MEMPHIS, Tenn., March 1850. The Faculties, for intellectual abilities, moral worth and professional acquirements, will compare fave rable with the most distinguished in our coun try. The medical faculty constitutes an anomaly

in this or any other country-all of them are able lecturers and the best of teachers. Those who will contemplate our geographical

position, and the extent of our population, can have no doubt as to the eligibility of our situation for an enterprise of the kind. As to health, including all seasons of the year, we deny that ANY OTHER CITY HAS MORE.

A common error exists in the minds of many students relative to the place of studying medicine; those who intend practicing among the diseases of the West and South should certainly educate themselves at a school whose faculty are practical-

y acquainted with those diseases. That the public may be satisfied of the permanency of this school, we feel it our duty to state, that the Trustees and Faculty form a UNIT in action which augurs well for its future success; and that the peculiar internal organization which connects

them, cannot be interrupted. E. W. M. KING. President of the Memphis Institute.

"A GREAT MEDICINE." "We have uniformly refrained from recommending to the public any of the various Patent Medicines of the day, unless thoroughly convinced of their value. Among those we consider worthy of notice is the German Bitters, inven-ted by Dr. Hoofland, and prepared by Dr. Jackson, in Phil-adelphia. One instance in particular, in which the supe-rior virtues of this medicine have been tested, has fallen under our observation. During the last summer, a son of Mr. Abraham Brabbill, of this conntry, was very seriously afflicted with Liver Complaint, and after trying in vain various remedies, he purchased a bottle of the Bitters and often noing it, was so much relieved of his distressing malig it, was so much relieved of his distressing ma aly that he procured another bottle, and is restored entire ly to health.
