#### COTTAGE CHEESE

Eat cheese, eat cottage cheese and be happy and healthy.

The cheese is nutritious and can be used in a number of ways as a substitute for meat. Each pound of protein or body-building material as the same weight in beef. It is, however, not quite so rich in its energy supply as meat.

Cottage cheese can be made at home at very little expense and without little trouble.

He prayeth best, who loveth best  
All things both great and small;  
For the dear God who loveth us,  
He made and loveth all.  
Samuel T. Coleridge.

#### "Clean Up the Bowels and Keep Them Clean"

There are many remedies to be had for constipation, but the difficulty is to procure one that acts without violence. A remedy that does not perform by force what should be accomplished by persuasion is Dr. Miles' Laxative Tablets. After using them, Mr. N. A. Waddell, 315 Washington St., Waco, Tex., says:

"Almost all my life I have been troubled with constipation, and have tried many remedies, all of which seemed to cause pain without giving much relief. I finally tried Dr. Miles' Laxative Tablets and found them excellent. Their action is pleasant and mild, and their chocolate taste makes them easy to take. I am more than glad to recommend them."

"Clean up the bowels and keep them clean," is the advice of all physicians, because they realize the danger resulting from habitual constipation. Do not delay too long, but begin proper curative measures. Dr. Miles' Laxative Tablets are a new remedy for this old complaint, and a great improvement over the cathartics you have been using in the past. They taste like candy and work like a charm. A trial will convince you.

Dr. Miles' Laxative Tablets are sold by all druggists, at 25 cents a box containing 25 doses. If not found satisfactory after trial, return the box to your druggist and he will return your money. MILES MEDICAL CO., Elkhart, Ind.

#### WHY HE LIKED HE GOAT

"Little Sammy was generally at loggerheads with his father, who had a habit of using his razor strop in a way that was not in accordance with Sammy's views.

One morning, after the razor-strop had been more than usually busy, Sammy's mother went out into the yard to look for her much-stropped child.

To her intense astonishment, she found him fondling a huge goat for which he usually professed a deep hatred.

"Why, Sammy darling, it is nice to see you being so kind to poor Billy! Why are you being so gentle with him today?"

Over Sammy's face came a look of unspeakable gratitude, as he gave the wondering goat another carrot.

"He butted father into the pond this morning!" murmured the dear little chap patting his four-footed friend affectionately.—New York Mail.

#### "A SPLENDID TONIC"

Says Hixson Lady Who, On Doctor's Advice, Took Cardui And Is Now Well.

Hixson, Tenn.—"About 10 years ago I was..." says Mrs. J. B. Gadd, of this place. "I suffered with a pain in my left side, could not sleep at night with this pain, always in the left side..."

My doctor told me to use Cardui. I took one bottle, which helped me and after my baby came, I was stronger and better, but the pain was still there.

I at first let it go, but began to get weak and in a run-down condition, so I decided to try some more Cardui, which I did.

This last Cardui which I took made me much better, in fact, cured me. It has been a number of years, still I have no return of this trouble.

I feel it was Cardui that cured me, and I recommend it as a splendid female tonic.

Don't allow yourself to become weak and run-down from womanly troubles. Take Cardui. It should surely help you, as it has so many thousands of other women in the past 40 years. Headache, backache, sideache, nervousness, sleeplessness, tired-out feeling, are all signs of womanly trouble. Other women get relief by taking Cardui. Why not you? All druggists. NC-132

## SMALL GRAIN SMUTS DECREASE YIELDS

SIMPLE SEED TREATMENT WILL  
ELIMINATE LOSS.

### USE THE VERY BEST OF SEED

Small grain smuts may be destroyed very easily by seed treatment, says the botany and plant pathology division of Clemson College. There was a loss of 5 to 10 per cent of our small-grain crops in South Carolina last year due to smuts. In view of the fact that grains are of very great importance at this time, and in most cases seed from last year's crop is to be used, it is urged that the seed be treated before planting. Enough seed to sow an acre can be treated for five cents, yet it may save the farmer as high as \$20 for every acre of grain planted.

Rye is not subject so to smuts, but to prevent smuts of oats, barley and wheat use only the very best seed obtainable, and before treating be sure to have, if possible, the seed passed through a fanning mill to remove light imperfect kernels and any smut balls that may not have been removed at the time of thrashing.

For chemical treatment of seed the following methods have been found to be most effective:—

(1) Take an old molasses or oil barrel, clean well and fill about two-thirds full with formalin solution—one pint of formaldehyde to forty gallons of water. Place about a bushel of seed in a bag and tie near the top so that the seed will have free movement within the bath. Allow each bag to soak in the solution for about ten or fifteen minutes. After treating from fifteen to twenty bushels a new bath should be prepared. As fast as the sacks of seed are treated and allowed to drip they should be emptied into a pile and allowed to remain over night. The seed should then be planted at once or dried to prevent damage.

(2) Place the seed in a pile on the floor or in one end of a wagon body, and as you gradually shovel from one pile to a new one the seed should be sprinkled with the formalin solution. The shoveling and sprinkling of the seed should be repeated until the seed are thoroughly damp. Then place damp bags over the piles and allow to remain over night.

The former treatment is preferable and gives better results as the seed are more likely to be thoroughly wet. The above methods may be varied by the use of bluestone (one pound of bluestone to four or five gallons of water) instead of formaldehyde. The bluestone is likely, however, to prove more injurious to germination, especially old seed. Materials for making the solutions may be purchased at a drug store.

#### The State of Westsylvania.

The "province and government of Westsylvania" was a proposal made by the settlers in the southwest of Pennsylvania and the adjacent territory for the creation of a new state. It originated in connection with the troubles between Virginia and Pennsylvania, and the scheme was brought forward early in July, 1776. A description of the proposed government defines the bounds as "beginning at the eastern branch of the Ohio opposite the mouth of the Scioto and running thence in a direct line to the Owasioto pass, thence to the top of the Allegheny mountains, thence with the top of the said mountains to the northern limits of the purchase made from the Indians in 1768 at the treaty of Fort Stanwix, thence with the said limits to the Allegheny or Ohio river and then down the said river as purchased from the said Indians at the aforesaid treaty of Fort Stanwix at the beginning." A call for a convention to organize the government was issued, but a memorial of the Virginia committee of West Augusta county to the lower house of assembly led to the abandonment of the plan.—Philadelphia Press.

#### London's Crystal Palace.

Crystal palace was originally built in Hyde park for the great exhibition of 1851, being afterward removed to its present site and re-erected. At the first state opening of the palace by Queen Victoria it was urged that the usual artillery salute should not be fired, the reason given being that the concussion would shiver the glass roof and the company assembled below, including her majesty, would be cut into mince-meat. Dire were the predictions of the seersnongers when the design for the palace was made public. The first gale, they said, would inevitably wreck it, while the heat engendered by the sun pouring its rays upon the domed glass roof would be so terrible that no human being could withstand it. Consequently if they escaped an avalanche of glass they would be roasted to death inside the case.

#### ALL CITIZENS ARE ASKED TO DO DUTY

Washington, Nov. 10.—Calling on every citizen in the nation to put personal interests aside and help the government classify the remaining 9,000,000 draft registrants, President Wilson tonight issued a foreword on the new draft regulations.

He asked every lawyer to volunteer his services and every doctor to do the same, in order that free legal and medical aid bureaus may be established for the registrants in conjunction with each local board.

The president estimated that the classification, which the provost marshal general announced will begin throughout the country about December 15, should be completed in 60 days.

#### To Make Questionnaire Public.

The questionnaire itself is now in the mails to the local boards and will be made public in a few days.

Under the terms the exact physical, mental, moral, social, commercial and industrial status of every registrant will be fixed. It will give the government data on how many shipbuilders, bricklayers, hodcarriers, musicians and every other type of man power is at its disposal. Speedy mobilization and equipment of units for any war task will be possible. Efficiency that was practically impossible under the old draft system. The new method will enable the government to exempt men with closer regard to the nation's labor needs in all lines.

A place will be arranged near each local board headquarters where the men may fill out their questions. Under the direction of county judges or other officials a committee will see that there are always plenty of lawyers to help the registrants do this.

#### To Be Mailed to Registrants.

Questionnaires will be mailed to five per cent, of the registrants each day beginning December 15. Each man has seven days to fill out and return the list. December 23 the boards begin placing the men in five classes. They should finish their task about February 13 and soon after the second draft call may be expected.

The questionnaire is somewhat formidable and complicated in appearance. But in explanation of this the provost marshal today said:

"A reading of the questions shows that there are people enough to answer for any person who can read and write understandingly. It is the only printed form which any registrant needs to use either in making claims of filing proof."

The president's foreword to this document tonight said:

#### The President's Statement.

"The task of selecting and mobilizing the national army is nearing completion. The expedition and accuracy of its accomplishment were a most gratifying demonstration of the efficiency of our democratic institutions. The swiftness with which the machinery for its execution had to be assembled, however, left room for adjustment and improvement. New regulations putting these improvements into effect are, therefore, being published today. There is no change in the essential obligation of men subject to selection. The first draft must stand unaffected by the provisions of the new regulations. They can be given no retro-active effect. "The time has come for a more!

perfect organization of our man power. The selective principle must be carried to its logical conclusion. We must take a complete inventory of the qualifications of all registrants in order to determine, as to each man not already selected for duty with the colors, the place in the military, industrial or agricultural ranks of the nation in which his experience and training can best be made that will result in the common good. This course involves an inquiry by the selection boards into the domestic, industrial and educational qualifications of nearly ten million men.

"Members of these boards have rendered a conspicuous service. The work was done without regard to personal convenience and under a pressure of immediate necessity which imposed great sacrifices. Yet the services of men trained by the experience of the first draft must of necessity be retained and the selection boards must provide the directing mechanism for the new classification. The thing they have done is scarcely one-tenth the magnitude of the things that remain to be done. It is of great importance both to our military and our economic interests that the classification be carried swiftly and accurately to a conclusion. An estimate of the time necessary for the work leads to the conclusion that it can be accomplished in 60 days; but only if this great marshalling of our resources of men is regarded by all as a national war undertaking of such significance as to challenge the attention and compel the assistance of every American.

"I call upon all citizens therefore to assist local and district boards by proffering such service and material conveniences as they can offer and by appearing before the boards, either upon summons of their own initiative, to give such information as will be useful in classifying registrants. I urge men of legal profession to offer themselves as associate member of the legal advisory boards to be provided in each community to advise registrants of their rights and obligations and of assisting them in the preparation of their answers to the questions. I ask the doctors of the country to identify themselves with the medical advisory boards to be constituted in the various districts for the purpose of making a systematic physical examination of the registrants. It is important also that police officials of every grade and class should be informed of their duty under the selective service law and regulations, to search for persons who do not respond promptly and to serve the summons of local and district boards. Newspapers can be of very great assistance in giving wide publicity to the requirements of the law and regulations and to the numbers and names of those who are called to present themselves to their local board from day to day. Finally ask that during the time hereafter to be specified as marking the 60 days period of classification, all citizens give attention to the task in hand in order that the process may proceed to a conclusion with swiftness and yet with even and considerate justice to all."

The quality of Mercy is not strain'd;  
It droppeth, as a gentle rain from heaven,  
Upon the place beneath: it is twice bless'd;  
It blesseth him that gives and him that takes.  
'Tis mightiest in the mightiest.  
—Shakespeare.

## "The Joy of the Open Road"

Is never better appreciated than in a Hudson Super-Six.

Whether it is for an evening's ride on the boulevard, a run out to the country or a trip across the continent, the Hudson Super-Six will give you confidence of a safe, joyful ride.

Power such as the Hudson Super-Six has is essential if your trip is to be pleasant. Endurance such as the Super-Six has shown is vital if your trip is to be unmarred by mechanical shortcomings.
