Lions Affected by Weather.

A peculiarity noticed by the keepers out at the Zoo is that bad weather affects lions just as it does human beings. A rainy day will make them limp and listless, and a glimpse of sunshine makes them happy as crickets. Bad weather, however, does not prevent them remembering when meal time is at hand, and they are as restless as young kittens till their food is forth-

Purely a Local Disease.

Eczema is a local disease and needs local treatment. The irritated, diseased skin must be seeined and smoothed and healed. No use to dese yourself and min your stomach just because of an itching eruption. Tetterine is the only simple, safe and certain cure for Tetter, Eczema, lingworm and other skin troubles. At cruggists or by mail for 50 cents in stamps. J. T. Shuptrine, Savannah, Ga.

Fits permanently cured. No fits or nervous-ness after first day's use of Dr. Kline's Great Nerve Restorer, Etrial bottle and treatise free Dr. R. H. KLINE, Ltd., 331 Arch St., Phila., Pa.

PISO'S CURE FOR
CURES WHERE ALL ELSE FAILS,
Best Cough Syrup. Tastes Good. Use
in time. Sold by druggists. CONSUMPTION S "CROPS ARE MAGNIFICENT"

In the Western Portion of the State. Cotton Picking in Progress.

The following is a brief summary of South Carolina crop report for the week ending August 17th, by Section Disector Bauer:

There is a great diversity in the tone of the reports for the week, the correspondents being abount equally divided in calling the week a favorable As a general rule the best reports come from the western portions of the State where in places "the crops are magnificent." Worms have appeared in many of the eastern counties in large numbers, and from meagre discriptions furnished, it is supposed to be the Army worm. They have destroyed much grass, for hay in Williamsburg, Kershaw, Berkeley, Colle-ton and Beaufort counties and in places have attacted, corn, rice and cotton. Their increase in numbers during the week was alarmingly rapid. They have also made their appearance in a number of other counties but as yet no threatening force.

Corn varies in condition with locality and soil and the culture it re-ceived, but that portion of the crop already made is very nearly if not quite up to an average. Late corn is still very promising and will be greatly improved, by the recent rains. Fodder pulling is making rapid progress over the eastern counties where it is nearing completion, and extending gradually westward where the crop is much later this year than usual.

Chinch bugs continue to damage corn in Chester. Fodder was saved in good condition.

Cotton was not uniformly affected by last week's weather; many reports indicate a seasonable improvement, and fully as many note deterioration, due chiefly to excessive shedding of squares and some bolls, some rotting of bolls, while on sandy lands the plant is rapidly dying and consequently has quit putting on fruit. Rust also has developed over large areas with greatest injury noted in Sumter, Williamsburg, Clarendon and Chester, although not confined to those counties. The crop is best in the western counties and Marlbelo, Marion, and the northeastern

counties generally.

Too much "weed" with too little fruit is a common complaint, but cotton gen-erally is heavily fruited.

Picking is as yet confined to the more easterly counties, although the early varieties are opening in the central and western counties. Picking will not be general for some time to come. An increase in size of bolls noted since rains of previous week. An insect is puncturing the bolls and ruining them in Edgefield. More or less shedding is reported from a majority of the coun-

Sea-Island cotton improved and shedding less than last week.

Tobacco curing making rapid proress. Some planters have finished. Worms damaging late plants. Peas are doing well. Cutting pea-vine

has begun in Barnwell.

Rice is ripening rapidly, and, where not injured by caterpillars, is in promising condition. Turnip sowing continues and better

stands have been attained from the later seedings. A large acreage will be planted. Sorghum grinding and boiling has

begun in some sections.

Sweet potatoes doing well generally,

except in portions of Spartanburg, and will be a large crop.

Scuppernong grapes ripening. Figs are plentiful. Melons abundant and of good quality in the western counties. Le Conte pear trees full of fine fruit in Chester and Chesterfield.

Pastures afford excellent grazing. In the garden-truck districts ground is being prepared for fall vegetables.

Foods. The foods of the various classes of a nation were often regulated by law in the past. Two Roman laws, passed about 160 B. C., regulated the costs of feasts at private houses, stating how much was to be eaten, and forbidding the fattening of fowls. Julius Caesar was very strict with regard to food; and used to send his soldiers to confis cate forbidden luxuries offered for sale in the market-places, and to private houses to see that the legal dietary was properly observed. These diet laws were probably necessary in ancient Rome remembering the gluttony of the Romans. Coming down to the Middle Ages, laws of Charles VI. of France and of Edward III, of England decreed the diet of the French and English according to their rank, both as to quality and quantity. The Parliament of Scotland in 1433 passed a similar law. In addition to these the laws regarding dress were particularly severe, and it is curious to notice that some of the English sumptuary laws remained in force, nominally, until about thirty-five

SPAIN'S ASSASSIN TO DIE.

Angiolillo, Premier Canovas's Murderer, Awarded a Death Sentence.

EXECUTION BY THE GARROTE.

The Trial Was Summary-Government Ordered It Hastened-The Assassin Speaks in His Own Defense-Passion For Vengeance Led Him to Commit the Crime-Horrifled by the Scaffold.

Madrid, Spain (By Cable) .- Michele Angiolillo, the Anarchist assassin of Premier Canovas del Castillo, who was tried by court martial at Vergara, was found guilty and was sentenced to death. Angiolillo will be garroted within the prison.

About 200 persons were present at the trial. The vicinity of the prison was almost deserted, the public being apparently indifferent, in view of the certainty that the leath penalty would follow the court mar-

Angiolillo, heavily manacled sat between two gendarmes and immediately in front of his Judges. On a table near by lay his revolver and other material evidence of the

The President of the court read the declarations of eye-witnesses, after which the written statement of the prisoner was read by the clerk of the court. Angiolillo, in the course of the statement, said that he left Foggia in October 1885, and went to Marseilles and Barcelona, where he took the name of Jose Santos. At first he had no thought of becoming an Anarchist, but while at Coromina he began to be interested in Anarchist doctrines.

When the execution took place at Barcelona, on May 4, of five of the Anarchists convicted of participation in the bomb outrage at the feast of Corpus Christi, he con-ceived the idea of assassinating Canovas. Without seeking an accomplice he carried out the resolution.

Angiolillo went on to say that the passion

for vengeance led him to commit the crime. As he was unacquainted with the manufac-

As he was unacquainted with the manufac-ture of explosives, he used the revolver.

The Public Prosecutor described the crime
as "premeditated murder," and asked the
court to impose the death penalty.

Lieutenant Gorria, whom the court had
assigned as counsel for Angioliilo, urged
that the prisoner was demented at the time
of the shooting, and made a strong appeal
to the benevolence of the judges. While
his counsel was presenting this plea Anhis counsel was presenting this plea, Angiolillo listened in silence. Then he asked permission to speak for himself, which was granted. He thanked Lieutenant Gorria for his efforts and denied that he had any accomplices or that he was an accomplice I those who committed the bomb-throwing outrage at Barcelona, or that he had participated in secret gatherings of Anar-

Angiolillo persisted in speaking of polities and of the wars in Cuba and the Philippines. The President said: "All that giolillo replied: "I must justify myself."
The President retorted: "That is no justification. Moreover, you Moreover, you can convince no-

Angiolillo began again, but the President declared the trial ended, and ordered the

court room cleared. The judges deliberated for an hour and hen announced the sentence of the court. On hearing this the prisoner, who expected to be shot like other Anarchists, startled and horrified. His flashing eyes and excited countenance gave a strange aspect to his haggard features, uncombed eard and slight figure as the guards led him away to solitary confinement. which he will issue only to be led to death behind the walls of Nergara Prison. Angiolillo will hear nothing of the outer world or see anybody but the priests.

A REMARKABLE PREACHER.

He is the Heart and Brain of the Unique Philadelphia Temple.

he Grace Baptist Church of Phil Penn., is ane of the most remarkable men in America. He is the heart and brain of in America. He is the heart and brain of the Templé, a church organization the like of which exists in no other place. Dr. Conwell has built up a congregation large enough for four churches, but he holds it together by the power of work. In the Temple are four auditoriums, a college, an academy, training schools for almost every profession, and calling, and the headacademy, training schools for almost every profession and calling, and the head-quarters for the direction of outside work of so large and varied an order that no less

REV. DR. RUSSELL E. CONWELL

than a book would serve to describe it. To further unify this great business a twentypage weekly paper, the Temple Magazine, is published in the Temple, and makes a profit for the church. Indeed the enterprises under Dr. Conwell's charge pay handsomely and the money is spent in helping poor people to learn how to help themselves. Dr. Conwell is fifty-four years old. He has seen life in many countries and in many conditions in his own country. He fought for the Union when only a lad, and after the war became a lawyer. Then and after the war became a rawyer. Then he dropped law and became a reporter on New York papers. He founded the Minn-eapolis Tribune, traveled around the world as a correspondent, abandoned journalism to return to the law, which in turn he gave up for the church. He has been pastor of Grace Church since 1882, and by his active labor in those years he has built up a work that furnishes a splendid object lesson in the matter of applied religion.

River Steamer Blows Up.

News has just been received to the effect that the steamer Fritz had blown up fifteen miles south of Cairo, Ill., and that nine gen killed. Several others are reported as abured. The steamer was owned by Captain B. E. Bradley, of Cairo.

Eoy Kills Baby Accidentally. Morris Eppler, eight years old, found a revolver at home at Dayton, Ohio, and while trying the weapon shot and killed Rudolph Freikle, three years old. He dragged the body into the yard and went to had but he is now in iall bed, but he ie now in jail.

FOR THE MOUSEWIFE.

Lamb's Tail Soup.

This is a delicacy for the summer. Cut six lambs' tails into joints and boil them till tender in some weak stock, with a slice of raw ham or a ham bone. Season with a little onion, parsley, a bay leaf, a blade of mace and a few mushrooms. Simmer slowly for four hours, and then strain through a cloth. Thicken the soup with flour, add salt and cayenne and white wine to taste. Boil up, add the pieces of tail and serve.

Jelly Omelet for Breakfast. This is a delicious breakfast relish, much appreciated by those who have eaten it. Break into a bowl four eggs, and beat for a few seconds. Do not beat back and forth, but in steady, even strokes from left to right. Put a tablespoonful of butter in your frying pan and place over the fire. Do not allow the butter to scorch or burn. Put in the beaten eggs and shake over the fire until it begins to set. The fire should be quick. When the signs of setting appear pour on a halftumbler of slightly warmed jelly; roll

Tomato Gravy.

the omelet quickly, and serve on a hot

Much is said, and none too much, of the domestic virtues of the apple. Next to it, perhaps, we may rate the tomato. It has one virtue that we have never seen mentioned; the property of emulsifying fats. To this may be added a singular faculty of assimulating itself to the flavor of meat gravy with which its juice may be cooked. Our housekeeping friends may try a fried steak, for once, by cooking a little tomato juice in the sizzling pan just after removing the meat. Any melted fat, or baked shreds and juice adhering to the iron, or butter applied to the meat, entirely disappear in an emulsion making a rich, copious, reddish brown gravy, with the true meat flavor scarcely modified by a slight piquant acidity from the fruit. If the steak has been left in a vessel to save its drainings since it was cut, and this juice be put in with that of the tomato, the gravy will be by so much enriched and enlarged, as well as thickened by the coagulation of the additional albumen. Colandered tomato pulp with this meat juice makes a thick sauce of like rich flavor, for roast or stew. - The Sanitary Era.

Gooseberry Fool,

Gooseberry fool is a celebrated English dessert. Ripe gooseberries are sometimes used for this purpose, but the best gooseberry fool is made of fruit which is still tart and not dead ripe. "Top and tail" enough fine, large berries to make a pint of pulp when strained. It will take nearly a quart. Sweeten the pulp a little and set it when col' in the refrigerator to become chilled. Whip a pint of rich cream to a stiff froth. Measure out a quart of the fruit. Mix with it-using a whip to do so-two tablespoonfuls of gelatine which have been cooked for two hours in two tablespoonfuls of cold water. Then dissolve it in about two tables confuls of boiling water. Strain the dissolved gelatine into the whipped cream, mix and add the pint of gooseberry pulp, which must have been stewed to a thick preserve. Set Rev. Dr. Russell H. Conwell, pastor of | the dish containing the cream and other ingredients into a pan of fine ice and whip it with a wire whip until the whole is ice cold and the gelatine has set. Pile the frothy mass into little crystal glasses. If it is not an appetizing color thin it with a little spinach green; it should be a pale, faint lettuce color. Heap each glass if you wish with a little snowy cream to contrast with the color of the gooseberry fool.

Household Hints.

A cake made with baking powder requires a moderately thin batter. There is no better medicine for bilious persons than lemon juice and

The faults of servants and the misdemeanors of children should never be discussed at meals.

For a nervous headache a cup of moderately strong tea in which two or three slices of lemon has been in-

The gilding on tarnished picture frames may be restored by washing it with warm water in which an onion has been boiled.

A bottle of soft tar, kept open, will often prevent bugs on the same principle that tar paper is used in clothes to keep away moths.

To have a custard pie of an even, nice brown when baked, sprinkle a little sugar over the top just before putting it into the oven. For sun streaks on furniture a

preparation of one-third sweet oil to two-thirds alcohol is excellent. Then polish with a cloth slightly dampened in kerosene. Chandeliers and all bronze articles

should only be gently and thoroughly dusted. No water should be applied to them, as it would speedily remove all the broazing. When a broaze article has become rubbed in places, it would be well to procure one of the advertised bronzing fluids and just paint the worn places over.

To restore scorched linen take two onions, peel and slice them and extract the juice by squeezing or pounding. Then cut up half an ounce of white soap and add two ounces of fuller's earth; mix with them the onion inice and half a pint of vinegar. Boil this emposition well and spread it when cool over the scorched part of the linen, leaving it to dry therein. Afterward wash out the linen.

New York's death rate for the past six months was 19.63 for each 1000 population.

TEXAS LADIES Don't Lie.

Bad Taste in the Mouth.

Digestion is the grand process by which nature repairs the wasted tissues of the body, which, when the individual is in health is performed with great faithfulness and regularity, and without giving rise to any disagreeable sensations.

Indigestion is a disease which consists of a deviation from this ordinary mode of health and in the deficiency or vitiated character of those secretions which are essential to the conversion of food into blood. The best corrective for this complaint is Dr. M. A. Simmons Liver Medicine a few doses of which will remove the offensive taste. Bad Taste in the Mouth.

will remove the offensive taste.

A.C. Durkins Randolph, Ky., writes: I will never be without Dr. M. A. Simmons Liver Medicine. It cured me of Chronic Constipation and Torpidity of Liver afterseveral Physicians and many Patent Medicines had failed. I took three times as much "Black Draught" as the directions said take, and it had but little effect on me, and I don't think it had much strength.

Backaches Common to Mothers.

The busy mother sometimes feels an inability to perform her accustomed duties. She feels inactive, weary and depressed. Her back, oh, how it aches! When she sits down she feels as though she must get right up, and when she stands, that she must sit down. The truth is, the capacity of her nervous system has been overworked, it has become exhausted and there is a breaking down. What she needs is a course of Dr. Sinamons Squaw Vine Wine to restore healthy functional activity and give tone and vitality to her nervous system.
