I W W Workers Expected to Interfere With Prosecution of War

Industrial Workers of the World on the Pacific coast have planned wholesale destruction of industries and shipping and other interference with prosecution of the war, it is said at the department of justice. The indictment of 55 at Sacramento by a federal grand jury is the result of recent investigations by government agents who discovered that leaders were plotting systematic sabotage.

The investigation was a direct result of the recent attempt to blow up the governor's residence at Sacramento. Agents discovered a group of plotters whose activities extended throughout the Pacific coast territory.

In addition to blowing up factories, plotters in that section of the country had planned to foment strikes among workmen engaged in war industries, destruction of fruit trees and crops.

YOU COOK YOUR FOOD—WHY NOT YOUR TOBACCO?

YOU know what broiling does to steak, baking to a potato—and toasting to bread. In each case flavor is brought out by cooking—by "toasting."

So you can imagine how toasting improves the flavor of the Burley tobacco used in the Lucky Strike Cigarette.
