## FIGHTING FIRE IN MID AIR.

RARE FEATS OF CLIMBING BY ST LOUIS ATHLETES.

A Company of Athletes--Ladder Performances--l'ire Escape -The Canvas Tube and the Grip Sack.

The terrible scenes enacted at the twenty athletes has been organized might be in danger there. whose sole duty at fires will be the out on the ladders again, and the rescue of persons imprisoned by the descent began. Fireman No. 4 at fiames. Mr. E. D. Meier is the once ran down to the ground and After some practice, the company gave an exhibition in the streets who passed it below, and then all recently, before the members of the moved down another story, when Legislature, city officials and thousands of spectators. The St. Louis three and one-half minutes from the Republican gives an account of some time of starting up. of the feats that were performed on that occasion.

first exhibited

## A SCALING LADDER

It bore at its upper end a hook that had arrived at that point when No. was out of wrought iron and reached 1 reached the ground from the for three feet directly at right other trip, so that, in reality, the angles from the ladder. This hook occupied every floor, descended was wide enough to reach over nearly any sill, and to insure a safe hold. story in another part of the building The ladder had but one standard, in three and one-half minutes. The which was of strong, pliable "wood, second ascent and descent was the and therungs protruded about six same as the first, and third, which inches at either side. A freman was made immediately after; the could, with this ladder, drive the second was also the same; and at hook through a wooden shutter or the end of window pane on the second story, and thus secure a safe hold for inches wide, and sufficiently strong to sustain the weight of several tainly well deserved. men. Depending from this belt by a very strong strap was a large wrought-iron snap-hook, so that on mounting to the top of a ladder the fireman could snap this hook around feat at a time, and in unison, each the standard of the ladder and be thus secured from all possibility of the captain. The operation was losing his balance and enabled to use both hands. These hooks hazardous, was not really so. It serve another purpose. A fireman can, by taking two or three turns of a rope around the smooth iron of the fireman hooked it to the secondwhich the hooks are made, secure a story sill, ran up, straddled the sill, sufficient degree of friction to raised his ladder to a third-story

next exhibited a hatchet, having a for the round trip. cutting edge on one side, and a long the cheapest and best shirt in the market. said, was to be used for cutting through iron shutters, if necessary, to get them open, and the spike portion when driven into the woodwork of an upper window, fur-nished an excellent standard on which to fasten a rope by which the much explained, Mr. Meier gave a signal for the drill to begin.

## RARE CLIMBING.

At the sound of the captain's whistle, the men, all equipped, jumped from their seats and ranged they seized the ladders, which lay near the building, and elevated a man ran lightly up; stopping near hook was snapped around the standard, and he stood on the rungs, his waist on a level with the sill and his hands free. Instantly another into windows as they pass. 2 ladder was handed to him by fireman No. 2, and raising it quickly he booked it on the sill of the thirdstory window above him. At an- yet. It is what is called other command he unhooked his belt, stepped on the second ladder and ran up to the third-story, fireman No. 2 meanwhile mounting to the second-story. Both men now hooked themselves to their respective ladders, and a third ladder was quickly passed up by fireman No. 3. story window, and then, at a word, mounted again, No. 2 following to to the second. A fourth ladder was pussed up by fireman No. 4, and No. I hooked it on the sill of the fifth

story. Again he mounted, No. 2 following to the fourth story, No. 3 to the third and No. 4 to the second. In another second each man had entered the window of the floor at which he had arrived.

The elevation and mounting of the ladder occupied about

## FIFTEEN SECONDS,

burning of the Southern Hotel in minute and forty seconds from the St. Louis has caused considerable time of the first order, a man was interest to be taken in the subject of on every floor of the building, fully fire escapes. A company of about prepared to lower any one that

A command brought all the men President and Chris. Hoell, Captain. the other three came down one story each. No. 1 then unhooked the the operation was repeated till the

Meanwhile fireman No. 4 had seized the first ladder that came down, hooked it into another win: All things being ready Mr. Meier dow, mounted, and by the time he was ready, No. 3 was handing him the second ladder which had como down. This he mounted, No. 3 folwhich was about twenty feet long. lowing to the second story, and they again, and mounted to the third-

elimbing. The next article shown was the broad belt worn by the every floor of the building in three was the broad belt worn by the from starting the corps had visited tiremen around their waists. It was of leather and canvas, about six with their ladders. The applauso at each evolution was loud and cor-

The second exercise was one in which one man with one ladder went from the ground to the fifth floor. Three of the corps performed this enable him not only to let himself down the rope very slowly, but to take one or even two men with him.

He next exhibited a rope such as each man earried. It was half an inch in thiskness one handled and were inside the fifth-floor windows just one minute and down just one minute. inch in thickness, one hundred feet dows just one minute and twentylong, and of the finest quality of six seconds from the time of starting, hemp. It was coiled or bulked in and returned to the ground in one

A series of

## ROPE EXERCISES.

followed next. A number of men went up to the fifth floor, and reach fastening a rope in a window, took three turns of it around his hook, and lowered himself to the fourth story, where he took on a comrade. fireman could lower himself. This The latter simply clung on to his companion's hook, and the two came gradually down, the first man easily regulating the rate of descent. One man brought two others down on his hook in this manner, the descent occupying but a few seconds. It should be remarked that the fireman in a row. At a word of command who controls the rope does not simply hang down, but he places his feet at right angles to his body, and them on end. At another command against the wall, and takes long steps down the wall as though walkthe top. At another command his ing backward, straddling each hook was snapped around the stankeeping in a position which prevents him and his charge from swinging

The next performance was a very difficult one, and only a few members of the corps are equal to it as

## "ASCENT IN ECHELON,"

or in an oblique direction. In case fire is breaking out of a window immediately above an ascending fire. man, it becomes necessary for him to reach a window either to the right or to the left thereof, and this No. 1 reached up with this and is the purpose of this feature hooked it on the sill of the fourth of the drill. It was performed by two men, each independent of the other. Reaching the the third story, and No. 3 following second-story window together, one of them chose to climb to the window above, and about four feet to
