Evidence-The Result. The trial of Dr. A. N. Bellinger for the killing of Stephney Riley on the and October last, was had before Judge Cothran in Charleston last week, commencing on Tuesday. Solicitor Jervey appeared for the State, while the defence was represented by Messrs Mitchell & Smith and the Hon. A. G. Magrath. After several challenges a jury, composed of twelve white men, was empaneled and sworn. The first witness for the State was Dr. Kinloch, who simply described the five wounds—two in the head and three in the

W. W. DeVeaux described the encounter-or so much of it as he saw. He stated that Riley was advancing on Dr. Bellinger with his head down and his right arm outstretched, and that Dr. B. fired five times rapidly. Riley fell, and Dr. Bellinger walked off.

James Weils, colored, stated the cir-cumstances of the encounter, and swore that after Dr. Bellinger fired twice Riley fell, and that after he fell Dr. Bellinger shot him three times.

Selina Carter, colored, described the difficulty of the night before the killing, but her account did not greatly differ from Dr. Bellinger's, summarized below. She saw only two shots, being in the house, and then got Riley's pistol and raised the alarm. When she got to Riley he was dead. Alexander Williams, colored, stated

that he saw the morning encounter, and, after Dr. Bellinger shot Riley twice he (witness) saw him standing over Riley's prostrate body, and fire three times.

Joseph Cain testified to the encoun-

ter, and said he saw Dr. Bellinger "stagger back", and fire, and that the Doctor fired twice into Riley's prostrate body, and snapped his pistol after

Joseph Kennedy, colored, brought out nothing new. He denied that he said before the coroner that Dr. B. retreated from Riley into the middle of the street, and then fired.

The State here closed its case.
Dr. A. N. Bellinger, the defendant, was now sworn. He stated that on the night before the killing he was in the streets, attending to his regular professional business, and that when he came to a point on Bull street, between Smith and Rutledge, he heard loud strokes of a whip, and cursing. He said to the man (whom he found to be Riley). "You purify to be the consequence is that large quantities of cotton are being shipped by the Savannah River. It is alleged that the railroad in question has advanced to be Riley), "You ought to be ashamed of beating that horse in that manner; why don't you lead him on?" the freight charges on cotton to twenty-five cents per hundred pounds and on other classes of freight pro-Riley became angry and abused, cursed defendant, flourished his whip, and came on him with a knife in his hand. Defendant went off, leaving Riley cursing and threatening.

The morning of the homicide, de

fendant went on his usual rounds, by and legs stretched apart and glaring at him in this manner. As I got opposite to him he said: "I took you for a gentleman, but I never made such a mistake in my life; you are a d—d white———." That was pretty galling. I turned and I said: "Rilev, this thing has got to stop here. You this thing has got to stop here. You cursed me shamefully last night and threatened me. Now you have got to retract this." I said this in a voice The wor not louder than I am talking in now. Preserving the same position, he said better man than you are and I will give you h-1." I said: "I don't want to fight, but you have got to take tinued. these things back," and he said "G-d d-n you, I will give you h-l anyhow," and with that he made a rush at me, and as I stepped back, having on low

looked again he (Riley) was coming at me with his knife in his hand, so, Witness indicated the position thus: Head bent down, the left arm thrown up as a shield and the right hand with the knife in it drawn back.) Q. Was the knife open? A. Yes, open,

open knife in his band. Did not see firing, but heard it. Witness's horse then jumped off and carried him ont

Leon and Alexander McLoy testified to the good reputation and peaceable

character of the defendant.

Hugh Murray testified that he saw Riley at the railroad depot the morning after the night fuss, and Riley told him that he (Riley) had cursed Dr. B. about his interference with him, and had also threatened him.

J. G. DeVeaux said he saw Dr. B. retreating from Riley, and then saw four or five shots fired in rapid suc-The evidence of Kennedy before the

coroner was put in, to contradict his statement as to what he then said. James Kelly and J. C. Hemphill stated that they saw and talked with Bellinger about 9 o'clock on the morning of the homicide, and he was in his usual good humor-not excited. (The

killing occurred about eleven o'clock.) This closed the evidence. Mr. Smith proposed to submit the case without argument, but the Solicitor declined.
Arguments were then made by Judge Magrath, Mr. Mitchell and the Solicitor.

On Thursday the case went to the jury, after the charge of the Judge, This retired at 2.40, p. m. At 7 p. m., the Judge told them that if they agreed by ten, he would receive their verdict-otherwise they could remain. At that hour they had made no sign, and they were locked up till next morning.

#### THE RESULT.

On Friday morning the jury return-ed into Court, saying that it was impossible for them to agree on any verdict. A mistrial was accordingly entered. The jury stood eleven for acquittal and one for conviction of manslaughter.

#### RAILROADS IN THE STATE.

New Roads, Old Roads and Roads that are to be Built.

At a recent election held in Bullock's Creek township, York county, on the question of subscribing \$32,000 to the capital stock of the Georgetown and North Carolina Narrow Gauge Railroad, there were 376 votes polled. Only 81 votes were polled against the

#### CAPITAL SOCIAL GOSSIP.

Whitney and Bayard to Contest for Social Supremacy - Points About Other Lead-

(Washington Letter in Cleveland Leader.) Secretary Whitney will contest with Secretary Bayard as the most popular social member of the Cabinet during the coming season. He has rented the old Frelingtuysen massion, which was the social centre of Mr. Arthur's administration, and is adding a large ball-toom for this winter's entertainments. This ball room will be nearly as big as the city council chamber in Cleveland, and will, it is said, be hung with gobelin tapestries. Whitney has more money than Bayard, and, though he cannot cook the terrapin for his dinners himself like the Secretary of State, he can hire a French cook who will probably equal him. Bayard ought not to expect to save much out of his salary as Secretary of State, even if he does do his ewn cooking His position demands more social than any other outside of that of the President, and he is a parsimonious man indeed who can lay up money in it. Mr. Evarts paid out \$20,000 more than his salary while he was Secretary of State under Hayes, thus making his tour years cost him \$52,000. Bayard will get through on less than this, but he has a family and he wears too good clothes and has too tasty a stomach to save anything on \$8,000 a year. Vice-President Hendricks will live

at Willard's during the coming season. This living at a hotel by a prominent official has of late been looked down upon by Washington society, but Mr. Hendricks is such an adroit mixer and his wife has so many social qualities that their little parlors at Willard's will probably be as popular as any place here.

The fact that Mrs. Logan has a house might lead to the supposition that she was going to entertain largely during the coming season. I don't think she will have as many callers as when she was in the stuffy little boarding-house on Twelfth street. She is too much out of the way, and it is a Sabbath journey to get to her. The result will be that her calling list will be reduced to those who really want to ce her, and that it will rather select

than large. Henry B. Payne will keep house next year, and I understand he has rented on Vermont avenue near the Portland. This will not be a great distance from his son-in-law, and Mrs. Whitney will assist her mother in many of her receptions. Whitney's actions in regard to entertainment lead to the suggestion that Henry B. Payne and he may be conceeting a scheme whereby young Whitney shall be the Presidential candidate for 1888, and that his father-in-law may make him his heir to his Presidential support. The opportunities for such a post-Presidential campaign are excellent. There is plenty of money in Whitney Payne "barT" to run it well, and Mr. Whitney comes from the right State to make a good Democratic candidate. This is worth thinking about, and please don't forget it.

### A MISPLACED SWITCH.

A Frightful Wreck on the Baltimore and Chio Railroad.

A frightful wreck occurred at Blue tone quarry neary Pittsburg, Pa, on the Baltimore and Onio railroad at seven o'clock on Thursday morning. Train No. 12, through express from Baltimore to Pittsburg, consisting of a sleeper, two coaches, two baggage and one express ear, ran into a misplaced switch and was completely wrecked. The sleeper rolled over an embankment into the Youghiouheny river. The other cars were upset and the whole train was detached from the engine. Sixteen persons were injured but none killed outright.

The report of the wreek reached Pittsburg about 9 o'clock and caused deut disarranged the telegraph wires and it was after 10 o'clock before the following particulars of the accident

were received: The express train was about fifteen minutes late when it reached the place where the wreck occurred. At Bluestone quarry the track makes a sharp curve around the river. A short dis-tance back from the bank there is a switch at the commencement of the curve. Whether some one had left the switch partly open or not is not certain. The officials of the road say the switch had been tampered with, evidently with the intention of causing a wreck. Had the switch been open the train would have gone into it all right and would have been stopped before any damage had been done. As it was, the train could go on neith-The result was that the engine dashed along the ties, tearing up the track and causing the coaches and sleeping cars to break loose and dash on over the embaukment in the wildest confusion. The sleeping car rolled over and stopped with its side lying in the bed of the river thirty feet below. The two passenger coaches stopped at the water's edge, but the baggage car went into the water. There were many passengers on board. The scene that followed was one that beggared description. The cries of the injured were heard from every

car. The frightened sprang from the windows and struggled with each other to escape from the rolling cars, and the wails of pain were heard from some who were held within the wreck. Those who escaped uninjured were too much startled for a time to render assistance. Then they began the res-A messenger was sent to Cornellsville for medical assistance, and in a short time a corps of physicians were sent up on a special train. The njured, after having their wounds dressed, were removed to the hotels at Cornellsville, where they received every attention that could be given them by the railroad company. The wreck caused great excitement at Cornellsville, and for hours afterwards people hurried to the scene of the accident. The track was blockaded and torn so badly that no truins got

-Mrs. C. M. Walker, of Wildwood, Fla., has in her possession a baby dress which is seventy-five years old and has quite a history. It was the first dress ever worn by her father, John W. Barr, who was born in Scotland, and is now a citizen of Oakwell, Camden county, Ga. Mr. Barr was the father of eleven children, all of whom have worn this dress.

through until that afternoon.

#### CONDITION OF THE CROPS

Report of the United States Agricultural Depa tment on Cotton, Corn, Hay, Potatoes &c , for the 1st November.

The crop report of the National department of agriculture says that the cotton returns of November are local estimates of the yield per acre. They are somewhat higher than those of the last two years, but materially lower than those of 1881 and 1882. The inerease over the yield of last year is men who have had hundred of years most marked in Tennessee and Geor- of study and experience to guide them. gia. In Arkansas and Tennessee, where the average yield is unusually soil than any other, and may fail enhigh, the rate depressed by unfavora-tirely after having been very fine for ble conditions of August and September. The rate of yield by States is as

Virginia 152 pounds per acre, North weather has been favorable for picking, and killing frosts are only reported in the northern border of the cotton belt. The top crop is very light and in many places a scarcely appreciable quantity. The drought during the early fruiting period caused shedthe early fruting period caused shedding or shrivelling of bolls, and reduced the yield in North and South Carolina and parts of Texas. In a large portion of the Gulf ceast there was an excess of rain and destructive was an excess of rain and destructive and the experience is needed. storms which proved almost equally injurious. Injury by caterpillars boll worms have been severe in Central Alabama, in parts of Texas, Louisiana and Mississippi, and in a few counties in Georgia. Small los from insects is reported, except in States bordering on the Guif coast. The past month has been generally favorable for picking, which is well advanced, more than three-fourths of advanced, more than three-fourths of the crop having been gathered. Rains have interfered with the barvesting more in Georgia and Alabama than elsewhere. With good weather here after the proportion to be gathered in December will be confined to localities favored with a ton error worth. harvesting.
The present crop of corn is the first

full average in the rate of yield since 1880, which was the last of a series of aere. The present crop, grown on an area of 73,000,000 to 74,000,000 acres, L. W. is slightly above the average for a jection to a break in what is called the period of ten years or 261 bushels per Solid South? The highest rate of yield is 361 and Missouri, each average several bushels per acre less than in the census ccar, Illinois 31, Iowa 32, Missouri 30. Utah averages 36, Massachusetts, Connecticut and Colorado 35, New Hamp-33, Wisconsin 32, Kansas 31. The Southern States makes an average The quality of corn is very good in the East and South, medium in central parts of the West, and somewhat depreciated on the northern border from Michigan to Dakota,

order from Michigan to Dakota.

# TALK ABOUT TOBACCO

A Practical Farmer's Experience with the Democracy rescued them.

ORANGEBURG, November 2.
To the Editor of the News and Conerer: I have cultivated tobacco for my | A Distinguished ex-Confederate Surgeon own use for smoking purposes, for the last twenty years, and will give you my experience with it for the heacit medical practitioner and surgeon dur-

shade retards the growth of the plants, while some shade is advantageous. Early in January, if not sconer, make a large brush or log heap on the head ing water to the sugar-house, and soon and burn it thoroughly. I then spade had the pump working under a heavy up the soil about ten or twelve inches deep and again burn a brush heap upon it, and then let the spot stand handed his mail by the postboy. He inches this time), so as to have it in stooped near the furnace to read it, the best tilth. I then scatter the seeds when the explosion took place. The the bed they are apt to be spindling away. Search was instituted for the and are easily wilted down when doctor. His body was found among Plant beds on old lands do not thrive

nearly so well as in the woods.

Second. In this latitude I find the worms a very troublesome enemy to the leaf and also to the seed that is in June or about the first of July and continues until the tobacco is ready for the knife, but not so much after the leaves begin to get tough as when young. If any worms should be left on the stocks that are put in the house for natural drying they will there destroy the tobacco. This danger is not hard to overcome, however, par ticularly if artificial heat is resorted to

for drying purposes
Third. If the ground is in full tilth and a good stand is obtained early, a second crop can be made from the

stubble. I have two kinds of seed, mixed; one a narrow leaf, the other a very large, broad leaf. The narrow leaf is finer and yellower than the broad leaf but the broad leaf will grow taller and heavier, and make a far greater yield side by side I have no seed for sale. as I only keep enough for myself and as few neighbors.

F. H. GRAMLING.

The Tobacco Boom in South Carolina. (From the Marion Cotton Plant.)

Wishing and working for the welfare of our farmers, Cotton Plant can-tions them against flying off at a tan-gent. The News and Courier, with its interest for our farmers, is advocating the cultivation of tobacco in our State on a large and extensive scale. We advise our farmers to go slow on this question. The impover-ished condition of our soil has nearly impoverished our State, and tobacco is a much greater exhauster of the soil than cotton. Several months ago we published a letter of Mr. J. C.

Stribling on tobacco, which clearly defined the dangers, and now the editor of the Greenville Daily News, a

Virginian, says: There may be much profit in growing tobacco is our State, but it is an expensive experiment and will be a disastrous one if it is tried otherwise than cautiously. It is well to remember that the poorest section of Virgininia is that devoted to tobaccogrowing under the management of The crop is more exhaustive to the soil than any other, and may fail en-

two or three years.

With our present light we believe tobacco will be profitably grown in a Virginia 152 pounds per acre, Carolina 157, South Carolina 142, Corn, as a few acres of it on a particular formal 150, Florida 105, Alabama 145, Geornia 150, Florida 105, Alabama 145, Corn, as a few acres of it on a particular formal formal formal few acres of it on a particular formal few acres of it on a particular furmers have generally tried that system for a year or two they can learn the methods of growing and curing the crop and know what hope of profit there is in it. At the same time they will gradually build up home markets where what iobacco they make can be

#### WILL THE SOUTH DIVIDE?

Questions and Answers upon an Interest ing Political Point.

The New York Herald has recently sent out the following questions to prominent Southern men with the request that they be answered:
1. Upon what issue and by what

ties favored with a top crop worth North and the South be acceptable to harvesting. S. Do you consider that the negro

voters are more indifferent than form erly to the suffrage, and are they dissix full crops of 26 to 28 bushels per posed to disregard the color line in 4. What is the greatest existing ob-

Prominent among the replies is the

growing States will produce four-tenths of the entire crop, Illinois, Iowa and Missonri, cosh are made and missonri, cosh are missonri, cosh are made and missonri, cosh are miss I answer your first question thus: The solidity of the white vote of the South is the result of the false reconstruction policy of the Republican par ty after the war. The white po will not practically divide until the shire and Rhode Island 34, Michigan cofored people do, and these latter will not divide so long as the few white acting with them are sustained by the National Republican party's promises of office and reward. Malione said, you know, that he controlled the negro vote, and it was only a question of how many white votes he could add to

rot, which has reduced the New York rot perfect in Michigan party and the North rot perfect in Michigan party and Minnesota.

To your second question I answer: To your second question I answer: An interchange of speakers would make the sections know each other better, and might do good. We would be the North rot perfect the North rot with t gan, Illinois and Minnesota.

Grace was in all her steps, Heaven to her eye, In every gesture dignity and love!"

So appeared Mother Eve, and so may shine her fair descendants, with the exercise of common sense, care and proper treatment. An plaints are directly caused by dis-turbance or suppression of the Menstrual Function. In every such Activities and the control of the case that sterling and unfailing specific. Bradefield's Female Regulators, will effect relief and

are. It is from the recipe of a most It is from the recipe of a most distinguished physician. It is composed of strictly officinal ingredients, whose happy combination has never been surpassed. It is prepared with scientific skill from the dinest materials. It bears the palm for constancy of strength, certainty of effect, elegance of preparation, beauty of appearance and relative cheapness. The testimony in its favor is genuine. It never fails when fairly tried.

Cartersville, Ga
This will certify that two members of my immediate family, after a having suffered for many years from menstrual irregularity, and having been treated without benefit by various medical declarafit by various medical doctors, were at length completely cured by one bottle of Dr. J. Bradfield's Female Regulator. Its effect in such cases is truty wonderful, and well may the remedy be called "Woman's Best Friend."

Yours Respectfully, JAMES W. STRANGE. Send for our book on the "Health and Happiness of Woman." Mail-BRADFIELD REGULATOR Co.,
