HOW TO MAKE SOUP.

Ordinary cooks the preparation of a soup is a mystery...

Every animal used in the cooking should be scrupulously clean.

Do not put the bones in until they are first pounded into small pieces.

Make your soup the day before it is wanted.

Beware of a hot fire. Simmering is the life as boiling is the death of any good soup.

If your soup is to contain vegetables, let these be boiled a little while in separate water before adding them.

Do not add cream or milk without first boiling them separately and straining them.

Whenever an egg is to be added do not put it directly with the body of the soup.

Keep your soups always in stone-ware or china, and when stirring or skimming them use a wooden spoon.

THE BEST FERTILIZERS.

Mr. J. M. Smith, of Brown county, Wis., writes: "What fertilizer is best for vegetables?"

The greatest depth so far discovered in the ocean is 28,560 feet, five miles, or about 2,200 feet less than the height of the world's loftiest mountain peak, Mt. Everest...

Professor Merriam declares that in "10,000 years the ocean will roll 200 feet deep over New York City."

As reasonably expect oaks from a mushroom-bed as great and durable profits from small and hasty efforts.

THE COMPASS. Little Jack—"What did you mean by saying he was captain of this ship?"

Ma—"Oh, that is only his way of saying that he is head of the house."

Little Jack—"If pa is captain, then what are you?"

Ma—"Well, I suppose I am the pilot?"

Little Jack—"Oh, yes, and then I must be the compass."

Ma—"The compass? Why the compass?"

Little Jack—"Why, the captain and pilot are boxing the compass, you know."

Men seem to kiss among themselves. And some would kiss a brooder. But women want to kiss so bad. They kiss and kiss each other.

Done with a pen—A dead pig.

The Emperor Louis Napoleon would only the most virtuous the world could produce. Fred. Horod says the Emperor's...

In these days of adulteration, it is a rare thing to find a ham that is not only pure, but also delicious.

Do not put the bones in until they are first pounded into small pieces.

If your meat and bones are fresh—that is, uncooked—they should be put into cold water.

Whenever an egg is to be added do not put it directly with the body of the soup.

Keep your soups always in stone-ware or china, and when stirring or skimming them use a wooden spoon.
