

**This Crew Now Opening Its Nation-Wide Dry Drive**

All state and divisional chiefs in Gen. Lincoln C. Andrew's new Federal Dry Army were in Washington last week for a final council-of-war before the big drive which started this week. There are 22 district chiefs, unrestricted by state lines. It is planned to "get the big ones"—cutting off the liquor supply at the source. No. 1, Comm. Haynes; No. 2, Gen Andrews; No. 3, Comm. White.

**IMPROVED LINE OF BODY TYPES**

**CHANGES IN NEW MODEL CARS ARE PRONOUNCED**

Ford Goes to Colors in Closed Cars. Many Other Refinements.—Larger Brakes

Body changes and chassis refinements more pronounced than any made since the adoption of the Model T chassis were announced here today by the Ford Motor Company. There will be no advance in price, it also was stated.

Outstanding features of the improvements in both open and enclosed types are lower, all steel bodies on a lowered chassis, complete new design in most body types, a change from black to color in closed cars, larger, lower fenders, newly designed seats and larger, more powerful brakes.

Longer lines, effected through higher radiator and redesigned cowl and bodies are apparent in all the improved Ford Cars, but are especially pronounced in the open types. Wide crown fenders hung close to the wheels contribute to the general effect of lowness and smartness.

While Runabout and Touring Car remain in black, the closed bodies are finished in harmonic color schemes, enhanced by nickel radiators. The Coupe and Tudor bodies are finished in deep channel green while the Fordor is rich Windsor Maroon.

Greater comfort is provided for driver and passengers in both open and closed cars by larger compartments, more deeply cushioned seats and greater leg room.

Many new conveniences are also incorporated in the improved cars. In the Runabout, Touring car, Coupe and Tudor, the gasoline tank is under the cowl and filled through an ingeniously located filler cap completely hidden from sight by a cover similar in appearance to a cowl ventilator. One-piece windshield and narrowed pil-

lars in the Tudor and Coupe offer the driver greatly increased visibility and improved ventilation.

Driving comfort is materially increased by lower seats, scientifically improved back rests, and lowered steering wheel. Brake and clutch pedals are wider and more conveniently spaced.

Four doors are now provided on the touring car and two on the Runabout permitting the driver to take his place from the left side of the car. Curtains, held securely by rods, open with the doors.

Most important in the mechanical changes are the improved brakes. The transmission brake drum and bands have been considerably increased in size which gives the foot brake softer and more positive action as well as longer life. The rear wheel brake drums are larger and the brake of self energizing type.

Cord tires are now standard equipment on all Ford cars.

At the main offices of the company it was stated today that production of the new line is under way in all assembly plants of the company throughout the country and the improved cars are being sent to dealers for showing.

**Special Furniture Prices.**

Mr. Lonnie M. Calhoun, of the Home Furniture Co., of this city, says that he doesn't want any of his friends and customers to forego the pleasure of buying an automobile this Fall, but if they have any money left after making the purchase he invites them to save money on their furniture by taking advantage of the special prices that he is making on his stock. This invitation is given in an interesting advertisement on the eighth page of this issue of The People-Sentinel and those contemplating new house furnishings will do well to read the ad. and act accordingly.

As the result of a recent examination held here, C. E. Ray has been awarded the Clemson College scholarship for Barnwell County.

**WANT CRITICISMS AND SUGGESTIONS**

To the Taxpayers of South Carolina:—As is well known to all of you, the present system of taxation in the State is exceedingly unsatisfactory. On July 16th, a conference on taxation was called by Gov. McLeod, at which the following resolution was adopted:

"That a committee of seventeen be appointed by the Chairman to take into consideration and study the whole tax situation in this State, with full power and authority to make such recommendations to an adjourned meeting of the Conference as they think will provide a just and equitable system of taxation for this State."

This Committee met in Columbia on August 7th and decided to open an office to serve as a clearing-house on this most vital matter. We, therefore, invite any and all citizens of South Carolina who have criticisms of the present system, or suggestions for its improvement, to put them into writing and send them to us. The present address is: The Tax Conference, 1210 Loan and Exchange Bank Building, Columbia, S. C.

The meetings of this Committee and of its sub-committees will be public. We shall be glad to have anyone interested attend any or all meetings and discussions of the Committees. Notices of these meetings will be published.

Geo. B. Cromer, Chairman, Committee of Seventeen, Bright Williamson, Chairman Sub-committee of Research, Columbia, S. C.

**Dove Season Opens; Hunters Are Warned**

The open season for shooting doves opened Tuesday, the 1st inst., and in this connection Chief Game Warden A. A. Richardson has issued a warning to hunters not to exceed the bag limit of 25 a day, the maximum fine for violating this law being \$500. The People-Sentinel has been requested to publish the following letter received by Mr. Gilmore S. Harley, county game warden, from Mr. Richardson:

"I call your attention to pages 8, 9 and 31 of the Federal Game Laws, from which you will note that the Doves are migratory birds, and that the bag limit is 25 per day. Any person killing over 25 Doves in one day is guilty of violating both the State and Federal Laws, and is subject to prosecution in both the State and Federal Courts—the maximum fine being \$500.00.

"Owing to the extreme dry season that we have had, Doves will be slaughtered by the thousands at the different watering holes, so this letter is to advise you to begin on Sept. 1st and thoroughly cover your county and be on the alert to see that the bag limit is not exceeded.

"The open season on Doves is from September 1st to December 15th, inclusive, and is shown on the back of all hunting licenses, together with the open seasons on all other game and birds.

"The bag limit of 25 per day on Doves is a very generous one and real sportsmen will not wish to kill more than this many Doves in a day. Those who do kill more than 25 Doves per day should be prosecuted.

"I hope that the sportsmen of your county will co-operate with you in the enforcement of this law, and that we will be able to sufficiently protect our Doves and not have them all slaughtered in one season.

"While looking after the Dove Law, also make certain that people are not shooting partridges out of season, and that each person who is hunting has a license. I want you to personally inspect the license of every hunter you see and prosecute those who cannot produce their licenses."

Mr. Chris Langley and family have returned to Columbia after a visit of several days to relatives here.

**About Your Health**

Things You Should Know

by John Joseph Gaines, M. D.

**Your Throat**

Undoubtedly, in our struggle with the invisible enemies of mankind, we have been baffled by the invaders of the breathing-passages more than anywhere else. Here many of the deadliest germs attack. We have practically abolished typhoid; cholera is a thing of the past; small-pox is no more dreaded; diphtheria and scarlet fever are yielding; influenza, pneumonia and tuberculosis remain mysterious and un-conquered.

It is known that disease-germs may reside for years in a throat that appears healthy, and annoys its owner but little. From this locality they wander to more remote tissues; an overworked joint, an idle gall-bladder, or an irritable kidney is fertile soil for immigrants from a very modest throat-infection. Worst of all however, a diseased throat is more apt to infect the heart-muscle, especially in people past middle-age. I am safe in asserting that, the majority of fatal heart diseases have their real origin in a perfectly curable throat infection, neglected!

Removal of tonsils is too often only a step in the right direction—merely removing the headquarters of the enemy. Millions of bacteria are left behind to continue depredations. The number of "poisoned hearts" from influenza-germs is appalling! It is in this field that an ounce of prevention is worth many pounds of cure. What better prevention than daily cleansing the upper air-passages with some harmless antiseptic? The invisible foe can be successfully combated, only when he is not deeply fortified. To neglect the throat is to court disaster.

NEXT WEEK: ICE COLD DRINKS

**Bridge Club Meets.**

The Wednesday Afternoon Bridge Club met last week at the home of Mrs. Edgar A. Brown. The high score prize was won by Mrs. Harry D. Calhoun, while Mrs. Charlie Brown Sr., cut the consolation. After the games a delightful salad course was served.

**Your Birthday**  
Is it this week?

September 6-12—VIRGO

If your birthday is this week, you are exceptionally well-balanced and are never likely to go to extremes in anything. You have an innate refinement, purity and sensitiveness. You are always modest, and are of a quiet and retiring nature. With these qualities, it is very seldom a Virgo person sinks into degradation and vice, regardless of their adverse circumstances or early unfavorable environment. Mercury, the ruling planet of this sign, gives to its subjects much wit and very ingenious minds. These people have a cool, confident bearing, are inclined to be exclusive, and are always very discriminating in the selection of their friends and companions.

Virgo people are adapted for either a mercantile or professional life. They display much tact and cleverness in their commercial undertakings as well as professional callings. They make exceptionally fine authors, because of their great insight into human nature.

The most profound faults of these people are selfishness, self-gratification and pride, which often makes them envious and disagreeable. They do not get along well as a rule with other members of the family, are excitable and need responsibility of some kind.
