

DRUGS KILL MORE THAN DISEASE

The leading doctors say: "There are more deaths caused by drugs than disease; if every one would keep his system fortified with an invigorating stimulant and leave drugs alone the death rate would be lowered."

Statistics show that these doctors are right and this is why all leading doctors prescribe Duffy's Pure Malt Whiskey exclusively for Consumption, Grip, Bronchitis, Asthma, Catarrh, Coughs, dyspepsia, malaria and all low fevers, nervous prostration, female troubles, sleeplessness and weakness from whatever cause; all these diseases are caused by rundown conditions of the system.

DUFFY'S PURE MALT WHISKEY

builds new tissue; it enriches and stimulates the blood, aids digestion, tones up the heart, invigorates the brain and strengthens the system so it throws off disease. It kills the germs.

Mr. and Mrs. Adam Livingood of Elverson, Pa., who have been married 65 years, say Duffy's Pure Malt Whiskey has prolonged their happy union many years beyond their silver wedding. Mr. Livingood is 91 years old and his wife is 84. They are both hale and hearty and feel vigorous as a couple 50 years of age.

Mrs. Matilda Watts, who is 63 years of age, says Duffy's Pure Malt Whiskey cured her of grip and has kept her strong and well.

"I suffered terribly with the grip and tried every known remedy. Changes of weather always found me in bed, and I often felt as if life was not worth the living. Picking up a newspaper one day, I read of the great benefit derived from the use of Duffy's Malt Whiskey and sent for a bottle. The beneficial effects were almost instantaneous. The terrible lassitude with which I had suffered so long disappeared. I was completely cured and have felt no bad after effects, and to-day, at the age of 63, I feel as though I was only 30."

New York's leading doctor said: "Duffy's Pure Malt Whiskey is food already digested."

If you wish to keep young, strong and vigorous and have on your cheek the glow of perfect health, take DUFFY'S PURE MALT WHISKEY, regularly, a tablespoonful in half a glass of water or milk three times a day and take no other medicine. It is dangerous to fill your system with drugs; they poison the system and depress the heart. "Duffy's" is an absolutely pure stimulant and tonic, free from fusel oil and other dangerous ingredients so common in malt whiskeys.

CURES WITHOUT DRUGS

Quinine depresses the heart, while DUFFY'S PURE MALT WHISKEY tones and strengthens the heart action, invigorates the brain, purifies the entire system and keeps it in a normally healthy condition. It kills all disease germs and microbes.

Caution—When you ask for Duffy's Pure Malt Whiskey be sure you get the genuine. Unscrupulous dealers, mindful of the excellence of this preparation, will try to sell cheap imitations, and so-called Malt Whiskey substitutes, which are put on the market for profit only, and which far from relieving the sick, are positively harmful. Demand "Duffy's" and be sure you get it. It is the only absolutely pure malt whiskey which contains medicinal, health-giving qualities. Look for the trade-mark, "The Old Chemist," on the label.

Duffy's Pure Malt Whiskey has cured millions in the last 50 years. It is prescribed by over 7,000 doctors and used exclusively by 2,000 prominent hospitals. The genuine is

SOLD AT ALL DISPENSARIES, or direct at \$1.00 a bottle. It is the only whiskey recognized by the Government as a medicine. Valuable medical booklet sent free. Duffy Malt Whiskey Company, Rochester, N. Y.

WHY DO SO MANY

Cotton Mill Operatives Have Sallow Complexions?—Colonel Springs' Theory.

A. K. In News and Courier.

There are a great many people who think the sallow and pale complexion, which so many mill operatives have, is a result of their work. Just before I started on my trip of investigation I read an article written by a young woman who visited the Columbia cotton mills and who made much ado about the sallow complexion of the mill help. In my visits to the various cotton mills I found a number of men and women, boys and girls, who did have a pale, sallow look, and I tried to find out why. It is not confined to the children. There are men and women who have the same look, and while the confining work of the mills may, to some extent, account for it, there is other cause for it. Working side by side with the pale, sallow operatives in many mills are operatives who are as bright and rosy-cheeked and full-blooded as any that can be found in this state. It is not an uncommon thing to go into a spinning room, or any other department of the mills, and find at one end of the frame a bright, rosy-cheeked child. The complexion is not altogether the result of mill life. A census would show that there are more pink-cheeked children than pale in the mills. There are many opinions on the subject. Some charge the complexions to malaria; others think it prenatal. Others think it is climatic, and others that it is entirely due to the cotton mill hands' mode of

living and poorly prepared food. One man, who had been looking into the question very carefully told me that it was the "hook-worm." I do not pretend to say what it is or why it is, but it is certain that there are to be found in the sand hills of Richland, Lancaster, and Chesterfield and in the mountainous section of this state and North Carolina, men, women and children with just the same complexion as is found among the operatives of any mill in South Carolina.

If some one can find out why so many people who have never been inside of a cotton mill have the "cotton mill color" it will be practicable to account for the color of the cotton mill people.

Over in Lancaster I talked with Mr. Springs on the subject and he told me that the pale, saffron colored operative of his mill came there that way, and he would make me a wager that he could tell exactly where every one in the mill came from. We went to the mill at the noon hour, and every child that went in we stopped. Those who were rosy colored and bright-looking generally came from Lancaster county and from prosperous farms, and without even asking the children where they came from he recognized those with the pale, yellow skin that they came from eastern Lancaster and Chesterfield county, and the complexion seemed to be quite common with that section of the country. Some of them were free to admit that they had been clay eaters before they were employed in the cotton mills.

This mill, situated as it is, furnishes a good field for the study of this question. Here will be found the Beckham

girls, bright, vivacious young women, making a good living, and all of them with the brightest complexion, and in the same room other young women not near so rosy cheeked or healthy looking. Yet the Beckham girls have been in the mill longer than those who are pale. In this mill there is Miss Mary Snipes, formerly of Chester County. She has as much color as would be found in a painted picture; and by her side, in striking contrast, is Miss Nettie Nyme; and from the same county as Miss Nettie Nyme is Will Kennington, who has plenty of color. Miss Ada Nye, at work in this mill, also has color and brightness of complexion, and if there were to be a beauty show, it would be hard to find a better entry than Miss Carrie Gale, who went into the cotton mill at Lancaster from her home, about eight miles below Lancaster, and who has ideal rosy cheeks, although she has been working in the cotton mill for a number of years. Theodore Starnes, who has been in the mill for two years, has a bright color, and right by him is a young fellow named Robinson, who is pale and sallow and uses tobacco. And so, in this way, I could have gone all through the mill and found one person who had worked in the mill for a number of years, who had a bright, rosy complexion, and by his or her side another, who had been in the mill perhaps just as long, with a most pronounced sallow complexion. And then, again, I could find mill help that had just lately come there from the farm, with skins as pallid, or more so, than those who had been there for years.

What I found at Lancaster was the case at a number of other places. While going over to Graniteville I passed a little place called Summit, and there, on a lumber pile, standing out in the open air, was a little boy, probably 15 years old, miles away from a cotton mill, who looked pale and saffron, more so than any boy I had seen in any cotton mill in South Carolina; and yet, in all likelihood this boy had never seen the doors of a cotton mill.

It is a mistake directly to charge the cotton mills with being the cause of the complexion of their operatives. They have no more to do with the complexion of their operatives than the farms have to do with the complexion of the people who work on them.

It would be an excellent thing to have somebody go to the various cotton mill communities and teach the people how to cook properly. They get the very best food, but do not know how to prepare it. In some of the homes I saw food horribly sacrificed. Merchants all say that the operatives buy the best flour and provisions of all kinds; but they do not know how to prepare it. If somebody, who wanted to do a true charity, would instruct these people how to cook, they would be doing them a kindness that would have good results.

One of the cotton mill officers told me that he attached so much importance to the question of properly prepared food that he was almost tempted to build a large dining hall, where the operatives could get their dinner, at least during working hours, and then he would know

that they would have nourishing soups and properly prepared meats once a day.

TILLMAN WOULDN'T TALK.

Lieut. B. J. Tillman Has Nothing to Say of Columbia Tragedy.

Lieut. Benjamin Jones Tillman of the Seventh Infantry, United States army, brother of Lieut. Gov. James H. Tillman, of South Carolina, who shot Editor N. G. Gonzales at Columbia, was in the city yesterday. He has been on a four months' leave of absence, and left during the afternoon for San Francisco to join his regiment, which is now stationed at that place. When seen by a reporter for the Constitution he declined to make any statement regarding the affair in which his brother was one of the principals.

"Under the circumstances," said he, "I do not think it would be proper for me to say anything. I only saw my brother about ten days ago."

"Did he tell you he was expecting any trouble?" he was asked.

"I would rather not make any statement at all," was the reply.

Lieut. Tillman left over the Atlanta and West Point route for the south. He has recently been stationed in Alaska.—Atlanta Constitution.

MANAGER WANTED.

Trustworthy, either sex, by Wholesale Merchandise Company of solid financial standing, to manage Local Representatives who will organize clubs among consumers. 40 per cent saved for our customers. Business no experiment but a proven success. Salary \$18.00 a week, expenses advanced. Experience unnecessary. Address D. B. Clarkson, Mgr., 334 Dearborn St., Chicago, Ill. Jan 7, 2m

New Trains From the North-West.

To induce tourists from the East, North and West to visit Florida and other Southern resorts, each year the Southern Railway undertakes to do a little more than in previous years to make the resorts of Florida and the South more attractive to the people of the East, North and West and this season have put in service the best tourists trains that have ever been operated in the South.

The first of these trains established is "The Chicago and Florida Special", first trip southbound January 5th, 1903. This train will have through sleepers from Chicago, Pittsburg, Cleveland, Detroit, Cincinnati and Louisville and are run through to St. Augustine in very quick time. Train will consist of very best Pullman cars, dining cars and club cars, etc. Between Chattanooga, Tenn., and Jacksonville, Fla., there will be also provided on this train a first class coach, which will be of much accommodation to travel between Chattanooga, Atlanta, Macon and Jacksonville. Between Chattanooga and Jacksonville the train will only stop at Rome, Atlanta and Macon.

Northbound this train will leave St. Augustine, 8:15 a. m.; Jacksonville, 9:20 a. m.; pass Atlanta, 6:20 p. m.; arrive Cincinnati next morning, at which place the sleeping cars diverge to various lines reaching Chicago, De-

A Fat Field makes a fat purse. A fertilizer without sufficient Potash is not complete. Our books are complete treatises on fertilizers, written by men who know. Write for them. GERMAN FERTILIZER WORKS, 93 Nassau Street, New York.

troit, Cleveland and Pittsburg the same afternoon. This "Chicago and Florida Special" was inaugurated by the Southern Railway two seasons ago, but this season the train will be better than ever before, and will do very much towards diverting the people from Chicago and the Northwest to resorts of Florida, instead of as heretofore they going to Mexico, California, etc.

Southern Railway also operates a train known as "The Florida Limited," which is a through train from Cincinnati to St. Augustine, schedule time of train between Cincinnati and Jacksonville is twenty-four hours. The run from Jacksonville to St. Augustine is made in an hour. This train has through sleeper from Cincinnati to St. Augustine; Chicago to St. Augustine via Louisville; Kansas City to Jacksonville via Memphis, Birmingham and Atlanta.

Northbound this train will leave St. Augustine 6:10 p. m.; leave Jacksonville 7:45 p. m.; arrive Atlanta next morning; arrive Cincinnati same afternoon.

From the East Southern Railway will establish, first trip southbound, January 12th, 1903, their famous "Palm Limited," which is probably the finest train in the world. This train southbound will leave New York (Daily except Sunday) 12:40 p. m.; arrive Jacksonville 2:20 p. m.; arrive St. Augustine 3:30 p. m.

Northbound this train will leave St. Augustine (Daily except Sunday) 11:10 a. m.; leave Jacksonville 12:20 p. m.; arrive New York 4:13 p. m.

This train, the "Palm Limited," in addition to double daily service operated all-year-round between New York and Jacksonville via the Southern Railway. It is hard to describe the magnificence of these special Florida trains as run by the Southern Railway; about all that can be said of them is that they are composed of the finest cars that the Pullman company can build.
