Heart Trouble Quickly Cured. A Convincing Testimoniai.

"For 19 years I suffered from heart trouble. During that time I was treated by five different physicians All of them claimed that I could not be cured. I was greatly troubled with shortness of breath, palpitation and pain in the side. If I be came excited, or exerted myself in the least, the pain in my side became very severe. At times it seemed as though needles were shooting through my side. Sometime in the month of November last, I commenced taking

# GOOD ROADS : GOOD TIMES. When the Mud No Longer En-

forces Idleness, the Farmer Will Prosper.

At the good roads congress held at Albany last winter General Roy Stone cautioned the wheelmen not to antagonize the farmers if they wished to secure the best results. Among other things he said :

That good roads will bring prosperity is no idle dream. Through all the panic and depression of the last three years the farmers is graded and leveled, a rut is in the few good roads districts of the county have gone on making money and improving their farms, and they have not troubled themselves much about politics or finance.

makes farmers poor, and no far- bearing surface presented to the mer need be idle a day on account of bad weather or wet fields if ting, but, on the contrary, acts only his roads are good. On a as a roller, smoothing out rough good road there is always paying spots and solidifying the smooth work of some kind, and wet weather is just the time to go on the road. The French farmer never loses a good day in his fields, for he can do all his marketing and hauling of fertilizers in rainy times.

What prosperity would burst could earn a full day's wages every day in the year, rain or shine.

neighbors in the cities; and especially those of them who are candidates for public life, that the interests of the city population demand that they shall come to the relief of the farmers, you can go to the farmers with the assurance of help and ask them to take into careful consideration the practical measures by which this relief can be brought about, and especially the measures for providing state aid and for the use of convict labor. It is only through state and country aid that the cities and villages can help.

If you find the farmers clinging to the old ways, say to them that these ways are mainly an unfortunate inheritance from the mother country, which we brought away with us and failed to shake off when the system was abandoned there, and that to-day in Great Britain not only are the roads maintained at the general cost of the people, but government loans are made for any especially heavy improvements that are desired. Two hundred years ago the great highways of that country were kept up, so far as they were kept up at all, just as they are in this state today, by local taxation, while they actually served the people of the whole kingdom.

### THE TIRE QUESTION.

**Road Students Are Unanimous** For The Broad Bearing Surface.

In an article in the Indianapo lis Journal on "Broad Versus Nar row Tires" a writer argues strongly for the former. He says in part : "Without one single dissenting voice the students of road economics say that the greatest road destroyer is the narrow tired wagon. It cuts like a knife, and, no matter how carefully the surface bound to follow its use. It finds every soft spot and cuts until a fine reservoir is formed to hold the rains. On the contrary, the wide tire not only keeps gravel but also dirt roads smooth and in It is enforced idleness that good condition. The amount of road prevents any material cut-

"When the frost is coming out of the ground in the spring, the narrow tire gets in its work of cutting the surface and forming ruts to start the season with, while the wide tire is in itself a roadmaker, smoothing and packupon this country if every farmer jug the upheaved surface. The and farmer's boy not at school, wide tire is also easier on the and every farm-hand and team team. A much heavier load may be hauled with the same power on wide than on narrow tires over any road in the state out side the larger cities.
