THE TOOLS THEY USED.

The Simple Means by Which Great Things Have Ecen Dons.

Dr. William H. Wollaston rendered many services to science. He was the first to detect the Fraun-

and to demonstrate the identity of galvanism and frictional electricity. One day a visitor from a foreign country called up on the doctor and asked to be shown the laboratory where so many valuable discoveries had been made. The doctor conducted his visitor to a small room in which there was no furniture except a table. On the table was an old tea tray containing a small bal-6.00 ance, a blowpipe, some test papers 5.85 and a few watch glasses.

"This room," said Dr. Wollaston, 'is my laboratory, and on that tea

15.00

tray are all of my work tools." Everybody knows that Eenjamin Franklin, the eminent American statesman and philosopher, robbed the thundercloud of its lightning by means of a kite and a silk handkerchief.

A celebrated English engraver, Thomas Equick, drew his first eketches with common chalk upon the walls of the little cottage in which he lived. The far famed chemist Julius Stockhardt learned the art of combining colors by closely studying the wings of many butterflies.

Dr. Joseph Elack, a chemist of commission has reduced the rates note, discovered latent heat by using on cotton. as tools a pan of water and two thermometers. Sir David Wilkie, the renowned rainter, for his first out for an exploration of the

work made use of a barn door and a south pole. charred stick for want of canvas and pencil.

John Opie was called "the Cornish wonder" because of his great skill in portraiture. He was asked one day by what wonderful process he mixed his colors.

"I mix them with my brains," answered the painter.

Benjamin West, a well known American painter, manufactured his first brush out of a cat's tail. Sir tion of light and the origin of color by means of a sheet of pasteboard, a prism and a lens. Out of an anatcmist's syringe, which by accident came into his possession, Watt, the great British engineer and mechanical inventor, constructed his first model of the condensing steam engine.

Demosthenes resolved to become an orator, and in order to carry out his resolve it was necessary for him to overcome some serious obstacles. His manners were awkward, his breath short and his voice stammering and indistinct. He did not attend is the best help you can use at this time. a school of oratory, nor did he have a It is a liniment, and when regularly apprivate tutor, but we are told that plied several months before baby comes, he first shaved one side of his head it makes the advent easy and nearly painonly, so as to make it impossible for less. It relieves and prevents "morning him to go into society, and thus di-sickness," relaxes the overstrained mus- to vert himself from his purpose. cles, relieves the distended feeling, short-Then, to overcome the defect in his ens labor, makes recovery rapid and cerspeech, he adopted the practice of speaking with pebbles in his mouth, and that he might be able to make himself heard in the tumult of popular assemblies he declaimed hour after hour upon the seashore. To observe and correct his awkward gestures he spent much time practicing before a mirror. Thus, by patience and perseverance, he became the greatest orator of antiqui-

JOHNSON'S CHILL AND FEVER TONIC **Cures** Fever in One Day.

History makes haste to record great deeds, but often neglects good ones.

Bernard Palissy, the French potter, chemist and enameler, had but little indeed to work with when making his first experiments, but in spite of poverty, religious persecution and many other impediments he pursued with untiring energy the art of pottery, glass painting and enameling and became one of the first artists of the French renaissance.

To these names scores of others might be added of persons that have Suttons, Anderson and part of Penn climbed high on the ladder of fame by making a right use of whatever tools or means were within their reach, by a healthful, traiseworthy desire to excel and by "keep" everlastingly at it."-Philadelphia Times.

Vitality of Cats.

It's an old saying that "a cat has nine lives," and, like most old sayings, not supposed to have any truth in it, but from recent investigations it really seems that a cat can hold on to life under circumstances where any other creature would die. A cat's life may be proved to be at the least three times the worth of a dog's. Put a cat and a dog of the same age in a "lethal chamber." The cat will always outlive the dog. On one occasion it was noticed the dog was dead in 5 minutes and Trio. the cat still breathing 40 minutes Kingstree, later. A cat has been known to recover after two hours' immersion in cold water, and another came back to life eight hours after apparent death from a dose of prussic acid .--Strand Magazine.

"Why does Miss Eider always drop her eyes when she meets you?" "If you will never give it away, I will tell you. She drops her eyes because I saw her drop her teeth one day."-Cincinnati Enquirer.
