

**Sacked hulls mean convenience and economy**

PUTTING Buckeye Hulls in sacks is just one of the important little things that have been done to make this roughage an improvement over the old style. This makes

**BUCKEYE HULLS**  
COTTONSEED  
LINTLESS

easy to handle when putting them in the barn and easier to measure out when mixing feed. It keeps them clean and makes your help think of them as forage—not as bedding.

Even though sacked, Buckeye Hulls sell for much less than loose old style hulls. It costs us money to sack them but we believe that anything that will help you use this product to best advantage is worth the expense.

**Other Advantages**

Buckeye Hulls are free of lint which has no food value.	No trash or dirt.
2000 pounds of real roughage to the ton—not 1500.	They mix well with other food.
Buckeye Hulls allow better assimilation of food.	They take less space in the barn.
	Every pound goes farther.

*Kimbraugh Dros., Indianola, Miss., say:*  
"We are using Buckeye Hulls and are very much pleased with them. We think they are superior to old style hulls."

To secure the best results and to develop the ensilage odor, wet the hulls thoroughly twelve hours before feeding. It is easy to do this by wetting them down night and morning for the next feeding. If at any time this cannot be done, wet down at least thirty minutes. If you prefer to feed the hulls dry, use only half as much by bulk as of old style hulls.

**Book of Mixed Feeds Free**

Gives the right formula for every combination of feeds used in the South. Tells how much to feed for maintenance, for milk, for fattening, for work. Describes Buckeye Hulls and gives directions for using them properly. Send for your copy to the nearest mill.

**TO CURB "U" BOATS**

"Sea Jitneys" Suggested for Attack on German Bases.

Canadian Naval Airplane Fighter, Home to Recover From Shrapnel Wounds Expresses an Opinion.

Theorizing about war conditions has grown quite as tiresome, no doubt, to the people who read newspapers as it has to most of the people who write for them. Yet, now and then, you meet a man who theorizes from the facts of experience and knowledge and who points something out that gives food for thought. Such a case, it seemed to several of us, when a quiet little chap, son of a Canadian millionaire, told us his view of the war in its present stage, a New York correspondent of the Cincinnati Times-Star writes. His brother was killed at the Marne and he himself is home to recover from shrapnel wounds received when he was flying a naval airplane some thousands of feet above a town on the Belgian coast.

"The outstanding fact, just now," he said, "is that the German U-boats are doing pretty nearly as much as they were expected to do and that we have no effective defense against them. The Germans are almost justified in believing that they are on the way toward starving England into submission. If we don't find a new and successful way to combat the U-boats the situation in England will soon be very critical. Of course, I fancy a way will be found. But it must be something entirely new in warfare. For my part, I am convinced that success can be obtained only by the apparently desperate undertaking of assaults by sea upon the U-boat bases. I say 'apparently desperate.' By any known or tried method such assaults would be simply useless and suicidal.

"The German harbors are mined, netted from end to end and fortified with tremendous shore batteries of heavy and aircraft guns. How can the bases be attacked? Well, of course, that will be settled by some one else than I, but I have heard a theoretical plan of attack proposed by one of our naval men which made a great impression on me. He said we must build thousands of small submarines—something like the 'sea jitneys' which manufacturers have talked about—and go into the German harbors with swarms of them, at the risk of losing ninety-nine out of every hundred boats and crews. Barrage fire and bombing have been the new and successful things in land fighting.

"This officer's proposal is for something like an undersea duplication of this plan of attack. Most of the little boats would be lost, no doubt, but most of them would succeed in doing material damage with one or two explosions. Nets would be blown away, mines exploded, guard ships sunk and such other disorganization of the harbor defenses accomplished as to give the big ships a chance to complete the work. Yes, it's true that a man would hardly need to worry about his return trip if he went in on one of these little boats. It would be work for volunteers. But the volunteers would be plentiful enough. That I am sure of.

"If such attacks promised to win the fight against the U-boats, men would be willing to go. It would be enough for them to know that they were striking the sea murderers at their home, and that some of them might possibly get back."

**German Schooling.**

German schooling has proved antagonistic to co-operation, although demanding unity of action through mass obedience. It has failed to foster real co-operation, for co-operation is a method by which persons of their own volition and by no compulsion may work together harmoniously, writes Winthrop Talbot in the Century Magazine. Only when training and schooling are the common privilege of all is that state of civic development possible which permits society to become co-operative in its action. In other words, a socialized society becomes more and more possible only as all individual members acquire each the widest vision, and thus the power to co-operate harmoniously.

**The Crow.**

I have seen no bird walk the ground with just the same air the crow does. It is not exactly pride; there is no strut or swagger in it, though perhaps just a little condescension; it is the contented and self-possessed gait of a lord over his domains. All these acres are mine, he says, and all these crops; men plow and sow for me, and I stay here or go there, and find life sweet and good wherever I am. The hawk looks awkward and out of place on the ground; the game birds hurry and skink; but the crow is at home and treads the earth as if there were none to molest or make him afraid.—John Burroughs.

**The Mystery of Love.**

Love is the great mystery of life. It may be the growth of years, months or an instant, says the Christian Herald. Man sees a million beautiful faces; he hears a million sweet voices; he meets a million women with flowers at their breasts and light in their eyes—and they do not touch him. Then he sees the one, and she holds him for life and death. She is no nobler, better or more beautiful than were those he passed by, and yet his world is empty without her. Assuredly there is far more than fashion in this universal force we call love.

**TANLAC PROVED TO BE A FINE REMEDY**

Mrs. Worthy Says She Gladly Gives It Endorsement

**SPARTANBURG WOMAN**

"It Helped Me in Every Way I Needed Relief," is Her Statement

"Tanlac proved to be a good tonic and stomach remedy for men and it helped me in every way I needed relief," declared Mrs. J. J. Worthy, of 68 Railroad Ave., Arkwright, Spartanburg, in a statement she gave June 7th. "I was troubled a great deal with indigestion and my whole system was run down. My appetite was about gone, I was troubled awfully with nervousness, and headaches caused me a lot of suffering. When I had one of those bad nervous attacks, I could not rest at night. The Tanlac quieted and strengthened my nerves, though, and I soon was eating heartily, and the indigestion left me in a little while. Those headaches were relieved quickly, too. In a short time I was feeling a great deal better. I am glad to endorse Tanlac, for it helped me in every way."

**Rusty Door Fastenings.**

The best door fastenings sometimes fail to catch without a special turning of the knob, the latch seeming sluggish and slow in action. This annoyance may be remedied by a few drops of kerosene, which dissolves the accumulated rust. Apply with an oil can having a long tube, so that the oil may be thrown far into the interior of the latch.

**Value of Reading.**

Reading means much to children, young men and young women. Reading is the key that unlocks the door of information and lets opportunity in. Reading is the beginning of an education. It gives the poor a chance to get information and become useful. Every home should be well supplied with books, magazines, papers and newspapers, and the children encouraged to read in the evenings.—Exchange.

**How Egyptians Reaped Grain.**

The ancient Egyptians reaped their grain close to the ear and reformed out the straw close to the ground and laid it by. It was this straw that Harsh refused to give to the Israelites. It was because of this refusal to give the longer straw to the Israelites that they were compelled to gather "manna." This was a matter of considerable difficulty, seeing that the straw itself had been cut off near to the ground.

**An Old Idea.**

The type of man who feels he has discharged his obligations as a husband when he provides his wife with a place to do housework for her board is not uncommon.—Topic's Capital.

**The Quinine That Does Not Affect the Head**

Because of its tonic and laxative effect, LAXATIVE BROMO QUININE is better than ordinary Quinine and does not cause nervousness or ringing in head. Remember the full name and look for the signature of E. W. GROVE, 30c.

**Notice of Final Discharge.**

State of South Carolina  
County of Union  
Court of Probate

Notice is hereby given, that on the 27th day of February, 1918, at 11 o'clock, a. m., in the Court of Probate for said County, the undersigned will make her final settlement as Administrator of the Estate of Wade H. Barnes, deceased, and that thereupon he will apply to the Judge of said Court, for his final discharge as such Administrator.

Anna G. Barnes.  
This 28th day of January, 1918.  
Published in The Union Times for 30 days.  
5-4t.

**About Optimists.**

"I ain' got no use," said Uncle Eben "foh one o' dese optimistses dat simply grins an' hopes foh de best while somebody else does all de work."

**Islands Made for Silence.**

Tonn is the most fertile and beautiful of the Hebrides of which there are some 300 scattered about the waters to the west of Scotland, an exchange states. Only about 100 of these islands are inhabited at all, and the greater part of these latter support less than a dozen people each. It is a region of rain and mist, with rare clear days that are like the infrequent laugh of a sad but kindly nature-god. The atmosphere of the archipelago is made for dreams and silence. It seems out of the modern world.

**Credit Given to China.**

The English walnut first blossomed in the interior of China, and the chestnut, so plentifully produced in the Atlantic states, made its first appearance from the lower plains of Tibet. Peaches and persimmons were first known and appreciated in Mongolia, China and Tibet, but through their common use for hundreds of years their origin has been lost and their discovery credited to lands better known.—World Outlook.

**School is Destroyed**

Atlanta, Feb. 19.—Two firemen were injured and property damaged estimated at \$35,000 was caused by a fire which destroyed Boulevard Grammar School, at the corner of Irwin Street and Boulevard, here early tonight. The fire was believed to have been caused by a defective flue. Fireman J. N. Johnson and Capt. John M. Jenkins were seriously burned about the face and hands.
