year was 331,525,000 bushels, was produced on 3,668,000 acres of land and sold for \$227,003,000, or an average of 90 cents per bushel.

The potato is not easily kept, but if her own home, Abbeville, by a big farmers should prepare for the crop and prepare for marketing it—they would find it a big money proposition.

GIVE THEM REPRESENTATION

Our principal regret about the legislative ticket is that a bona fide mill worker was not sent to Columbia. W. H. Godfrey and W. I. Mahaffey have worked at the loom. They received handsome complimentary votes and may come again. The mill workers should be represented in the legislature, by at least one of their number.

We believe in all classes being rep resented in the legislature. There are now three farmers on ofr delegation and a lawyer or two might be of

The Unchecked Advance of Ger-

man Troops Toward 's Causes Alarm

(By Associated Press.) Paris, Aug. 29.—6:40 p. m—This has been a long and anxious day in Paris.

As far as can be learned the French massed troops appear to be intact, except for those losses which were inevitable in a week's heavy fighting over a vast front.

If the British and French retire on the western flank, it is explained that they do so to choose their groun; for flercer resistances. Every day has seen reinforcements moving up to aid French troops engaged on the

Belgian frontier.

The French operating along the interior lines are able to shift an army corps from one part of the front to another swiftly and it is said the allies probably are in stronger position today than last Sunday.

The Germans, apparently owing to the increasing pressure of Eussia, neem to be throwing themselves against entrenched positions and are suffering very severely. They are gaining ground and seemingly are hopeful of being able to break through

before Berlin is invested.
French wounded are arriving at the provincial towns. The Temps' ver-sailles correspondents report that wounded are passing through there
